Bowman, 2017-07-28 This important reference volume covers developments in almost every aspect of British library and information work during the ten year period 1991 2000 Some forty contributors all of whom are experts in their subject provide a robust overview of their specialities along with extensive further references which act as a starting point for further research The book provides a comprehensive record of what took place in library and information management during a decade of considerable change and challenges It is an essential reference resource for librarians and information professionals **The European Commission and the Integration of Europe** Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party

country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe s findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission **Regional Convergence in the**

European Union Juan R. Cuadrado-Roura,Marti Parellada,2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties *European Court of Human Rights*

Dia Anagnostou,2013-04-22 Since the turn of the millennium the European Court of Human Rights has been the transnational setting for a European wide rights revolution One of the most remarkable characteristics of the European Convention of Human Rights and its highly acclaimed judicial tribunal in Strasbourg is the extensive obligations of the contracting states to give observable effect to its judgments Dia Anagnostou explores the domestic execution of the European Court of Human Rights judgments and dissects the variable patterns of implementation within and across states She relates how marginalised individuals civil society and minority actors strategically take recourse in the Strasbourg Court to challenge state laws policies and practices These bottom up dynamics influencing the domestic implementation of human rights have been little explored in the scholarly literature until now By adopting an inter disciplinary perspective Anagnostou goes beyond the existing studies mainly legal and descriptive and contributes to the flourishing scholarship on human rights courts and legal processes and their consequences for national politics Romania and The European Union Dimitris Papadimitriou,David

Phinnemore,2008-03-26 This is a new overview of Romania s relationship with the European Union since the collapse of the Ceausescu regime in 1989 and recent accession to EU membership It presents the reader with a clear sense of the debate with full coverage of all the key issues involved **Anglo-European Intelligence Cooperation** Hager Ben

Jaffel,2019-09-26 This book investigates everyday practices of intelligence cooperation in anti terrorism matters with a specific focus on the relationship between Europe and Britain The volume examines the effective involvement of British anti terrorism efforts in European cooperation arrangements which until now have been overshadowed by the UK US special

relationship and by political debates that overstate the divide between Britain and continental Europe In arguing that British intelligence has always had a European dimension it provides a distinct perspective to the study of intelligence cooperation and the role of British intelligence therein Mobilizing a field theory approach the book provides an original contribution to the understanding of intelligence cooperation by investigating everyday bureaucratic practices of ground level security professionals and police forces embedded in a European field structured around the exchange of anti terror intelligence It also accounts for the drivers behind cooperation by using field analysis which explains the trajectory and positioning of actors according to their capitals rather than necessities dictated by threats or state decisions This book will be of much interest to students of Security Studies International Political Sociology Intelligence Studies and International Relations in general

Human Rights Law and Evidence-Based Policy Rosemary Byrne,Han Entzinger,2019-12-06 The EU Fundamental Rights Agency FRA was established to provide evidence based policy advice to EU institutions and Member States By blending social science research with traditional normative work it aims to influence human rights policy processes through new ways of framing empirical realities The contributors to this volume critically examine the experience of the Agency in its first decade exploring FRA s historical political and legal foundations and its evolving record across major strands of EU fundamental rights Central

themes arising from these chapters include consideration of how the Agency manages the tension between a mandate to advise and the more traditional approach of human rights bodies to monitor and how its research impacts the delicate equilibrium between these two contesting roles FRA's experience as the first embedded human rights agency is also highlighted suggesting a role for alternative and less oppositional orientations for human rights research While authors observe the benefits of the technocratic approach to human rights research that is a hallmark of FRA's evidence based policy advice they also note its constraints FRA's policy work requires a continued awareness of political realities in Brussels Member States and civil society Consequently the complex process of determining the Agency's research agenda reflects the strategic priorities of key actors This is an important factor in the Agency's role in the EU human rights landscape This pioneering position of the Agency should invite reflection on new forms of institutionalized human rights research for the future
