European Governance Preparatory Work For The White Paper:

European Governance European Commission, 2010 **European Governance** European Commission, 2002 The European Commission published a White Paper on European governance ISBN 9289410612 in November 2001 containing recommendations to enhance democracy in Europe promote public involvement and increase the legitimacy of EU institutions In order to provide background information on the drafting of the White Paper this publication contains 12 preparatory reports produced by a number of working groups set up to discuss the following aspects of the White Paper broadening and enriching the public debate on European matters the process of producing and implementing Community rules exercising executive responsibilities networking in Europe the EU s contribution to improving world governance and policies for an enlarged EU **The European Social Dialogue Under Articles 138 and 139 of the EC Treaty** Christian Welz, 2008-01-01 Describes analyses and assesses the European social dialogue from a combined theoretical and normative perspective and applies theoretical strands stemming from industrial relations EC law and political theory to an understanding and assessment of the genesis actors processes and outcomes of the European social dialogue through 2007

Impact Assessment in the EU Andrea Renda, 2006 The importance of ex ante and ex post impact assessment in streamlining the regulatory environment and improving the legislative process has been stressed by scholars and testified to by international best practices The potential benefits of regulatory impact assessment are also being rediscovered by EU officials who lose no chance to recall that the Commission s ambitious growth and jobs strategy heavily depends on the pervasiveness of impact assessment in the regulatory process at EU and member state level This study conceived for scholars and policymakers provides an overview of the state of the art on impact assessment It focuses on the latest developments in the United States UK and EU and presents a scorecard analysis of the Commission s extended impact assessments The author concludes with a road map for improving the transparency efficiency and effectiveness of the EU Integrated Impact Assessment model **Constructing a Global Technology Assessment : Insights from Australia, China, Europe, Germany, India and Russia** Hahn, Julia, Ladikas, Miltos, 2019-03-06 Worldwide simultaneous effects of technologies international challenges such as climate change as well as shifting relationships between science and society call for approaches that can address these issues on a global level This book examines the potential of Technology Assessment TA as an until now mainly national and Western concept to take on this global level and provide answers to these pressing questions

EU Cohesion Policy and Spatial Governance Rauhut, Daniel, Sielker, Franziska, Humer, Alois, 2021-07-31 Discussing the ongoing and future challenges of EU Cohesion Policy this book critically addresses the economic social and territorial challenges at the heart of the EU s policy It identifies the multifaceted and dynamic nature of the policy as well as the cohesion s goal interlinkage with other policies and considers unresolved questions of strategic importance in territorial governance urban and regional inequalities and social aspects and wellbeing **Law and Practices of Delegated**

Rulemaking by the European Commission Zamira Xhaferri, 2023-01-16 This book examines the law and practice of the delegation of rulemaking powers to the European Commission It combines legal doctrine with empirical research methods to bridge the gap between law on the books and law in action to fully appreciate the meaning and the impact of the changes post Lisbon The results of the empirical case study provide food for thought on how the current legal framework regime for delegated rulemaking by the European Commission could be improved The findings seek to contribute to the academic and policy debates on this research topic that is likely to continue in forthcoming years Citizens in Europe Giovanni Moro, 2011-12-04 In the Community building process citizens are the most invoked and feared but at the same time the least known subject This lack of knowledge nourishes the citizens detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration This gap is true especially for active citizenship organizations operating in the European policy making not only in Brussels but also and above all at national and local levels and this book is aimed at filling this knowledge gap The book is divided into two parts The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making The second part discusses a number of empirical research projects on civic activism in Europe This book aims on the one hand to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved and on the other hand to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level The distinctiveness of the book is that it tries to overcome both the methodological nationalism that affects the research and public debate on the EU the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena and the habit of dealing with civic associations in Europe by referring only to the Brussels Civil Society making it of interest to both policy makers as well as students and scholars in European Studies Political Science Sociology and International Relations *The Contestation of Expertise in the European Union* Vigjilence Abazi, Johan Adriaensen, Thomas Christiansen, 2020-11-16 This book examines the position and role of expertise in European policy making and governance At a time when the very notion of expertise and expert advice is increasingly losing authority the book addresses these challenges by empirically examining specific administrative processes and institutional designs in the European Union The first part of the volume theorizes expertise and its contestation by examining accounts of the legitimate institutional design of knowledge production processes and exploring the theoretical links of Europeanisation and expertise The second part of the book delves into empirical institutionalist accounts of expertise and maps the role of experts in a variety of EU institutions but also explains the implications when EU bodies themselves are in an expert position such as agencies The book offers insights into how individual experts deal with the challenge of producing reports that will be heard by policy makers while at the same time preserving their independence Broadening its

scope the book then expands the analysis to the role of advisory committees in light of the shift from a reliance primarily on in house expertise to including more external experts in advisory groups in the European Commission and European Parliament as well as at the European External Action In the third part the book opens the lens to developments beyond the EU by taking into account two highly pertinent fields climate change and trade These fields are highly complex fast developing and politicised issues and the book engages with them in order to provide an outside in perspective on expertise Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

The European Commission and Interest Groups Irina Tanasescu, 2009 A well researched and unique account this volume provides an in depth assessment of the European Commission consultation exercises from a novel perspective namely from a set of criteria inspired by deliberative democracy theories Examining what happens in concrete instances of consultation this investigation also chronicles a series of related issues such as environmental governance policy implementation and the better regulation framework Via case studies and analysis this investigation allows for a greater understanding of the interaction between the European Commission and interest groups

The Capacity of Central and East European Interest Groups to Participate in EU Governance Daniela Obradovic, Heiko Pleines, 2012-02-24 The integration of ten Central and East European countries CEEC into the EU as part of the 2004 and 2007 enlargements poses new challenges to EU governance as the number of countries involved has thereby increased dramatically However the actors coming from the new member states also face challenges as they attempt to integrate themselves into EU decision making processes This book analyses the attempts of civil society organisations from the Czech Republic and Poland to engage in EU governance in four policy fields The guiding question is whether civil society organisations from the Central and East European member states have or can gain the capacity for meaningful participation in EU governance After an introductory part which outlines the analytical framework and offers a review of the literature the actors and rules of EU governance are profiled The third and fourth parts of the book then present case studies The case studies address the civil society organisations most actively involved in EU governance namely typical NGOs trade unions employers organisations and business associations

The Routledge Handbook of Regional Design Michael Neuman, Wil Zonneveld, 2021-04-15 The Routledge Handbook of Regional Design explores contemporary research policy and practice that highlight critical aspects of strategy making planning and designing for contemporary regions including city regions bioregions delta regions and their hybrids As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment capital migration and innovation they yield cities that are expanding over ever larger territories Moreover these polycentric city regions themselves are agglomerating with one another to create new territorial mega regions The processes that beget these novel regional forms produce numerous and significant effects positive and negative that call for new modes of design and management so that the urban places and the lives and well being of their inhabitants and businesses thrive

sustainably into the future With international case studies from leading scholars and practitioners this book is an important resource not just for students researchers and practitioners of urban planning but also policy makers developers architects engineers and anyone interested in the broader issues of urbanism **Environmental Protection in Multi-Layered Systems** Mariachiara Alberton,Francesco Palermo,2012-10-04 The book aims at understanding the current distribution and use of powers over the environment among various layers of government and their consequences on environmental protection comparing federal regional and unitary State models and drawing theoretical and practical consequences **The Aarhus Convention at Ten** Marc Pallemmaerts,2011 On 30 October 2011 it will be exactly ten years ago that the Convention on Access to information Public Participation in Decision making and Access to Justice in Environmental Matters signed by representative of 35 States and the European Community at a pan European ministerial conference in the Danish city of Aarhus in 1998 entered into force This multilateral treaty negotiated under the auspices of the UN Economic Commission for Europe represents the most comprehensive and ambitious effort to establish international legal standards in the field of citizens environmental rights to date Though some of these standards were inspired by earlier EU environmental legislation many provisions of the Aarhus Convention went beyond the rights already guaranteed by the EU and compelled the European Commission to propose new legislature acts most of which were adopted between 2003 and 2006 to bring EU environmental law up to the Convention s standards Since its adoption over a **The Road Europe Travelled Along** Daniela Preda,Daniele Pasquinucci,2010 Proceedings of conference The Road Europe Travelled Along The Evolution of the EEC EU Institutions and Policies which was held at the University of Siena on the 23rd and 24th of May 2008 **Intercultural Horizons Volume III** Lavinia Bracci,Nevin C. Brown,Eliza J. Nash,2015-10-05 This volume brings together a representative set of the papers given at the third annual Intercultural Horizons conference held in Siena Italy in October 2013 The conference attracted presenters and attendees from a variety of nations throughout five continents The papers included in this volume are drawn from a series of conference sessions in which academicians and practitioners in the field offered theoretical analyses case studies and other perspectives on intercultural studies civic engagement and related topics The volume is divided into four sections Theoretical Considerations of Intercultural Competence and Interculturalism Intercultural Development and Assessment Practical Examples and Research Civic Engagement in International and Culturally Diverse Contexts and Intercultural Education and Training The reader will find that most of the papers address a variety of intercultural topics beyond their specific chapter designations In particular the theme of second language acquisition education and use was an overarching theme that emerged from a large number of papers and presentations specifically with regards to the complexities now faced by intercultural educators and researchers as a result of the increasing dominance of English as a lingua franca both in academe and many nations **Political Representation and European Union Governance** Peter Mair,Jacques Thomassen,2013-09-13 This book confronts and discusses different

conceptions of political representation with respect to their application to the system of multi level governance in the European Union Political representation is an essentially contested concept Its meaning has evolved with the development of representative democracy at the level of the nation state and normative theories of political representation often evolved as a reflection on developing practices rather than the other way around Since the EU is not a conventional nation state and since the effectiveness and legitimacy of classic notions of political representation at the level of the national state has also become a matter of dispute the EU has become a playground for the development of alternative or additional conceptions of democracy The contributions to this volume evaluate these alternative conceptions with regard to both their effectiveness and their legitimacy and combine both conceptual and empirical analyses This book was based on a special issue of Journal of European Public Policy Elgar Encyclopedia in Urban and Regional Planning and Design Kristof Van Assche, Raoul Beunen, Martijn Duineveld, 2023-12-11 This ground breaking Encyclopedia provides a nuanced overview of the key concepts of urban and regional planning and design Embracing a broad understanding of planning and design within and beyond the professions it examines what planners and designers can do in and for a community **WTO Accessions and Trade Multilateralism** Uri Dadush, Chiedu Osakwe, 2015-09-10 An examination of how WTO accession negotiations have expanded the reach of the multilateral trading system both geographically and conceptually Soft Law in European Community Law Linda Senden, 2004-09-30 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by

the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law
