Early Printed Narrative Literature in Western Europe Bart Besamusca, Elisabeth de Bruijn, Frank Willaert, 2019-11-05 The essays in this volume are concerned with early printed narrative texts in Western Europe The aim of this book is to consider to what extent the shift from hand written to printed books left its mark on narrative literature in a number of vernacular languages Did the advent of printing bring about changes in the corpus of narrative texts when compared with the corpus extant in manuscript copies Did narrative texts that already existed in manuscript form undergo significant modifications when they began to be printed How did this crucial media development affect the nature of these narratives Which strategies did early printers develop to make their texts commercially attractive Which social classes were the target audiences for their editions Around half of the articles focus on developments in the history of early printed narrative texts others discuss publication strategies This book provides an impetus for cross linguistic research It invites scholars from various disciplines to get involved in an international conversation about fifteenth and sixteenth century narrative literature

European Writers in Exile Robert C. Hauhart, Jeff Birkenstein, 2018-10-26 European Writers in Exile collects a series of original essays that address the writers universal existential dilemma when viewed through the lens of exile who am I where am I from and what do I write and to whom While we often understand the term exile to refer to writers who have either been forced to leave their home country or region or chosen self exile this term need not be defined so narrowly and the contributors to this volume explore a range of interesting and evolving definitions Various countries in Europe have long been both a refuge for people and writers from many countries and a strife torn region which has forced many to flee within the continent or beyond it The phrase in exile involves writers moving across borders in multiple directions and for multiple reasons including for reasons of duress or personal quest and these themes are addressed and critiqued in these essays This volume naturally examines the cataclysmic and near

universal exilic experiences relating to the world wars including essays on Thomas Mann Vladimir Nabokov Hannah Arendt and Leo Strauss Additionally essays address the unique early twentieth century experiences of Emile Zola Franz Kafka Joseph Conrad and James Joyce More contemporary essay subjects include Milan Kundera Norman Manea Eva Hoffman Caryl Phillips and W G Sebald This collection of transnational globalized European literature studies envisions understanding the intersection of our contemporary world and various writers in exile in new cultural historical spatial and epistemological frameworks How does literary production in an increasingly globalized world when seen from exile affect a view back towards a country or region left behind Or conversely how does exile push a writer to look outward to new trans nationalized space s These and other questions are important to investigate Taken in sum *European Writers in Exile* offers an academically rigorous important and cohesive volume

From Political Economy to Economics Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic

and unravel the processes that lead to orthodoxy's current predicament. The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology. It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists, historians and other social scientists. This has resulted in an impoverished historical and social content within mainstream economics. The book ranges over the shifting role of the historical and the social in economic theory, the shifting boundaries between the economic and the non economic all within a methodological context. Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx, the German and British historical schools, American institutionalism, Weber and Schumpeter and their programme of Social Konomik and the Austrian school. At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore. The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda. This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras. It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism. Drawing on the rich traditions of the past, the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future.

Sivachandralingam Sundara Raja, Shivalingam Raymond, 2023-07-31. This book argues that the prevailing view of colonialism that it was a negative and destructive phenomenon needs to be rethought. It focuses on the experiences of the South Indian working class, large numbers of which came to Malaya in the early years of the twentieth century, emigrating from socially, economically and environmentally inhospitable south India. It examines the opportunities which colonialism presented for these people, highlighting also the British approach to colonialism in Malaya, an approach which emphasised conservatism and tradition and which protected the interests of the Malay aristocrat classes and, by extension, the Malay masses in order to compensate for European economic dominance and the influx of a non Malay labour force. Overall, the book demonstrates that the South Indians, a class whose identity, social existence and prospects were inextricably linked to imperial processes, benefitted from colonialism and should be viewed as an active transnational entity within a constructive system rather than as passive victims of repressive, destructive forces.
