## **Europeanisation National Identities And Migration Changes In Boundary Constructions Between Western And Eastern Europe:**

**Europeanisation, National Identities & Migration** Willfried Spohn, Anna Triandafyllidou, 2002     Economic and Political Change in Asia and Europe Bernadette Andreosso-O'Callaghan, Frédéric Royall, 2012-08-10 Since the 1973 publication of Alain Peyrefitte's prophetic *When China Awakens* developments in East Asia have outstripped even the wildest predictions China has undergone the fastest industrialization and urbanization process in history yet tensions there are rising as some realize how far they have been left behind This volume explores the applicability of European economic and social models to our analysis of East Asia's and in particular China's situation Though millions of Chinese and other Asian people have been lifted out of poverty inequality is rising nonetheless and contemporary Europe and Asia are both witnessing collective action against rampant economic neoliberalism in the former and the exclusion of minorities in the latter It is difficult to overstate the relevance of this assessment which seeks answers to some central questions Can events in Europe serve as a model for those in East Asia Are there similarities or differences between the two regions To what extent do political economic or social systems stimulate or inhibit collective action How culturally equivalent are the collective actions of marginalized disadvantaged people in the two locations or are events in Europe symptomatic of specific cultural attributes Comparing and contrasting the research tools and dominant paradigms in the social and economic sciences in East Asia and Europe as this volume does throws out some revealing results     Collective Memory and European Identity Willfried Spohn, 2016-12-05 Is it possible to create a collective European identity In this volume leading scholars assess the link between collective identity construction in Europe and the multiple memory discourses that intervene in this construction process The authors believe that the exposure of national collective memories to an enlarging communicative space within Europe affects the ways in which national memories are framed Through this perspective several case studies of East and West European memory discourses are presented The first part of the volume elaborates how collective memory can be identified in the new Europe The second part presents case studies on national memories and related collective identities in respect of European integration and its extension to the East This timely work is the first to investigate collective identity construction on a pan European scale and will be of interest to academics and postgraduate students of political sociology and European studies     **Nations and Nationalism** Guntram H. Kaplan, 2008-05-22 A comprehensive and revealing compilation of essays analyzing the varied dimensions of national identities and nationalisms across world regions and through time The pervasiveness of nationalism its many manifestations over the centuries and the widely scattered way it has been studied make it a particularly difficult subject to approach and explore ABC CLIO offers the finest comprehensive reference available on an essential topic in modern world history Across four volumes *Nations and Nationalism A Global Historical Overview* covers all aspects of nationalism in all parts of the world from the time of the French Revolution to the

**Illiberal Liberal States** Elspeth Guild, Kees

Groenendijk, 2016-05-13 Understanding the dynamics of the illiberal practices of liberal states is increasingly important in Europe today This book examines the changing relationship between immigration citizenship and integration at the European and national arenas It studies some of the main effects and questions the comprehensiveness of the exchange and coordination of public responses to the inclusion of third country nationals in Europe as well as their compatibility with a common European immigration policy driven by a rights based approach and the respect of the principles of fair and equal treatment of third country nationals The volume reviews key national experiences of immigration and citizenship laws the use of integration and the moving of ideas between national arenas The framing of integration in immigration and citizenship law and the ways in which policy convergence is being achieved through the EU framework on integration raises a number of conceptual dilemmas and a set of definitional premises in need of reflection and consideration

**Nationalist Politics and**

**Everyday Ethnicity in a Transylvanian Town** Rogers Brubaker, Margit Feischmidt, Jon Fox, Liana Grancea, 2018-06-05

Situated on the geographic margins of two nations yet imagined as central to each Transylvania has long been a site of nationalist struggles Since the fall of communism these struggles have been particularly intense in Cluj Transylvania s cultural and political center Yet heated nationalist rhetoric has evoked only muted popular response The citizens of Cluj the Romanian speaking majority and the Hungarian speaking minority have been largely indifferent to the nationalist claims made in their names Based on seven years of field research this book examines not only the sharply polarized fields of nationalist politics in Cluj Transylvania and the wider region but also the more fluid terrain on which ethnicity and nationhood are experienced enacted and understood in everyday life In doing so the book addresses fundamental questions about ethnicity where it is when it matters and how it works Bridging conventional divisions of academic labor Rogers Brubaker and his collaborators employ perspectives seldom found together historical and ethnographic institutional and interactional political and experiential Further developing the argument of Brubaker s groundbreaking *Ethnicity without Groups* the book demonstrates that it is ultimately in and through everyday experience as much as in political contestation or cultural articulation that ethnicity and nationhood are produced and reproduced as basic categories of social and political life

Spurling,2013 Climate change is widely agreed to be one the greatest challenges facing society today Mitigating and adapting to it is certain to require new ways of living Thus far efforts to promote less resource intensive habits and routines have centred on typically limited understandings of individual agency choice and change This book shows how much more the social sciences have to offer The contributors to Sustainable Practices Social Theory and Climate Change come from different disciplines sociology geography economics and philosophy but are alike in taking social theories of practice as a common point of reference This volume explores questions which arise from this distinctive and fresh approach how do practices and material elements circulate and intersect how do complex infrastructures and systems form and break apart how does the reproduction of social practice sustain related patterns of inequality and injustice This collection shows how social theories of practice can help us understand what societal transitions towards sustainability might involve and how they might be achieved It will be of interest to students and researchers in sociology environmental studies geography philosophy and economics and to policy makers and advisors working in this field      **Political Inequality in an Age of Democracy**

Joshua Kjerulf Dubrow, 2014-07-11 The world has witnessed the creation of new democracies and the maturing of old ones Yet everywhere there is democracy there is also political inequality Voices of everyday folk struggle to be heard often they keep silent Governments respond mostly to the influential and the already privileged Our age of democracy then is the old age of inequality This book builds on U S scholarship on the topic of political inequality to understand its forms causes and consequences around the world Comprised of nine theoretical methodological and empirical chapters this path creating edited collection contains original works by both established and young up and coming social scientists including those from Latin America Eastern Europe Greece and the U S Political Inequality in an Age of Democracy addresses the present and future of the concept of political inequality from multi disciplinary and cross national perspectives Weber and the Persistence of Religion Joseph W. H. Lough, 2007-05-07 Taking Weber s interpretations of capitalism and religion this intriguing book re examines a wide range of classical and contemporary texts to help explain the character of religion and spirituality in mature capitalist societies *Creation and Returns of Social Capital* Henk Flap, Beate Völker, 2004-08-02 The idea of a social capital research program has become increasingly significant within the social sciences This collection of essays considers integration and standardization of measurement instruments and research on social capital The Institutionalization of Social Welfare Mikael Holmqvist, 2012-08-21 Today most countries rely on formally organized welfare programs in some cases to the extent that they are labeled welfare states These programs which have been constructed over the last decades make up a larger national and international system of good intentions Overall it appears inconceivable to imagine civilized society without a comprehensive organizational system of social welfare Social welfare has become a holy cow in many societies an institutionalized aspect of modern life But how does the institutionalization of social welfare occur through the concrete activities it enacts and why does the institutionalization of social welfare appear to be so particularly successful in relation to other institutionalizing phenomena These are central problems for any sociological analysis of contemporary society s organization and are the main locus of attention of this book Holmqvist explores how a social welfare organization becomes a self evident phenomenon by medicalizing its environment a way of solving social problems by viewing and treating them as medical problems This study generates new understandings of how institutionalization of organizations comes about and contributes fresh insight to the area of social welfare policies **A General Theory of Emotions and Social Life** Warren D. TenHouten, 2006-11-22 Founded upon the psychoevolutionary theories of Darwin Plutchik and Izard a general socioevolutionary theory of the emotions affect spectrum theory classifies a wide spectrum of the emotions and analyzes them on the sociological psychological and neurobiological levels This neurocognitive sociology of the emotions supersedes the major theoretical perspectives developed in the sociology of emotions by showing primary emotions to be adaptive reactions to fundamental problems of life which have evolved into elementary social relationships and which can predict occurrences of the entire spectrum of primary complex secondary and tertiary emotions Written by

leading social theorist Warren D TenHouten this book presents an encyclopaedic classification of the emotions describing forty six emotions in detail and presenting a general multilevel theory of emotions and social life The scope of coverage of this key work is highly topical and comprehensive and includes the development of emotions in childhood symbolic elaboration of complex emotions emotions management violence and cultural and gender differences While primary emotions have clearly defined valences this theory shows that complex emotions obey no algebraic law and that all emotions have both creative and destructive potentialities

piles and emerges with untold treasures of the imagination      *The Role of Religion in Modern Societies* Detlef Pollack, Daniel V.A. Olson, 2012-08-21 Does modernization lead to the decline of religion This question lies at the centre of a key debate in the sociology of religion During the past decade American scholars using primarily American data have dominated this debate and have made a strong case that the answer to this question is no Recently however a new crop of European scholars working with new sources of European data have uncovered evidence that points toward an affirmative answer This volume pays special attention to these trends and developments to provide the reader with a more well rounded understanding of the many ways in which religion interacts with modernization Respected scholars such as David Voas Steve Bruce and Anthony Gill examine modern societies across the world in this splendid book which will interest sociologists political scientists historians and theologians in equal measure      **Bourdieu's Theory of Social Fields** Mathieu Hilgers, Eric Mangez, 2014-11-13 Bourdieu's theory of social fields is one of his key contributions to social sciences and humanities However it has never been subjected to genuine critical examination This book fills that gap and offers a clear and wide ranging introduction to the theory It includes a critical discussion of its methodology and relevance in different subject areas in the social sciences and humanities Part I theoretical investigations offers a theoretical account of the theory while also identifying some of its limitations and discussing several strategies to overcome them Part II Education culture and organization presents the theory at work and highlights its advantages and disadvantages The focus in Part III devoted to The State is on the formation and evolution of the State and public policy in different contexts The chapters show the usefulness of field theory in describing explaining and understanding the functioning of the State at different stages in its historical trajectory including its recent redefinition with the advent of the neoliberal age A last chapter outlines a postcolonial use of the theory of fields
