Thomas Hill Green and the Development of Liberal-Democratic Thought I. M. Greengarten, 1981-12-15 Thomas Hill Green 1836-1882 was a leading British philosopher and political figure and founder of the school of British Idealism which displaced the philosophy of Bentham and John Stuart Mill as the dominant tradition in British universities from 1880 into the twentieth century Greengarten presents a detailed analysis of Green's thought including his theories of political obligation, property, self-realization, and human nature and developed the necessary tools for an analysis of Green's work and the tradition of liberal democratic thought. He finds in Green a view of human nature and human potentialities which is in striking contrast to the views of earlier liberal thinkers and remarkably similar to that of Marx despite Green's clear and often passionate defence of capitalism and market freedom. His concept of human nature is of a divided, self-contradictory nature; his theory of the true good is of a good that is to be shared, a common good that is not attainable through the selfish pursuit of private goods; his vision of the good society foresees the elimination of poverty and the establishment of a classless society wherein all members would have equal opportunity to develop and realize their potential. This book offers a fresh perspective on Green and raises issues of importance in the field of social and political theory.

Mrs Humphry Ward and Greenian Philosophy Helen Loader, 2019-03-26 This book examines Mary Ward's distinctive insight into late Victorian and Edwardian society as a famous writer and reformer who was inspired by the philosopher and British idealist Thomas Hill Green. As a talented woman who had studied among Oxford University intellectuals in the 1870s and the granddaughter of Dr Arnold of Rugby, Mrs Humphry Ward, as she was best known, was in a unique position to participate in the debates, issues, and events that shaped her generation: religious doubt and Christianity, educational reforms, socialism, women's suffrage, and the First World War. Helen Loader examines a range of biographical sources alongside Mary Ward's writings and social reform activities to demonstrate how she expressed and engaged with Greenian idealism both in theory and practice and made a significant contribution to British Society.

Excerpt: the formative principles of knowledge too much of God as a moderately benevolent taskmaster too little of Him as a fount of righteousness and truth There was but little of the philosophic spirit which views the world as from a mountain top no professed philosopher taught in the spirit of Plato as the spectator of all time and existence It is now possible in the remainder of the chapter to enumerate the more important of Green's writings in their chronological order In 1862 he won the Chancellor's prize for an essay entitled The Value and Influence of the Works of Fiction in Modern Times This essay indicates both the author's breadth of interest and his real literary scholarship and appreciation In 1866 he gave to the North British Review an article for publication on the

Philosophy of Aristotle During 1874 and 1875 Green published his first criticism of English empiricism in his introduction to a new edition of the works of Hume He at this time speaks of his work as an inquiry into the course and philosophical movement which is represented by the names of Locke Berkeley and Hume Green s Introduction of three hundred and eighty pages to Hume s work of five hundred and fifty pages presents destructive criticism of English rationalism and empiricism The spirit in which the criticism is made is expressed on page 5 of the Introduction in these words A process which looks like pulling a great philosopher to pieces may be the true way of showing his greatness This Introduction indicates Green s basic principles in philosophy the central conception of which Nettleship says is that the universe is a single eternal activity or energy of which it is the essence to be self conscious that is to be itself and *The Political Philosophy of the British Idealists* Peter P. Nicholson,1990-01-26 This book offers a reassessment of the political philosophy of the British Idealists a group of once influential and now neglected nineteenth century Hegelian philosophers whose work has been much misunderstood Peter Nicholson focuses on F H Bradley s idea of morality and moral philosophy T H Green s theory of the Common Good of the social nature of rights of freedom and of state interference and Bernard Bosanquet s notorious theory of the General Will By examining the arguments offered by the Idealists and by their critics the author is able to penetrate the deep layers of hostile comment laid down by several generations of later writers and to show that these ideas once properly understood are not only defensible but interesting and important *A Cyclopedia of Education* Paul Monroe,1918
