Education Without Compromise From Chaos To Coherence In Higher Education:

Education Without Compromise William D. Schaefer, 1990-02-16 *Education Without Compromise* takes a critical look at the deteriorating quality of liberal arts education today The author argues that many of our four year colleges most of our universities and even our secondary schools have carelessly mixed vocational and academic courses without continuity or coherence resulting in a patchwork of unrelated courses and requirements

Reshaping the University David Palfreyman, Ted Tapper, 2014-06-12 The global economic crisis has required governments across the globe to reconsider their spending priorities It is within this demanding economic context that higher education systems have been steadily restructured with in many ways the English model in the vanguard of change This book focuses in particular upon the policy of removing almost entirely public support for the payment of student fees This has emerged from a steady process of change which has broad political support and is underwritten by the idea that higher education is now seen more as a private than a public good As this shift has occurred not a new innovation but rather a return to what once prevailed as more of a market in English higher education so the relationship between government and the higher education has evolved with the latter now attempting to steer the development of the system through a state regulated market The book has a strong comparative dimension that draws upon US higher education to illustrate both the possible advantages and potential hazards to the marketization strategy It concludes that any such strategy needs to be accompanied by state regulation if it is to function effectively particularly to stimulate price competition encourage innovation from new entrants and provide consumer protection for students paying high fees

New Faculty C. Lucas, J. Murry, Jr., 2002-08-15 Successfully launching an academic career in the challenging environment of higher education today is apt to require more explicit preparation than the informal socialization typically afforded in graduate school As a faculty novice soon discovers job success requires balancing multiple demands on one's time and energy *New Faculty* offers a useful compendium of survival advice for the faculty newcomer ranging from practical tips on classroom teaching and student performance evaluation to detailed advice on grant writing student advising professional service and publishing Beginning faculty members and possibly their more experienced colleagues as well will find this lively guidebook both informative and thought provoking

Crisis in the Academy Christopher J. Lucas, 1998-03-15 Not since student turmoil and unrest wreaked havoc on the nation's campuses three decades ago has American higher education been the subject of so much controversy and popular criticism Countless indictments compete for the public's attention as critics explore vital issues confronting today's institutions of higher learning curricular fragmentation declining academic standards the apparent erosion of liberal learning within academe widespread neglect of undergraduate education in favour of academic research and unprecedented financial woes Confusion over fundamental priorities and purposes the author argues lies at the heart of the dilemma facing end of the century higher

education Thoughtful and timely *Crisis in the Academy* offers a wide ranging analysis of contemporary higher education while making an important contribution to the ongoing public debate over the future of America's beleaguered and diverse institutions of higher learning *Our Underachieving Colleges* Derek Bok, 2006 Drawing on a body of empirical evidence this book examines how much progress college students actually make toward widely accepted goals of undergraduate education It describes the changes that faculties and academic leaders can make to help students accomplish more *No Place for Truth* David F. Wells, 1994-12-20 Evangelicals argues Wells have largely lost the truth that God also stands outside all human experience that he still summons sinners to repentance and belief regardless of their self image and that he calls his church to stand fast in his truth against the blandishments of the modern world **In Search of a Calling** Thomas O. Buford, 1995 **Cultivating Inquiry-Driven Learners** Clifton Conrad, Laura Dunek, 2020-08-04 How can colleges develop learners who pursue innovative ideas that enable them to flourish and contribute in a rapidly changing world Two decades into the twenty first century our nation's colleges and universities no longer embrace a clear and convincing definition of the purpose of a college education Instead most institutions have fallen prey to a default purpose in which college is essentially workforce preparation for jobs that already exist while students are viewed as commodities instead of being educated to flourish throughout their lives But rather than bemoan the diminishing legacy of liberal education this new edition of *Cultivating Inquiry Driven Learners* argues that the time has come to advance a pioneering purpose of college that guides the undergraduate experience from program requirements to teaching and learning This purpose Clifton Conrad and Laura Dunek write is anchored in the premise that the world in which we live is one in which change environmental cultural economic political is a constant driving force The authors envision a college educated person in the twenty first century as an inquiry driven learner a person equipped with the capabilities to explore and cultivate ideas that will prepare them to successfully navigate constant change capitalize on career opportunities enrich their personal life and contribute to the public good They describe four signature capabilities that students must develop in order to innovate and adapt core qualities of mind critical thinking skills expertise in divergent modes of inquiry and the capacity to express and communicate ideas Guided by this trailblazing vision Conrad and Dunek have thoroughly revised every chapter of the book to reflect current scholarship and emerging trends In an expanded conclusion they provide a cornucopia of ideas for replenishing undergraduate education accompanied by real world examples of innovative programs and practices from colleges and universities across the United States Throughout *Cultivating Inquiry Driven Learners* challenges stakeholders from across higher learning faculty students staff administrators and policymakers to reflect on the purpose of college embrace innovation and ensure that students are educated to thrive in and contribute to our constantly changing world *Boletin Internacional de Bibliografia Sobre Educacion*, 1997 *Revue Canadienne de L'enseignement Supérieur*, 1994 **Future Survey Annual 1991** Michael Marien, 1991-01-01 *Kirkus Reviews*, 1990 Adult books are categorized by genre i e fiction
