implications the academic literature rarely acknowledges the experiences and pressures faced by practitioners themselves as they implement aid funded development projects the meetings paperwork negotiations site visits financial transactions logistical arrangements interviews program activities and beneficiary interactions that keep projects running And yet the impact of aid projects and indeed the impact of development itself often grows out of the daily activities and personal interactions of development practitioners This unique book considers challenges from the perspective of development practitioners who confront technical managerial political theoretical and moral quandaries on a daily basis With chapters written by expert practitioners on different aspects of design and management of international development activities this book examines real issues and navigates the often contradictory demands of local development needs including international donor imperatives limited financial resources time information and assurance of results the competing pulls of administrative efficiency and the desire to alleviate suffering It also gives readers access to the crucial but little heard voices of those who spend their professional lives designing and managing foreign aid projects offering insight into what did or did not work on projects they have managed implemented or evaluated These insights do not seek to identify universally right or wrong ways of doing development instead they highlight pros and cons associated with various approaches and decisions This book provides valuable insights for students and others interested in a development career encourages practitioners to engage in reflection and persuades researchers to further consider the influence of practice on project success or failure Managing Vocational Training Systems Vladimir Gasskov, 2000 Provides state of art materials relating to the management and organization of public vocational education and training VET systems and suggests a framework for developing the management competence of senior VET administrators encouraging them to review critically their administrative practices in order to move towards professional excellence Covers management organizational structure target setting planning financing and training administration

Economics of the Reversal in Gender Disparities in Education and Development Masayoshi Okabe, 2025-09-30 This book examines the background and consequences of the reversal in gender disparities in education through the case of the Philippines While global education and development discourse has long emphasized girls disadvantage a reversal where boys are falling behind in education has also recently emerged in a number of countries in developing contexts This book critically investigates this issue in the Philippines hailed as the top runner of gender equality in Asia and the Pacific where boys especially those from poorer households and in rural areas are increasingly falling behind Drawing on data from three provinces across the archipelago s main regions Luzon Visayas and Mindanao the book empirically traces the background and consequences of the reversal in family dynamics and school environments amid poverty and uneven development It reveals that boys educational disengagement cannot be understood independently of broader socioeconomic structures While girls may outperform boys in education labor market and familial systems often continue to disadvantage women recursively shaping boys educational disengagement Through the lens of

intergroup heterogeneity this book offers an in depth examination of the nature of the reversal The economics of reversal is thus used not merely to describe but to rigorously interrogate surface level shifts that may obscure deeper enduring asymmetries The book adopts an interdisciplinary approach combining development economics education and area studies aiming to bridge econometric rigor and field based contextual sensitivity It is intended for scholars educators policymakers and students interested in evolving patterns of education and development This volume presents an expanded and refined development of the author s earlier research which was awarded the Main Prize at the 19th Asia Pacific Research Prize Iue Prize conferred by the Asia Pacific Forum Awaji Conference Japan

International Handbook of Comparative Education
Robert Cowen, Andreas M. Kazamias, 2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook

Economic Development
Michael P. Todaro, Stephen C. Smith, 2006 This text maintains a problem and policy oriented approach to development economics It focuses on people and government in developing countries

The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which

the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
