Education for the Intercultural Experience R. Michael Paige, 1993 **Intercultural Experience and Identity** Lily Lei Ye, 2018-06-13 This book examines the identity formation and negotiation of Chinese doctoral students in the UK and the opportunity for self-transformation this experience offers. As the largest group of international students in the English-speaking world, Mainland Chinese students encounter a range of difficulties and prospects that may be relevant to the wider international student community. Using extensive qualitative and empirical data, the author explores the narratives of eleven Chinese doctoral students at two British universities through a sociological perspective. Balancing analysis with solid theoretical framework and the voices of the students themselves, the author moves away from essentialism and othering, instead shining a light on the effects of globalisation, internationalisation and recent policy strategies. This volume will be of interest and value to students and scholars of comparative and international education, identity formation, intercultural communication, the sociology of education and study abroad.

Intercultural Experience and Education (Languages for Intercultural Communication and Education) Michael Fleming, **Becoming Interculturally Competent Through Education and Training** Anwei Feng, Michael Byram, 2009 This book demonstrates the complementarity of educational and training approaches to developing intercultural competence as represented by those who work in commercial training and those who work in further and higher education. It does so by presenting chapters of analysis and chapters describing courses in the two sectors.

What is Legal Education for? Rachel Dunn, Paul Maharg, Victoria Roper, 2022-09-30 How we interpret and understand the historical contexts of legal education has profoundly affected how we understand contemporary educational cultures and practices. This book is the result of a Modern Law Review seminar both celebrates and critiques the lasting impact of Peter Birks' influential edited collection *Pressing Problems in the Law* Volume 2. What is the Law School for? Published in 1996, his book addresses many critical issues that are hauntingly present in the 21st century amongst them the impact of globalisation, technological disruption and the tension inherent in law schools as they seek to balance the competing interests of teaching, research and administration. Yet Birks' collection misses key issues too. The role of wellbeing, of emotion or affect, the relation of legal education to education, the status of legal education in what since his volume have become the devolved jurisdictions of Northern Ireland, Wales and Scotland, these and others are absent from the research.

agenda of the book Today legal educators face new challenges We are still recovering from the effects of the Covid 19 pandemic on our universities In 1996 Birks was keen to stress the importance of comparative research within Europe Today legal researchers are dismayed at the possibility of losing valuable EU research funding when the UK leaves the EU and at the many other negative effects of Brexit on legal education The proposed Solicitors Qualifying Examination takes legal education regulation and professional learning into uncharted waters This book discusses these and related impacts on our legal educations As law schools approach an existential crossroads post Covid 19 it seems timely to revisit Birks fundamental question what are law schools for

Asabere-Ameyaw, Jophus Anamuah-Mensah, George Sefa Dei, Kolawole Raheem, 2014-07-11 There is no term so heavily contested in social science literature nomenclature than Development This book brings Indigenous perspectives to African development It is argued that contrary to development as we know it not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since everything we do about our world is development So how come there is difficult knowledge when it comes to learning from what we know i.e. what local peoples do and have done for centuries as a starting point to reconstructing and reframing development In getting our heads around this paradox we are tempted to ask more questions How do we as African scholars and researchers begin to develop home grown solutions to our problems How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development i.e. Indigenist African development see also Yankah 2004 How do we speak of Indigenist development mindful of global developments and entanglements around us Can we afford to pursue development still mired in a catch up scenario Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line A Publication of the Centre for School and Community Science and Technology Studies SACOST University of Education Winneba Ghana
