Introduction to European Tax Law on Direct Taxation Michael Lang,Pasquale Pistone,Josef Schuch,Claus Staringer,Alexander Rust,Georg Kofler,Karoline Spies,2024-12-19 This concise handbook has become a traditional instrument for gaining basic knowledge of European tax law with emphasis on direct taxes It is directed at students experienced international tax specialists with little knowledge of European law European law specialists and non Europeans who deal with Europe for business or academic reasons and need to understand the foundations of European tax law Moreover this book can be useful to academics without a legal background in approaching technical issues raised by European Union tax law as well as give inspiration to the most experienced European direct tax law experts The eighth edition adds new updates on the most essential changes and new case law of the CJEU in the field of European direct taxation Furthermore due to its particular importance the EU Global Minimum Tax Directive is now covered in a separate chapter *Introduction to European Tax Law: Direct Taxation* Karoline Spies,2023-01-02 This handbook is a concise guide for all those who aim at obtaining a basic knowledge of European tax law Designed for students it should also be useful for

experienced international tax specialists with little knowledge of European law European law specialists who are reluctant to approach the technicalities of direct taxation and non Europeans who deal with Europe for business or academic reasons and need to understand the foundations of European tax law This book should also help academics without a legal background to approach the technical issues raised by European Union tax law This edition contains selected relevant information available as of 30 June 2022 It retains all of the features and tools contained in the previous editions including the final charts which our readers very much appreciate In this edition we have also included a list of relevant documents and a selection of reference textbooks on European tax law in five languages which we found of potential interest to our readers Advanced Issues in International and European Tax Law Christiana HJI Panayi, 2015-12-03 This book examines recent developments and high profile debates that have arisen in the field of international tax law and European tax law Topics such as international tax avoidance corporate social responsibility good governance in tax matters harmful tax competition state aid tax treaty abuse and the financial transaction tax are considered The OECD G20 project on Base Erosion and Profit Shifting BEPS features prominently in the book The interaction with the European Union's Action Plan to strengthen the fight against tax fraud and tax evasion is also considered Particular attention is paid to specific BEPS deliverables exploring them through the prism of European Union law Can the two approaches be aligned or are there inherent conflicts between them The book also explores whether when it comes to aggressive tax planning there are internal conflicts between the established case law of the Court of Justice and the emerging policy of the European institutions By so doing it offers a review of issues which are of constitutional importance to the European Union Finally the book reflects on the future of international and European tax law in the post BEPS world National Legal Presumptions and European Tax Law Claudia Sanò, 2016-04-24 Determining the burden of proof in tax law cases is usually what contributes most to the case's outcome Legal presumptions those inferences that are laid down in the law rather than being the result of the court's reasoning play a critical role in such determinations This very useful book uncovers the details of such presumptions which are shared among European tax law systems thus revealing a remarkably clear path through the course of a tax law case in any Member State in the context of EU law Referring to both legal theory and relevant case law the author assesses whether and to what extent national legal presumptions may be deemed to be consistent with EU law and when this is not the case under which conditions they may be reconciled The analysis unfolds along such avenues as the following the meaning of the concept of legal presumption as developed by legal theory and authoritative academic literature special considerations regarding presumptions in customs law VAT and direct taxation harmonized and unharmonized how tax authorities use presumptions to simplify the assessment of tax and tackle tax avoidance or evasion particularly in cross border situations justifications asserted by the Member States in relation to restrictions on fundamental freedoms and standards of compatibility for national legal presumptions with EU law resulting from CJEU case law With reference to national experience using Italy and Belgium as specific examples the

analysis culminates in an elaboration of criteria for legal presumptions capable of meeting the test of compatibility with EU law. As an in depth investigation of possible inconsistencies and conditions for the coexistence of EU and Member State tax law, this book will be welcomed by both taxation authority officials and taxpayer counsel. The understanding it imparts on the actual impact of EU law on the recourse to legal presumptions by national tax legislatures and the protection of European taxpayers is unsurpassed.

Hybrid Financial Instruments, Double Non-Taxation and Linking Rules Félix Daniel Martínez Laguna, 2019-06-12 Hybrid Financial Instruments Double Non taxation and Linking Rules Félix Daniel Martínez Laguna Hybrid financial instruments HFIs are widespread ordinary financial instruments that combine debt and equity features in their terms and design and may lead to double non taxation across borders This important book provides a deeply informed and critical analysis and guide to the linking rules developed to combat double non taxation stemming from HFIs within the framework of the Base Erosion and Profit Shifting project of the Organisation for Economic Co operation and Development OECD and the anti avoidance initiatives of the European Union EU These complex rules have now become essential in international taxation The book deals incisively with crucial theoretical and practical issues as the following Economic and legal reasons for financing business activity through debt instruments equity instruments and or HFIs Qualification of financial instruments from different perspectives such as economics corporate finance corporate law financial accounting law regulatory law and tax law and their interrelation The concept of double non taxation as a mere outcome of parallel exercises of sovereignty by different states and the role it plays within the international debate The concepts of tax planning tax avoidance and the misleading concept of aggressive tax planning within a tax competition international scenario and their relation with HFIs Comprehensive policy legal and technical detail and explanation of the linking rules proposed by the OECD i e BEPS Project Action 2 and the EU e g Anti Tax Avoidance Directive The in compatibility of linking rules with existing tax treaty rules and EU primary law The author refers throughout to relevant model convention provisions EU case law and a vast number of references of official documentation and literature With its detailed attention to the concept and legal nature of HFIs and double non taxation the critical and comprehensive analysis of the linking rules developed by the OECD and the EU this provocative book allows to reconsider the legality of these linking rules and will quickly become a much used problem solving resource for policymakers tax practitioners tax authorities and tax academics This book allows to rethink whether linking rules relate to a solution or create actual legal issues

Abuse of Law in European Taxation Isabelle Richelle, Wolfgang Schön, Edoardo Traversa, 2025-05-19 This book explores the meaning and the impact of the concept of abuse of law in European taxation Fighting abusive arrangements has gained prominence along three different dimensions as a methodological tool to constrain access to tax benefits under EU law as a ground of justification for disadvantageous treatment of cross border activities and investment and as a policy goal underlying recent EU tax legislation The contributors to this book leading academics and practitioners from different European countries discuss the most burning issues concerning the prohibition of abuse in tax matters Starting from a general clarification of notions like tax avoidance and aggressive tax planning and informed by a deep diving comparative

analysis of the concept of abuse the authors examine special anti avoidance rules both in EU legislation on indirect taxes and under the existing EU corporate tax directives Furthermore the authors shed a critical light on the effect of European fundamental freedoms on national anti abuse provisions Last but not least the impact of the recently introduced Global Minimum Tax GloBE on the operation of anti abuse rules receives scrutiny In the end the book tries to answer whether these different fields of application are informed by a unified notion of fiscal abuse Given the world wide momentum behind the fight against fiscal fraud and tax avoidance the analytical approach of this book bringing together different strands of legislature and jurisprudence will be of substantial value for the work of both practitioners and scholars in the field of EU taxation

Enhanced Cooperation and European Tax Law Caroline Heber, 2021-06-17 The enhanced cooperation mechanism allows at least nine Member States to introduce secondary EU law which is only binding among these Member States From an internal market perspective enhanced cooperation laws are unique as they lie somewhere between unilateral Member State laws and uniform European Union law The law creates harmonisation and coordination between the participating Member States but may introduce trade obstacles in relation to non participating Member States This book reveals that the enhanced cooperation mechanism allows Member States to protect their harmonised values and coordination endeavours against market efficiency Values which may not be able to justify single Member State s trade obstacles may outweigh pure internal market needs if an entire group of Member States finds these value worthy of protection However protection of the harmonised values can never go as far as shielding participating Member States from the negative effects of enhanced cooperation laws The hybrid nature of enhanced cooperation laws their nexus between the law of a single Member State and secondary EU law also demands that these laws comply with state aid law This book shows how the European state aid law provisions should be applied to enhanced cooperation laws Furthermore the book also develops a sophisticated approach to the limits non participating Member States face in ensuring that their actions do not impede the implementation of enhanced cooperation between the participating Member States
