European Historical Statistics, 1750-1970 Brian R. Mitchell, 1975 **European Historical Statistics, 1750-1970**

B. R. Mitchell, 1975-06-18 Compilation of historically compiled statistical tables revealing long term trends in the economic growth of Eastern European and Western European countries covers population labour force agriculture industry trade infrastructure etc International Historical Statistics: Africa, Asia and Oceania 1750-1988 Brian Mitchell, 1995-06-30

Recent concern with economic growth has led not only to a vast increase in the quantity and quality of statistics collected and published but also to an upsurge of interest in the statistics of the past As attention has turned more and more to the study of the comparative development of different countries so a need has been felt for a collection of historical statistics comparing different nations Each of the 10 sections has a short introductory commentary and extensive notes and footnotes

This unique compilation now in its second edition and revised and updated brings together in a single volume major

statistical series which document the growth and development of these vast areas **European Historical Statistics, 1750-1975** Brian R. Mitchell, 1981 *The Formation of the First German Nation-State, 1800-1871* John Breuilly, 1996-11-11

Many accounts of German unification focus on war diplomacy and Bismarck and on the crucial ten years up to 1871 John Breuilly in addition to paying attention to those issues extends the analysis back to 1800 He also takes into account social economic and cultural developments bringing to the reader's attention recent research much of it in German In particular the book argues that one should see unification as just one possible outcome of the German situation the result of rapid shifts in the relative power of different European states and of underlying changes which made nationality a more vital force in politics **Military Effectiveness: Volume 2, The Interwar Period** Allan R. Millett, Williamson Murray, 2010-08-09 This

three volume study examines the questions raised by the performance of the military institutions of France Germany Russia the United States Great Britain Japan and Italy in the period from 1914 to 1945 Leading military historians deal with the different national approaches to war and military power at the tactical operational strategic and political levels They form the basis for a fundamental re-examination of how military organizations have performed in the first half of the twentieth century

Volume 2 covers the interwar period Volumes 1 and 3 address World War I and World War II respectively Now in a new edition with a new introduction by the editors these classic volumes will remain invaluable for military historians and social scientists in their examination of national security and military issues They will also be essential reading for future military leaders at Staff and War Colleges **Who Adjusts?** Beth A. Simmons, 2020-03-31 In this work Beth Simmons presents a

fresh view of why governments decided to abide by or defect from the gold standard during the 1920s and 1930s Previous studies of the spread of the Great Depression have emphasized tit for tat currency and tariff manipulation and a subsequent cycle of destructive competition Simmons on the other hand analyzes the influence of domestic politics on national responses

to the international economy In so doing she powerfully confirms that different political regimes choose different economic adjustment strategies

Economic Thought and Policy in Less Developed Europe Maria Eugenia Mata, Michalis Psalidopoulos, 2001-12-06 The essays in this volume explore and discuss the process of dissemination of economic ideas among Europe's less developed countries and regions as well as the interaction between economic thought and economic policy in different times and places during the nineteenth century The comparative approach adopted sheds new light on the course of economic development in Europe's less developed countries in the nineteenth century and the role played by political economy Amongst a host of others the topics covered include economic policy in Denmark monetary and trade policy in Norway the influence of the German Historical School in Finland land Reform and the abolition of serfdom in Russia and in Poland With contributions that disclose important insights into national traditions in economic thought and policy and the diffusion of ideas in Europe this work will be essential reading for all scholars of the history of economic thought

An Economic and Social History of Western Europe since 1945 Anthony Sutcliffe, 2014-09-19 This is the ideal companion text to A Political History of Western Europe Since 1945 It is an introductory survey which explains how western Europe built up its postwar prosperity and is moving towards continental integration Themes treated include the origins of the EC consumerism youth culture and protest immigration the oil crisis and its aftermath and the contrasting experience and expectations of the Nordic world and the Mediterranean south The book ends with the consequences of Soviet collapse Designed for general history students it assumes no formal knowledge of economics and is notably accessible and user friendly in its approach

Agriculture and the Great Depression Gérard Béaur, Francesco Chiapparino, 2022-12-14 What role did the agricultural sector play in the economic crash of 1929 Taking evidence from country cases across Europe and the Americas this edited volume explores short medium and long term perspectives on the primary sector The monograph brings together the voices of an international panel of contributors who examine issues such as falling prices industrial production unemployment and the stagnation of aggregate demand Together they frame the interwar period as a pivotal turning point in the decline of subsistence agriculture and the growth of agricultural subsidies which remain a key policy tool in many economies today This illuminating book will be of interest to advanced students and researchers in economic history agricultural history globalization and economic development

text or as a set of supplementary readings to support other texts Modern Germany Reconsidered follows the chronological development of the whole range of modern German history whilst highlighting themes of special interest the role of women economics German liberalism the Holocaust Foreign Finance in Continental Europe and the United States 1815-1870 D.C.M. Platt,2013-11-05 First Published in 2005 This study uses the Baring archive to provide a professional and contemporary understanding of the foreign financial history of Continental Europe and the United States from the years 1815 to 1870 The material gathered in this book for France Russia Austria Spain and the United States and the conclusions reached in all the chapters go far towards supporting and confirming that the belief that capital exports give rise to growth is an inflated claim *Paradoxical Harvest* Richard Newbold Adams,1982-09-30 This book is a study of the relationship between the use of energy in society and the general pattern of development in Great Britain during the 1870 1914 era Professor Adams argues that Britain s apparent decline in this period was not in fact a decline but a levelling off in capacity to do work a result of the country s collective decision to invest more heavily abroad than at home This pattern accords with Lotka s general energetic principle of natural selection Specifically Britain found it necessary to invest abroad thereby creating an industrial environment for its own products and giving the impetus to other industrial nations especially the United States and Germany to seriously threaten Britain s primary position in industry and trade The book should be of interest to those concerned with development economic growth energy and society cultural development and in general to specialists in anthropology sociology European and British history economics and economic history European Monetary Union M. Panic,1993-06-18 Provides an analysis of the classical gold standard 1880 1914 the nearest historical equivalent to what EC countries are attempting to do in order to examine critically these and other issues raised in the debate Problems are highlighted that need to be solved before EMU becomes viable *Mothers of the Nation* Patrizia Albanese,Professor Department of Sociology Patrizia Albanese,2006-01-01 Comparing nationalist and non nationalist polities in order to establish how these governments differ in their treatment of women and families Albanese concludes that the efforts of most ethno nationalist regimes to return women to their natural place in the home as housewives and mothers have been largely unsuccessful Policies to this effect have provoked considerable opposition by women s groups and individual women have often been reversed by subsequent governments and have had little long term demographic impact Mothers of the Nation makes an important contribution to the literature on feminism nationalism and social and economic policy within a comparative political context Jacket **Trails** Patricia Nelson Limerick,Clyde A. Milner,Charles E. Rankin,1991 Reexamination of the role of the West in U S history and of the field of western history itself told by ten historians **The Scientific Study of Peace and War** John A. Vasquez,1999-01-01 The contributors of this book suggest methodologies for a systematic analysis of historical examples using controlled observation the collection of evidence and careful inferences
