European Encounters Migrants Migration And European Societies Since 1945:

European Encounters Rainer Ohliger, Karen Schönwälder, 2017-03-02 This book reminds us of Europe's multi-faceted history of expulsions, flight and labour migration and the extent to which European history since 1945 is a history of migration. While immigration and ethnic plurality have often been divisive issues, encounters between Europeans and newcomers have also played an important part in the development of a European identity. The authors analyze questions of individual and collective identities, political responses to migration and the way in which migrants and migratory movements have been represented both by migrants themselves and their respective host societies. The book's distinctive multi-disciplinary and international approach brings together experts from several fields including history, sociology, anthropology and political science. *European Encounters* will serve as an invaluable tool for students of contemporary European history, migration and ethnic identities.

Europe, Migration and Identity Jan Logemann, Donna Gabaccia, Sally Gregory Kohlstedt, 2015-10-14 This volume explores connections between migration studies and research in the history of Europeanization and Europeaness, areas which have generated much interest in recent years. Beyond histories of European political integration and the intellectual and elite movements that have supported this process, scholars increasingly pay attention to the constructed nature of Europeaness and European identities and to the multiplicity of ways in which this construction happens. Migrants can be a particularly useful lens on Europeanization processes as they provide a perspective from the periphery in two ways: by providing a view literally from the outside, as in the case of those who left the continent, or by providing a view from the margins of the European societies within which they live. The collection asks what Europe meant to migrants abroad, particularly within the transatlantic context and within the continent during the twentieth century. Contributions from a variety of disciplinary perspectives reflect both on the broader historical context and theoretical implications and highlight specific cases such as those of European labor migrants to the United States, of transatlantic exiles and migrants of Latin American immigrants in present-day Europe, as well as the experience of highly skilled migrants within the context of the European Union. Can we trace the emergence of European identities among different groups of migrants and if so, what forms did they take? This book was originally published as a special issue of *National Identities*.

Migration and Religion in Europe Ester Gallo, 2016-04-22 Religious practices and their transformation are crucial elements of migrants' identities and are increasingly politicized by national governments in the light of perceived threats to national identity. As new immigrant flows shape religious pluralism in Europe, longstanding relations between the State and Church are challenged together with majority faith traditions and societies' ways of representing and perceiving themselves. With attention to variations according to national setting, this volume explores the process of reformulating religious identities and practices amongst South Asian communities in European contexts. Presenting a wide range of ethnographies including studies of Hinduism, Sikhism, Jainism and Islam amongst migrant communities in contexts as diverse as Norway, Italy, the UK

Gender and Migration Caroline B. Brettell,2017-01-19 Gender roles relations and ideologies are major aspects of migration This timely book argues that understanding gender relations is vital to a full and more nuanced explanation of both the causes and the consequences of migration in the past and at present Through an exploration of gendered labor markets laws and policies and the transnational model of migration Caroline Brettell tackles a variety of issues such as how gender shapes the roles that men

and women play in the construction of immigrant family and community life debates concerning transnational motherhood and how gender structures the immigrant experience for men and women more broadly This book will appeal to students and scholars of immigration race and ethnicity and gender studies and offers a definitive guide to the key conceptual issues surrounding gender and migration **The Elgar Companion to Gender and Global Migration** Natalia

Ribas-Mateos,Saskia Sassen,2022-12-13 This timely Companion traces the interlinking histories of globalisation gender and migration in the 21st century setting up a completely new agenda beyond Western research production Natalia Ribas Mateos and Saskia Sassen bring together 27 incisive contributions from leading international experts on gender and global migration uncovering the multitude of economies histories families and working cultures in which local regional national and global economies are embedded *Paths of Integration* Leo Lucassen,David Feldman,Jochen Oltmer,2006 Why do some migrants

integrate quickly while others become long term minorities What is the role of the state in the settlement process To what extent are experiences in the past different from the present Are the recent migrants really integrating in another way than those in the past Is Islam indeed an obstacle to integration These are some of the burning questions which dominate the current politicized debate on immigration in Western Europe In this book leading historians and social scientists analyze and compare a variety of settlement processes in past and present migration to Western Europe Identifying general factors in the process of adaptation of new immigrants the contributors trace social changes effected by recent European immigration and the parallels with the great American migration of the 1880s 1920s The history of migration to Western Europe and the way these migrants found their place in the receiving societies is not only essential to understand the way nations deal with newcomers in the present but also constitutes a highly interesting laboratory for different paths of integration now and then By analyzing and comparing a wealth of settlement processes both in the past and in the present this book is both a bold interdisciplinary endeavor and at the same time the first attempt to identify general factors underlying the way migrants adapt to their new surroundings as well as how societies change under the influence of immigration The chapters in the book both look at specific groups in various periods but also analyses the structure of the state churches unions and other important organized actors in Western European nation states Moreover the results are embedded in the more theoretical American literature on the comparison of old and new migrants All chapters have an explicit comparative perspective either by comparing different groups or different periods whereas the general conclusion ties together the various outcomes in a systematic way highlighting the main answers to the central questions about the various outcomes of settlement processes Publisher *Global Migration* Elizabeth Mavroudi,Caroline Nagel,2023-07-21 This new fully updated edition of Global Migration provides students with a thorough and grounded understanding of multiple dimensions of migration including labour markets citizenship border control integration and identity Written by two geographers the book incorporates insights from across the social sciences and is accessible to students in many disciplines Providing a useful and timely introduction to

migration the textbook addresses migration in a holistic way and equips students with the tools they need to participate in contemporary debates about migration in sending and destination contexts It conveys to students that the causes and effects of migration are geographically specific and contingent upon class race gender and other markers of social difference Rather than identifying simple solutions to migration problems the book encourages students to think about unauthorized migration asylum refugee resettlement labour migration and other forms of mobility and immobility from different vantage points Global Migration serves as the go to book for teaching advanced undergraduate and master s level students about the complexities of migration across nation state borders

Between National Socialism and Soviet Communism Anna Holian, 2011-08-30 Though its primary focus is on the immediate postwar period Between National Socialism and Soviet Communism will surely illuminate the contemporary crisis around citizenship and definitions of Germanness in the context of European Union and globalization Geoff Eley University of Michigan In May of 1945 there were more than eight million displaced persons or DPs in Germany recently liberated foreign workers concentration camp prisoners and prisoners of war from all of Nazi occupied Europe as well as eastern Europeans who had fled west before the advancing Red Army Although most of them quickly returned home it soon became clear that large numbers of eastern European DPs could or would not do so In the aftermath of National Socialism Germany thus ironically became a temporary home for a large population of foreigners Focusing on Bavaria in the heart of the American occupation zone Between National Socialism and Soviet Communism examines the cultural and political worlds that four groups of displaced persons Polish Ukrainian Russian and Jewish created in Germany during the late 1940s and early 1950s The volume investigates the development of refugee communities and how divergent interpretations of National Socialism and Soviet Communism defined these displaced groups Combining German and eastern European history Anna Holian draws on a rich array of sources in cultural and political history and engages the broader literature on displacement in the fields of anthropology sociology political theory and cultural studies Her book will interest students and scholars of German eastern European and Jewish history migration and refugees and human rights

Strategies for Combating Right-Wing Extremism in Europe Bertelsmann Stiftung, 2010-07-30 Right wing extremism is a phenomenon that can be found throughout Europe All democratic societies are threatened by racist anti pluralistic and authoritarian ideas Even though the so called radical right differs in character and ideology in the various European countries it strives to restrict civic and human rights as well as to change the constitutional structures that are based on the principles of democracy and liberty Individual European countries deal with this challenge differently The various policy approaches found in these countries are a good source for developing improved practices for fighting rightwing extremism in Germany and worldwide With this publication the Bertelsmann Stiftung presents an overview of the radical right in Austria Belgium Denmark France Germany Great Britain Hungary Italy the Netherlands Sweden and Switzerland It also includes the most successful strategies against right wing extremism found in

these countries The main focus of this publication is the actions pursued by the governments political parties and actors of the civil society Judicial provisions are highlighted as well as the implementation of laws special action programs the effectiveness of prosecution of right wing crimes cooperation of parties institutional responsibilities cooperation of authorities with NGOs and civil commitment against right wing extremism Immigrants in the Sexual Revolution Andrew DJ Shield,2017-08-29 This book focuses on the latter half of the twentieth century when much of northwest Europe grew increasingly multicultural with the arrival of foreign workers and post colonial migrants whilst simultaneously experiencing a boom in feminist and sexual liberation activism Using multilingual newspapers foreign worker organizations archives and interviews this book shows that immigrants in the Netherlands and Denmark held a variety of viewpoints about European gender and sexual cultures Some immigrants felt solidarity with and even participated in European social movements that changed norms and laws in favor of women s equality gay and lesbian rights and sexual liberation These histories challenge today s politicians and journalists who strategically link immigration to sexual conservatism misogyny and homophobia

Diasporas and Homeland Conflicts Bahar Baser,2016-03-09 As violent conflicts become increasingly intra state rather than inter state international migration has rendered them increasingly transnational as protagonists from each side find themselves in new countries of residence In spite of leaving their homeland the grievances and grudges that existed between them are not forgotten and can be passed to the next generation This book explores the extension of homeland conflicts into transnational space amongst diaspora groups with particular attention to the interactions between second generation migrants Comparative in approach *Diasporas and Homeland Conflicts* focuses on the tensions that exist between Kurdish and Turkish populations in Sweden and Germany examining the effects of hostland policies and politics on the construction shaping or elimination of homeland conflicts Drawing on extensive interview material with members of diasporic communities this book sheds fresh light on the influences exercised on conflict dynamics by state policies on migrant incorporation and multiculturalism as well as structures of migrant organizations As such it will be of interest to scholars of sociology political science and international studies with interests in migration and diaspora integration and transnational conflict *The Unsettling of Europe* Peter Gatrell,2019-08-27 An acclaimed historian examines postwar migration s fundamental role in shaping modern Europe Migration is perhaps the most pressing issue of our time and it has completely decentered European politics in recent years But as we consider the current refugee crisis acclaimed historian Peter Gatrell reminds us that the history of Europe has always been one of people on the move The end of World War II left Europe in a state of confusion with many Europeans virtually stateless Later as former colonial states gained national independence colonists and their supporters migrated to often unwelcoming metropolises The collapse of communism in 1989 marked another fundamental turning point Gatrell places migration at the center of post war European history and the aspirations of migrants themselves at the center of the story of migration This is an urgent history that will reshape our understanding of

modern Europe Migrating Memories James Koranyi, 2021-12-16 Romanian Germans mainly from the Banat and Transylvania have occupied a place at the very heart of major events in Europe in the twentieth century yet their history is largely unknown This east central European minority negotiated their standing in a difficult new European order after 1918 changing from uneasy supporters of Romania to zealous Nazis tepid Communists and conciliatory Europeans *Migrating Memories* is the first comprehensive study in English of Romanian Germans and follows their stories as they move across borders and between regimes revealing a very European experience of migration minorities and memories in modern Europe After 1945 Romanian Germans struggled to make sense of their lives during the Cold War at a time when the community began to fracture and fragment The Revolutions of 1989 seemed to mark the end of the German community in Romania but instead Romanian Germans repositioned themselves as transnational European bridge builders staking out new claims in a fast changing world *Switzerland and Migration* Barbara Lüthi, Damir Skenderovic, 2019-04-30 This book explores the history of migration in Switzerland from the late nineteenth century to the present day It brings together recent scholarship on Switzerland in the field of cultural and migration studies as well as migration history and combines various research approaches from postcolonial studies transnational studies border studies and history of knowledge Since the late nineteenth century Switzerland has gradually transformed into a migration society becoming one of the countries in Europe with the highest percentage of migrant population While migration has become one of most contentious issues in Swiss public and political debates the volume also shows how migrants have developed various strategies to deal with the country s discriminatory policies and distinct institutional settings The authors of the volume convincingly challenge the view that Switzerland still does not represent a migration or even post migrant society and substantially contributes to the long overdue acknowledgement of Switzerland in migration history and studies at the international level Mapping the Extreme Right in Contemporary Europe Andrea Mammone, Emmanuel Godin, Brian Jenkins, 2012-05-16 In recent years the revival of the far right and anti Semitic racist and fascist organizations has posed a significant threat throughout Europe Mapping the Extreme Right in Contemporary Europe provides a broad geographical overview of the dominant strands within the contemporary radical right in both Western and Eastern Europe After providing some local and regional perspectives the book has a series of national case studies of particular countries and regions including Austria Belgium Bosnia Herzegovina Croatia Eastern Europe France Germany Greece Italy Malta Portugal Romania Scandinavia Serbia Spain Switzerland Turkey Ukraine and the United Kingdom A series of thematic chapters examine transnational phenomena such as the use of the Internet the racist music scene cultural transfers and interaction between different groups Drawing together a wide range of contributors this is essential reading for all those with an interest in contemporary extremism fascism and comparative party politics
