Foreword by Charles D. Tenney Richard Buckminster Fuller, 1962 *Education Automation* R. Buckminster Fuller, 2010
Buckminster Fuller's prophetic 1962 book *Education Automation* brilliantly anticipated the need to rethink learning in light of a dawning revolution in informational technology upcoming major world industry Along with other essays on education including *Breaking the Shell of Permitted Ignorance* *Children the True Scientists* and *Mistake Mystique* this volume presents a powerful approach for preparing ourselves to face epochal changes on spaceship earth whether we are going to make it or not is really up to each one of us it is not something we can delegate to the politicians what kind of world are you really going to have Description by Lars Muller Publishers courtesy of The Estate of Buckminster Fuller *At a Distance* Annmarie Chandler, 2005 The theory and practice of networked art and activism including mail art sound art telematic art fax art Fluxus and assemblings Networked collaborations of artists did not begin on the Internet In this multidisciplinary look at the practice of art that takes place across a distance geographical temporal or emotional theorists and practitioners examine the ways that art activism and media fundamentally reconfigured each other in experimental networked projects of the 1970s and 1980s By providing a context for this work showing that it was shaped by varying mixes of social relations cultural strategies and political and aesthetic concerns *At a Distance* effectively refutes the widely accepted idea that networked art is technologically determined Doing so it provides the historical grounding needed for a more complete understanding of today's practices of Internet art and activism and suggests the possibilities inherent in networked practice *At a Distance* traces the history and theory of such experimental art projects as Mail Art sound and radio art telematic art assemblings and Fluxus Although the projects differed a conceptual questioning of the art object combined with a political undermining of dominant art institutional practices animated most distance art After a section that sets this work in historical and critical perspective the book presents artists and others involved in this art re-viewing their work including experiments in mini FM telerobotics networked psychoanalysis and interactive book construction Finally the book recasts the history of networks from the perspectives of politics aesthetics economics and cross cultural analysis *Summary of Major Legislative Action of the Committee on Education and Labor, U.S. House of Representatives, 92d Congress*, 1973 *Alternative Futures in American Education*, 1972 **MOOCs and Their Afterlives** Elizabeth Losh, 2017-08-17 A trio of headlines in the Chronicle of Higher Education seem to say it all in 2013 A Bold Move Toward MOOCs Sends Shock Waves in 2014 Doubts About MOOCs Continue to Rise and in 2015 The MOOC Hype Fades At the beginning of the 2010s MOOCs or Massive Open Online Courses seemed poised to completely revolutionize higher education But now just a few years into the revolution educators

enthusiasm seems to have cooled As advocates and critics try to make sense of the rise and fall of these courses both groups are united by one question Where do we go from here Elizabeth Losh has gathered experts from across disciplines education rhetoric philosophy literary studies history computer science and journalism to tease out lessons and chart a course into the future of open online education Instructors talk about what worked and what didn't Students share their experiences as participants And scholars consider the ethics of this education The collection goes beyond MOOCs to cover variants such as hybrid or blended courses SPOCs Small Personalized Online Courses and DOCCs Distributed Open Collaborative Course Together these essays provide a unique even handed look at the MOOC movement and will serve as a thoughtful guide to those shaping the next steps for open education
