Integrating Markets in Banking Services Gulnaz Ospanova, 2022-11-09 This book deals with banking integrations which are now becoming crucial not only

because of the increased number of economic integrations but also in view of the qualitative improvement of such banking integrations. It compares the European Union EU as the most successful union which was able to move from a common financial market to the prime example of banking integration the Banking Union and the Eurasian Economic Union EAEU as a relatively young one but with several of the prerequisites for becoming an influential union and which was established by five countries the Russian Federation Kazakhstan Belarus Armenia and the Kyrgyz Republic in 2015. The key research question is whether the single market in banking services or a banking union is an achievable goal or merely a utopia. In this regard the book reveals the bottlenecks and obstacles that the EU and EAEU policymakers faced during the difficult process of establishing a single market and banking union. However along with the problems of banking integration it identifies many peculiarities of the harmonization of banking legislation among the EU Member States. Recognizing and acknowledging these peculiarities can be very beneficial for young unions and help to guide their integration processes. In particular the book concludes that evolutionary not revolutionary harmonization is required in order for the EAEU to become a full fledged union.

The Social Construction of Free Trade Francesco Duina, 2013-10-24. This book offers a compelling new interpretation of the proliferation of regional trade agreements RTAs at the end of the twentieth century. Challenging the widespread assumption that RTAs should be seen as fundamentally similar economic initiatives to pursue free trade, Francesco Duina proposes that the world is reorganizing itself into regions that are highly distinctive and enduring. With evidence from Europe North America and South America he challenges our understanding of globalization the nature of markets and the spread of neoliberalism. The pursuit of free trade is a profoundly social process and as such a unique endeavor wherever it takes place. In an unprecedented comparative analysis the book offers striking evidence of differences in the legal architectures erected to standardize the worldview of market participants and the reaction of key societal organizations interest groups businesses and national administrations to a broader marketplace. The author gives special attention to developments in three key areas of economic life: women in the workplace the dairy industry and labor rights. With its bold and original approach and its impressive range of data, *The Social Construction of Free Trade* represents a major advance in the growing fields of economic sociology and comparative regional
