Teacher Education and the Development of Practical Judgement Ruth Heilbronn, 2011-11-03 Current conceptions of teacher training reflect key issues in professional practices Two prevailing views seem to be in conflict the first is that a teacher ought to be able to act as an autonomous professional trusted to have and apply subject knowledge through the exercise of judgement The second conception views the teacher more as a deliverer of a specific curriculum defined centrally in various government sponsored strategies Much has been written on the development of the reflective practitioner as crucial to the first conception and a strong critique of the audit culture in education has emerged Currently we are at a significant moment in teacher education a lighter touch KS3 curriculum and the instigation of new standards for the award of qualified teacher status QTS The QTS standards are important as they are set to form the basis of standards at all levels of teaching This book examines in depth current education and suggests why and how teachers need to develop and exercise practical knowledge and understanding how standards assessment alone cannot support this teacher formation and what good formation might be The nature of practical knowledge is analysed using some concepts from the work of John Dewey in two theoretical chapters 4 and 5 The current standards based model of teacher training in England is predominantly instrumentalist in its application of technical rationality and unsuited to the formation of teachers However the often invoked concept of the reflective practitioner is underdetermined and a conception of reflection is needed to illuminate its contribution to the development of practical judgement The book's argument applies more widely to the debate between deregulators and professionalisers in other spheres of economic and social activity In asking specific questions about teacher education questions about the aims of education within specific conditions are raised

Case Studies in Education: Leadership and Innovation Richard Smith, David Lynch, 2012 This book case studies schools and universities in Australia and elsewhere as they respond to changes in society and the economy that are generated by the Knowledge Economy Chapters by academics scholars and community leaders unravel the circumstances of education and provide an analysis of an education system struggling to find its way in a period of rapid social movement To illustrate their ideas chapter authors offer examples of innovations and the logistics necessary to change the current system of education in school community and university levels

Knowledge, Policy and Practice in Education and the Struggle for Social Justice: Essays Inspired by the Work of Geoff Whitty Andrew Brown, Emma Wisby, 2020-04-01 For 50 years educator and sociologist Geoff Whitty resolutely pursued social justice through education first as a classroom teacher and ultimately as the Director of the Institute of Education in London The essays in this volume written by some of the most influential authors in the sociology of education and critical policy studies take Whitty's work as the starting point from which to examine key contemporary issues in education and the challenges to social justice that they present Set within three themes of knowledge policy and practice in education the chapters tackle the issues of defining and accessing legitimate knowledge the changing nature of education policy under neoliberalism and

globalization and the reshaping of teacher workplaces and professionalism as well as attempts to realize more emancipatory practice Whitty's scholarship on what constitutes quality and impact in educational research is also explored Together the essays open a window on a life in the sociology of education the scholarly community of which it was part and the facets of education policy practice and research that they continue to reveal and challenge in pursuit of social justice They celebrate Whitty as one of the foremost sociologists of education of his generation but also as a friend and colleague And they highlight the continued relevance of his contribution to those seeking to promote fairer and more inclusive education systems

Evidence-Based Education Policy David Bridges, Paul Smeyers, Richard Smith, 2009-06-15 This book raises important questions about the extent to which policy can be derived from research and about the kind of evidence which should inform policy Challenges contemporary orthodoxies and offers constructive alternatives Critiques the narrower conceptions of evidence which might inform policy advanced by the what works movement Investigates the logical gaps between what can be shown by research and the wider political requirements of policy Examines the different educational research traditions e.g. large population studies individual case studies personal narratives action research philosophy and the romantic turn Calls for a more subtle understanding of the ways in which different forms of enquiry may inform policy and practice Discusses the recognition and utilisation of the insights offered by the rich variety of educational research traditions available to us

Education and Theory Gary Thomas, 2007-04-16 This is an exceptional book and one that should be essential reading for anyone seriously thinking about educational practice for two reasons First it is one of the few books on thinking about education which is written with the wit and humour which makes compulsive reading Second the approach to theory or thinking systematically philosophically and evidentially is through the author s own attempt to understand what appears to many as a mystery In this personal journey the author provides a comprehensive and critical review of different theoretical positions Professor Richard Pring University of Oxford What is the role of theory in education Does the pursuit of theory in education always lead to improvements in practice What is the alternative to theory Theory holds a central place in educational inquiry tutors urge students to embed their work in it funding bodies demand that research proposals be located in But in an important new analysis Gary Thomas suggests that the pursuit of theory in education is the pursuit of a chimera This compelling book examines what theory means for both student and researcher and questions whether the confidence in educational theory is justified It begins by looking at what theory is and what use it has in education and examines some theoretically significant influences on educational thought and practice in the twentieth century Challenging the idea that the practice of education should be based on theory the author offers alternative simpler frameworks for conducting inquiry without the constraints of existing theory contending that it is time for a discussion about how values evidence and ideas can more straightforwardly guide educational practice

Education and Theory is stimulating reading for academics researchers teachers and students of education

Education Science, 2009-01-01 Educational research is not what it was fifteen years ago In this discipline the changes have been dramatic far reaching and rapid Out of the criticisms of the 1990s and the calls for greater accountability of the early 2000s one idea has come to the fore education science There are two main components to education science The first is the principle that research in education must model itself more closely on disciplines seen as highly credible and successful mainly the natural sciences and medicine The second part is that educators must build their practice upon the insights developed through this scientific research process Overall education science has the potential to change how we think about education how we build knowledge about it and how we know when it is successful This volume brings together some of the most active proponents of education science and some of the most committed critics Within it the idea of education science is explored in depth randomized controlled trials considered the gold standard of education science are discussed in detail and the philosophical

difficulties of knowledge in education are explored Established thinkers are brought alongside newly emerging analysts and detailed accounts of the institutions driving education science are included Each contribution is thoughtful and balanced engaging with the issues of the field and how they might be addressed As a body of work this collection of essays provides a well rounded critical discussion of the potential and the problems of the education science movement Evidence-based Social Work Mel Gray,Debbie Plath,Stephen Webb,2009-05-08 This book provides a critical analysis of evidence based practice in social work It introduces readers to the fast changing research policy legislative and practice context and illuminates how adopting the methodology and language of evidence based practice fundamentally alters the conditions under which social work takes place *Valuing Assessment in Science Education: Pedagogy, Curriculum, Policy* Deborah Corrigan,Richard Gunstone,Alister Jones,2013-06-05 Assessment is a fundamental issue in research in science education in curriculum development and implementation in science education as well as in science teaching and learning This book takes a broad and deep view of research involving assessment in science education across contexts and cultures from whole countries to individual classrooms and across forms and purposes from assessment in the service of student learning to policy implications of system wide assessment It examines the relationships between assessment measurement and evaluation explores assessment philosophies and practices in relation to curriculum and scientific literacy learning and details the relationships between assessment and science education policy The third in a series *Valuing Assessment in Science Education* has chapters from a range of international scholars from across the globe and staff from Monash University King s College London and University of Waikato The two previous books in the series examined research relevant to the re emergence of values in science education and teaching across the spectrum of science education as well as across cultural contexts through the professional knowledge of science teaching This third book now moves to examine different aspects of generating understanding about what science is learnt how it is learnt and how it is valued *Valuing Assessment in Science Education* will appeal to all those with some engagement with and or use of research in science education including research students academics curriculum development agencies assessment authorities and policy makers It will also be of interest to all classroom science teachers who seek to keep abreast of the latest research and development and thinking in their area of professional concern The SAGE Handbook of Social Research Methods Pertti Alasuutari,Leonard Bickman,Julia Brannen,2008-02-25 The SAGE Handbook of Social Research Methods is a must for every social science researcher It charts the new and evolving terrain of social research methodology covering qualitative quantitative and mixed methods in one volume The Handbook includes chapters on each phase of the research process research design methods of data collection and the processes of analyzing and interpreting data The volume maintains that there is much more to research than learning skills and techniques methodology involves the fit between theory research questions research design and analysis The book also includes several chapters that describe historical and current directions in social research

debating crucial subjects such as qualitative versus quantitative paradigms how to judge the credibility of types of research and the increasingly topical issue of research ethics The Handbook serves as an invaluable resource for approaching research with an open mind This volume maps the field of social research methods using an approach that will prove valuable for both students and researchers *The Changing Epistemic Governance of European Education* Romuald

Normand, 2016-06-17 This book examines the transformations of epistemic governance in education the way in which some actors are shaping new knowledge and how that new knowledge impacts other actors in charge of implementing this knowledge in the context of the decision making process and practice The book describes knowledge based and evidence based technologies that produce new modes of representation cognitive categories and value based judgements which determine and guide actions and interactions between researchers experts and policy makers It explores several major social theories and concepts analysing the transformation of the relationship between educational and social sciences and politics In the light of epistemic governance being linked to transformations of academic capitalism the book describes the ways in which academics engaged in heterogeneous networks are capable of developing new interactions as well as facing new trials imposed on them by the changing conditions of producing knowledge in their scientific community and within their institutions Knowledge is power It is materialized in metrics policy instruments and embedded in networks The governance of European higher education insightfully argues Romuald Normand is not structured by hierarchical public policies by governmental exercise of authority or heroic decision making Normand makes a sophisticated intellectual argument building upon the work of Foucault Latour Sociology of science and the pragmatic sociology of Boltanski and Th venot sociology of justification in order to precisely analyse Europe s higher education through the circulation of ideas and instruments Based upon precise research the book is a major contribution to the understanding of high education in a capitalist Europe beyond the simple idea of neo liberalism Normand provocatively even suggests the making of a European Homo Academicus This is an innovative and important book for public policy European Studies and the sociology of Education Patrick le Gal s FBA CNRS Research Professor Centre d Etudes Europeennes Sciences Po Paris France [Mixed Methods Research for Improved Scientific Study](#) Baran, Mette Lise, Jones, Janice Elisabeth, 2016-03-17 The clear division between quantitative and qualitative research methods becomes problematic when students begin conducting extensive research for the first time often as part of a master s thesis or dissertation In order to handle such complexities in the selection of research methods a Mixed Methods Research MMR approach is one proposed solution Mixed Methods Research for Improved Scientific Study seeks to demonstrate how mixed methods research designs can address a wide array of scientific questions across disciplines Focusing on essential concepts and methods for a hybrid approach to quantitative and qualitative research methods for real world implementation this publication is ideally designed for students and researchers interested in refining their research skills as well as educators seeking to integrate research methods coursework into the graduate curriculum *The*

BERA-Sage Handbook of Research-Informed Education Practice and Policy Dominic Wyse, Vivienne Baumfield, Nicole Mockler, Martin Reardon, 2025-06-19 One of the most pressing topics worldwide is how we can improve education to enhance people's life chances. The BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol offers an in depth exploration of the ways in which education research intersects with and can lead to improvements in education. Through detailed examinations of educational policies, practices, values and research methodologies, the handbook navigates the complexities inherent in educational systems and in so doing presents a unique new picture of education worldwide. Volume One of the Handbook set focuses on Understanding Research Informed Education and Volume Two focuses on how to implement it. Across six parts and fifty two chapters, the authors and editors explore a myriad of critical topics including using research to promote equity within education systems, rethinking pedagogy and knowledge mobilisation through practitioner led inquiry. New developments in aspects such as systematic approaches to research synthesis are presented by world leading experts. Authors of the chapters draw from many different sources to provide a comprehensive understanding of education including perspectives from the arts, humanities, natural sciences and social sciences. This understanding combines cutting edge education research and scholarship to provide insights into how education is enacted in countries and institutions through policy and practice. Featuring a truly diverse team of scholars to account for global perspectives, the BERA Sage Handbook of Research Informed Education Practice and Policy 2 Vol is an invaluable resource for scholars, researchers, students and practitioners who are interested in the new frontiers in education research, policy and practice. Volume One: Understanding Research Informed Education. Part One: Defining and Theorising Research Informed Education. Part Two: Methodological Debates in the Field. Part Three: International Comparison and Educational Policy. Volume Two: Implementing Research Informed Education. Part Four: Effective policy and practice in national contexts. Part Five: Curriculum, pedagogy and assessment. Part Six: Practitioners and learners as researchers.

Personal Construct Psychology at 60

Peter Cummins, Harry Procter, David Winter, 2017-08-21 The 60th anniversary of the publication of George Kelly's *The Psychology of Personal Constructs* was marked in 2015 by the 21st International Congress on Personal Construct Psychology. His two volume work set out personal construct theory as a radical new approach to psychology. Although Kelly was a clinical psychologist, personal construct psychology has had an extraordinarily broad range of influence and application extending beyond the clinical setting to include areas as diverse as education, organizational and management development, social psychology, the arts, law and politics. It presaged constructivist developments in many spheres of knowledge and its innovative research methods have been used in a vast number of studies focussed on the exploration of personal and interpersonal meaning. The 21st International Congress was held in the UK at the University of Hertfordshire, forty years after the first such congress. This volume presents contributions by many of the Congress's delegates whose chapters reflect the diversity of contemporary applications of personal construct psychology and the continuing relevance and vitality of Kelly's ideas and

methods **Evidence and Public Good in Educational Policy, Research and Practice** Mustafa Yunus Eryaman, Barbara Schneider, 2017-06-22 This volume draws together interdisciplinary approaches from political philosophy social work medicine and sociology to analyze the theoretical foundations and practical examples of evidence based and evidence informed education for the public good It presents a range of conceptions of the evidence based and evidence informed education and a justification for why the particular examples or issues chosen fit within that conception for the sake of public good It explores the current literature on evidence based and evidence informed educational policy research and practice and introduces a new term evidence free meaning actions of some policymakers who disregard or misuse evidence for their own agenda The demands about the quality and relevance of educational research to inform the policy and practice have been growing over the past decade in response to the Evidence Based Education movement However the literature is yet to tackle the question of the interrelationships between evidence research policy and practice in education for the public good in an international context This book fills that gap
