Revolutionary changes in global and European politics have reawakened old fears that Europe will be dominated by an unpredictable German giant The same changes have fueled new hopes for Germany and Europe as models of political pluralism in a peaceful and prosperous world In fact Peter J Katzenstein explains the current reality is too complex to fit either expectation Katzenstein contends that a multilateral institutionalization of power is the most distinctive aspect of the relationship between Europe and Germany Only the observer who is aware of this important fact can understand why Germany is willing to give up its new sovereign power Although Germany is larger than any other member of the European Union and plays a crucial role in the economic and political life of Eastern Europe its power is now funneled through the institutions of the European Union rather than erupting in a narrow power defined sense of national self interest The empirical chapters of this book explore the institutionalization of power relations between the European Union and Germany

as well as the relations of Germany and the European Union with most of the smaller European states *Challenges of Social Cohesion in Times of Crisis* M. Zupi, E. Estruch Puertas, 2010 **Social developments in the European Union**

2010 Degryse C. and Natali D., 2011 2010 was a critical year for the European Union EU in at least three major respects First of all many EU countries started showing signs of increased financial stress while the eurozone began to be affected by a true debt crisis extending well beyond the highly publicised case of Greece Secondly the European Union strove to achieve renewal through its first steps to implement the Lisbon Treaty that had come into force on 1 December 2009 The third reason why 2010 represented a turning point for the EU is that the ten year Lisbon Strategy launched by the European Council in March 2000 as a framework for EU socio economic policy coordination formally reached its end in June 2010 when EU leaders adopted the new Europe 2020 Strategy All of these developments will have deep and long lasting effects on social policy at both national and supra national level This 2010 edition of Social developments in the European Union examines the ways in which the EU has tackled the main challenges related to the fiscal crisis the first steps towards implementation of the Lisbon Treaty and the launch of the EU2020 Strategy The volume sheds light on a number of aspects including the risks for the European social model and European integration project the state of the debate on revision of the Stability and Growth Pact the impact of the economic and financial crisis on pensions the new EU employment policy roadmap and more generally the tensions risks and opportunities generated by Europe 2020 **Varieties of Economic Inequality** Sebastiano

Fadda, Pasquale Tridico, 2016-03-10 Recently the issue of inequality has regained attention in economic and political debates Although this interest is welcome the debate is still mostly focused on income or wealth distribution which is an important aspect but does not present a complete view of inequality Most of the theoretical and empirical studies produced by economists concern personal income distribution or factor income distribution This is more evident in the studies of the evolution and characteristics of contemporary capitalism and globalization Varieties of Economic Inequality considers both theoretical perspectives and empirical evidence of aspects such as income gender race technology power region education and class Ultimately this text rejects the idea of supposed long run constant factor shares the positive effects of inequality and the greater importance of absolute level of income compared to its unequal distribution and instead reveals the structural inequalities that exist within societies This book advocates a move away from the focusing on inequality at the level of the individual and suggests policy for eradicating these various forms of inequality It is suitable for those who study political economy social inequality as well as economic theory and philosophy
