EU Health Law & Policy Anniek de Ruijter, 2019-01-31 Whether there is a public health need for the containment and response to swine flu or an individual need to access health care across the border for a hip operation to alleviate pain the EU has an increasingly powerful role in the field of human health Health law and policy is deeply tied into fundamental rights bioethics and values with important implications for individuals However it is also an expansive area of economic regulation of social and state arrangements The growing role of the EU in human health law and policy is contested particularly as it has implications for the fundamental rights and values that are enshrined in national health law and policy This book outlines through case studies how the expansion of EU power is taking place through law and policy in both public health and health care How is law and policy in the field of human health adopted who are the institutional actors involved and what is the impact of these developments for fundamental rights

U.S. Healthcare and the Future Supply of Physicians Panos Minogiannis, 2019-01-25 Many different sectors of modern society influence the nation's healthcare system Government health insurance companies managed care organizations academic health centers the pharmaceutical industry and other groups all affect healthcare In the areas of medical access cost and quality the physician remains the key to the efficiency and effectiveness of healthcare services Eli Ginzberg and Panos Minogiannis in Ginzberg's final book examine the supply of health personnel in the United States They consider the ways it

has been influenced by federal and state legislation healthcare financing the transformation of the hospital managed care and health trends in the last part of the twentieth century Through this historical approach the book identifies key moments in U S health policy history that have led to problems in the geographical distribution of medical personnel gender and race representation in the health personnel pool and subsequent attempts to resolve these problems This volume pays special attention to current trends in healthcare and tries to forecast the direction of the debate over health personnel supply in the coming years Chronic care conditions and the ageing of the population on the one hand and the penetration of managed care and the subsequent transformation of American hospitals on the other converge to present policymakers with tremendous challenges in financing healthcare Ginzberg and Minogiannis argue that a more balanced production and distribution of U S health personnel will go far in easing the financial burden of healthcare and at the same time improve the quality of services provided to the American people

Remaking Policy Carolyn Hughes Tuohy, 2018-06-03 One of the most persistent puzzles in comparative public policy concerns the conditions under which discontinuous policy change occurs In Remaking Policy Carolyn Hughes Tuohy advances an ambitious new approach to understanding the relationship between political context and policy change Focusing on health care policy Tuohy argues for a more nuanced conception of the

dynamics of policy change one that makes two key distinctions regarding the opportunities for change and the magnitude of such changes Four possible strategies emerge large scale and fast paced big bang large scale and slow paced blueprint small scale and rapid mosaic and small scale and gradual incremental As Tuohy demonstrates these strategies are determined not by political and institutional conditions themselves but by the ways in which political actors individually and collectively read those conditions to assess their prospects for success in the present and over time Drawing on interviews as well as primary and secondary accounts of ten health policy cases over seven decades 1945 2015 in the US UK the Netherlands and Canada Remaking Policy represents a major advance in understanding the scale and pace of change in health policy and beyond
