European Transport Policy And Sustainable Mobility:

European Transport Policy and Sustainable Mobility Jonas Akerman, David Banister, Karl Dreborg, Peter Nijkamp, Ruggero Schleicher-Tappeser, Dominic Stead, Peter Steen, 2000-10-26 It is now widely accepted that transport is becoming increasingly unsustainable and that strong policy intervention is required to reduce both the growth in transport demand and the environmental costs of transport This book challenges conventional approaches to transport by moving away from trend based analysis towards the use of scenarios to identify alternative sustainable transport futures It both summaries the development of EU transport policy and presents a critique The policy context is widened to include the global changes taking place in economics society and technology It develops new methodologies for policy making for the next 25 years

European Transport Policy and Sustainable Mobility David Banister, Jonas Banister Akerman, Peter Nijkamp, Dominic Stead, Karl Dreborg, Peter Steen, Ruggero Schleicher-Tappeser, 2000 This text arises from the European Commission research project Policy Scenarios for Sustainable Mobility Focusing on transport and related policy analysis and decision making it sets European transport policy in context and looks at issues of sustainable development and forces of change A Decision Support System for Intermodal Transport Policy Cathy Macharis, E. Pekin, A. Caris, B. Jourquin, 2008 In this informative and well researched account the new developments in intermodal transport are discussed and special attention is given to evaluation models and policy measures in this field Describing the three core models that have been either developed or enhanced to create an overall assessment framework for intermodal transport policies in Belgium a multimodal freight model NODUS a discrete event simulation model of the inland waterway network and its terminals SIMBA and a Location Analysis Model for Belgian Intermodal Terminals LAMBIT this record analyzes the effectiveness and sustainability of policy measures in terms of modal shift external costs and capacity restrictions associated with the freight infrastructure network

Transport Policy and Research Liana Giorgi, Ronald J. Phoryles, 2018-01-12 This title was first published in 2003 These are some of the questions and themes addressed in this study of transport policy and research What is the meaning of sustainable mobility Is there a European common transport policy To what extent is policy relevant for transport developments What is the contribution of European transport research It addresses the dynamics surrounding policy formulation and implementation the conflicts of interest underlying these processes at the regional national and supra national levels the inherent contradictions of the ecological modernization discourse as it applies to transport and the role of the public or the citizen in determining trajectories for future developments The book distils the results of three projects that have been completed with the support of the European Commission under the Fourth Framework Transport RTD Programme namely the TENASSESS CODE TEN and POSSUM projects The majority of the contributions derive from the TENASSESS project

Sustainability in European Transport Policy Matthew Humphreys, 2010-11-19 This book sets out a critical analysis of the body of law and policy initiatives that constitute the EU s common transport policy The development of the

transport policy is charted through amending and founding Treaties as well as non legislative documents The book uses a model of sustainability as the basis for the analysis as the criteria for sustainable development were set out under Article 11 of the Treaty on the Functioning of the European Union However sustainable development when taken in the context of transport is difficult to reconcile with unbridled economic growth and unchecked freedom of movement and the book identifies a contradiction at the heart of European policy which can only become more accentuated as environmental trends become more explicit The book argues that European regulation will eventually be forced to recognize this dichotomy and take more forceful action to protect environmental and social development even at the cost of economic progress **The**

Routledge Handbook of European Integrations Thomas Hoerber, Gabriel Weber, Ignazio Cabras, 2022-02-27 The Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in European integration collections Whilst still examining the largest and most influential institutions bodies and highly funded policy areas as acknowledged dominant topics in European studies it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU Organised around three main sections culture technology and tangibles the book offers an authoritative encyclopaedia to alternative areas in European integration from media football Erasmus and tourism to transport space AI and energy retains coverage of the dominant topics in European studies such as the Eurozone the Common Internal Market or European law but in balance with other areas of interest and provides an essential companion to existing scholarship in European studies The Routledge Handbook of European Integrations is essential reading and an authoritative reference for scholars students researchers and practitioners involved in and actively concerned about research in the study of European integration studies The Open Access version of Chapter 14 in this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license [The Routledge Handbook of Tourism and Sustainability](#) C.

Michael Hall, Stefan Gossling, Daniel Scott, 2015-02-11 Routledge Handbook of Tourism and Sustainability from C Michael Hall Stefan Gossling Daniel Scott is one of the winners of the ITB Book Awards 2016 in the category Specialist tourism literature Sustainability remains one of the major issues in tourism today Concerns over climate and environmental change the fallout from the global economic and financial crisis and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism however they be defined Given the centrality of sustainability in tourism curricula policies research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field providing a systematic guide to the current state of knowledge on this area It is interdisciplinary in coverage and international in scope through its

authorship and content The volume commences with an assessment of tourism s global environmental e g climate emissions energy use biodiversity water use land use and socio economic effects e g economic impacts employment and livelihoods culture This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability management tools and approaches and the approaches used in different tourism and travel industry sectors The book concludes by examining emerging and future concerns in tourism and sustainability such as peak oil post carbon tourism green economy and transition tourism This is essential reading for students researches and academics interested in the possibilities of sustainable forms of tourism and tourism s contribution to sustainable development Its assessment of tourism s global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come

Transport policy in Europe Cyril Alias, 2008-04-30 Seminar paper from the year 2008 in the subject Transportation Science Technology grade 1 3 University of Duisburg Essen Institut f r Geographie Wirtschaftsgeographie insb Verkehr und Logistik course Verkehr und Nachhaltigkeit language English abstract All over the history mobility has been an integral part of life Europe features a high level of its unmatched infrastructure allowing that mobility very well Not only mobility of people also the conveyance of goods profits from it It has become a part of the European lifestyle since the citizens of the continent make use of transport services as a matter of course Although the term Europe is used the essay mainly contains remarks about the transport sector of the European Union with its 27 member states by now Transportation is termed as the totality of all translocations of persons and goods as well as news which is to be geared to the needs for activity of men and to the environment The transport sector comprehends the extent of passenger use the frequency of the lanes the usage of the different means of transportation and the covered distances As the title of this essay indicates it is to deal with the concepts and objectives of a common transport policy throughout the European Union The central and decisive element in this matter is the White Paper European transport policy for 2010 Time to decide published at the Gothenburg European Council in 2001 This document contains the essential abstract objectives and concrete measures or concepts for a more sustainable transport policy across the Union territory These goals and measures can roughly be assigned to the two main categories of performance enhancement and climate protection By having referred to the 2006 Mid term review during the presentation of current situation in the European transport sector most interim results have already been presented earlier Generally it becomes obvious that progresses are made only sluggishly In addition the modal split balance is expected to remain stable So apart from certain exceptions many premises do not change for the following action fields After having considered the different sections of the transport policy in Europe one can draw several conclusions Sustained economic growth which will continue to belong to the top priorities of the European Union should be uncoupled from the rise in traffic volume Therefore efficiency and utilization rates have to be improved At the same time though environmental and social consequences of further growth
