Begley, Olof Johansson, 2006-04-11 Among the many significant features of this volume is the dedication to the late Don Willower Professor of Education at Pennsylvania State University It is significant in light of Willower's long record of major contributions to the empirical literature in Educational Administration and his mentorship of many students steeped in the tradition of the so called science of administration These include scholars like Wayne Hoy and Peter Cistone who readily acknowledge their personal and intellectual debt to Willower How is it then that Willower a colleague of the giants of Educational Administration in the 60s and 70s people such as Dan Griffiths Jack Culbertson and Roald Campbell to name just a few came to associate himself with this relatively upstart group of academics and practitioners interested in values of all things As an inheritor of the mantle thrown down by Getzels and Guba all those

years ago it might seem strange to see Willower consorting with people who argue about the distinction between fact and value. It is true of course that Willower majored in philosophy at the State University of New York at Buffalo as an undergraduate. So the language and the ways of thinking among many of those interested in values and ethics were not all that foreign to him. He could certainly hold his own in debate with his friend Chris Hodgkinson, the foremost philosopher of Educational Administration in the field today and a contributor to this volume.

Ethical

Leadership and Decision Making in Education Joan Poliner Shapiro, Jacqueline A. Stefkovich, 2010-07-02 The third edition of the best selling text *Ethical Leadership and Decision Making in Education* continues to address the increasing interest in ethics and assists educational leaders with the complex dilemmas in today's challenging and diverse society. Through discussion and analysis of real life moral dilemmas that educational leaders face in their schools and communities, authors Shapiro and Stefkovich demonstrate the application of their four ethical paradigms: the ethics of justice, care, critique, and profession. After an illustration of how the Multiple Ethical Paradigm approach may be applied to real dilemmas, the authors present a series of cases written by students and academics in the field representing the dilemmas faced by practicing educational leaders in urban, suburban, and rural settings in an era full of complexities and contradictions. Following each case are questions that call for thoughtful, complex thinking and help readers come to grips with their own ethical codes and apply them to practical situations. New in the Third Edition: An entire new chapter on privacy versus safety including ethical issues such as strip searches, gang membership, cyber bullying, and sexting. New cases infused into chapters on early childhood education, diverse student populations, and technology. Updates throughout to reflect contemporary issues and recent scholarship in the field of ethical leadership. Including teaching notes for the instructor stressing the importance of self-reflection, this text is easily adaptable for a variety of uses with a wide range of audiences. *Ethical Leadership and Decision Making in Education* is a valuable book for both aspiring and practicing administrators, teacher leaders, and educational policy makers.

The History of Educational Administration Viewed Through Its Textbooks Thomas E. Glass, 2004 The *History of Educational Administration Viewed Through Its Texts* provides the reader a history of the development of the professional field of educational administration. From the Common School Era of the 1840s through the Era of Accountability in 2000, leaders of the profession wrote textbooks to both inform and instruct those desiring to follow in their footsteps. Historical leaders such as Elwood Cubberley, George Strayer, George Counts, and Jesse Sears are identified, and the ways in which their work influenced the profession and the public schools is examined. The various management themes running through the practice of educational administration over a 150-year period are also discussed. Among these themes is the administrator as a philosopher and manager of virtue, scientific manager, executive, transformational leader, instructional leader in a time of high stakes accountability. The schools of thought affecting the preparation of education administrators is also discussed in the framework of general educational administration textbooks. The early textbooks written by the grandfathers were compendiums of best practice, later eclipsed in the 1960s by a theory movement to make practice more scientific. This new movement was based on research in the social and behavioral sciences. The theory movement presently seems to be giving way to a return of textbooks being compendiums of best practice based on professional standards. Lastly, an exploration of the development and impact the specialization of the field has had on both textbooks and practice is included. The splintering of the educational administration professorate into finance, law, policy, personnel, and other

specialties has had a profound impact on textbooks and practice The development of standards dictating certification and licensing has also been influenced by specialization as opposed to general preparation This book is a must for university libraries and every doctoral student writing a dissertation in education of general educational administration textbooks The early textbooks written by the grandfathers were compendiums of best practice later eclipsed in the 1960s by a theory movement to make practice more scientific This new movement was based on research in the social and behavioral sciences The theory movement presently seems to be giving way to a return of textbooks being compendiums of best practice based on professional standards Lastly an exploration of the development and impact the specialization of the field has had on both textbooks and practice is included The splintering of the educational administration professorate into finance law policy personnel and other specialties has had a profound impact on textbooks and practice The development of standards dictating certification and licensing has also been influenced by specialization as opposed to general preparation This book is a must for university libraries and every doctoral student writing a dissertation in education of general educational administration textbooks The early textbooks written by the grandfathers were compendiums of best practice later eclipsed in the 1960s by a theory movement to make practice more scientific This new movement was based on research in the social and behavioral sciences The theory movement presently seems to be giving way to a return of textbooks being compendiums of best practice based on professional standards Lastly an exploration of the development and impact the specialization of the field has had on both textbooks and practice is included The splintering of the educational administration professorate into finance law policy personnel and other specialties has had a profound impact on textbooks and practice The development of standards dictating certification and licensing has also been influenced by specialization as opposed to general preparation This book is a must for university libraries and every doctoral student writing a dissertation in education of general educational administration textbooks The early textbooks written by the grandfathers were compendiums of best practice later eclipsed in the 1960s by a theory movement to make practice more scientific This new movement was based on research in the social and behavioral sciences The theory movement presently seems to be giving way to a return of textbooks being compendiums

Urban Education Karen Symms Gallagher, Rodney Goodyear, Dominic Brewer, Robert Rueda, 2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels In short urban education remains an ill defined concept This comprehensive volume addresses this definitional challenge and provides a 3 part conceptual model in which the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d'être of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others
