Dembo,1981      **Psychology for the Classroom** Janice T. Gibson,Janice Gibson-Cline,1976      *Educational Psychology in the Classroom* ,1996

Dembo,1988-01-01      **Educational Psychology and Transformational Classrooms** Helenrose Fives,Nicole Barnes,2022-04-07 Educational Psychology and Transformational Classrooms uniquely positions teachers transformational experiences as central to understanding and implementing educational psychology research Across three well developed case studies using narrative inquiry methods this volume explores moments of significant change learning and evolution in teaching and learning Each case is followed by analyses from educational psychologists focusing on the three central actors in the learning experience students teacher and context and is then concluded with case authors responses to the analyses provided Showcasing the holistic experience of teaching before unpacking it with theory and research this book centers classroom life and posits educational psychology as an ideal and accessible lens for its examination      **Educational Psychology** Thomas Fetsco,John McClure,2005 I applaud the vision the authors had in synthesizing this information in a way that makes the reader more confident in their application of these theories and principles to their own classrooms The authors have wonderfully succeeded in their attempt to integrate this material in a manner quite different from other texts I ve read or reviewed Jim Persinger Emporia State University Any textbook that overemphasizes theory neglects the real world any textbook that overemphasizes practice neglects the underlying foundation of theory This book strikes a careful balance between theory and practice by explicitly linking the two Gregory Cutler Bay de Noc Community College By far this is the best educational psychology text I have read because it integrates and applies major learning theories to many of the daily issues future teachers will face Krista Robertson Rhode Island College I see this textbook as well written informative clearly and logically organized and a very useful component for a course in Educational Psychology I like it Raymond E Webster East Carolina University The authors have done an excellent job in producing an easy to follow format and style Paula Holmes Miller Crichton College The authors writing style and presentation level are

clear and easy to read along with tables figures concept maps and other visual aids Yuliang Liu Ph D Southern Illinois University The text is well written and some very difficult topics such as Attribution Theory and Constructivism to name just two are easy to understand when compared to similar books I think this is some of the clearest writing I have read in a long time Michael P Verdi California State University San Bernadino I really enjoyed reading this text and I found its comprehensive nature to be a strength Linda W Morse Mississippi State University The authors writing style is clear simple and direct It speaks directly to the reader the examples are concrete and related to education John Isch Martin Luther College

**Readings in Educational Psychology** Edgar Stones, 2012-05-04 The papers in this volume relate to the nature and conditions of classroom learning with particular emphasis on the cognitive aspects They are concerned with the question of concept formation and stress the importance of the teacher s function in ensuring that the child really has assimilated the ideas and not merely the words for the concepts The role of language is fundamental to this theme and the interaction of language thinking and learning is dealt with in the first section of the book This section also provides a context within which subsequent discussions of classroom learning problems can be viewed Some problems concerning the elaboration of a general theory of teaching are then examined with particular reference to possible methods of bridging the gap between research and implementation
