Europeanisation Of National Administrations Patterns Of Institutional Change And Persistence:

The Europeanisation of National Administrations Christoph Knill, 2001-08-09 Christoph Knill's book analyses the impact of European policies on national administrations Under which conditions can we expect domestic change particularly the convergence of administrative styles and structures How can we explain national patterns of administrative transformation in the context of Europeanisation Knill's study is a comparative assessment of the factors influencing administrative adjustment to European policy demands in the member states It addresses the topic from an innovative theoretical perspective combining institution based and agency based approaches and includes a detailed account of the administrative impact of EU environmental policy in Britain and Germany The Europeanisation of National Administrations will be of great interest to students scholars and practitioners in the fields of European studies public administration and public policy environmental politics and European and administrative law International Bureaucracy Michael W. Bauer, Christoph Knill, Steffen Eckhard, 2016-10-26 This book applies established analytical concepts such as influence authority administrative styles autonomy budgeting and multilevel administration to the study of international bureaucracies and their political environment It reflects on the commonalities and differences between national and international administrations and carefully constructs the impact of international administrative tools on policy making The book shows how the study of international bureaucracies can fertilize interdisciplinary discourse in particular between International Relations Comparative Government and Public Administration The book makes a forceful argument for Public Administration to take on the challenge of internationalization

The Politics and Crisis Management of Animal Health Security John Connolly, 2016-03-09 The Politics and Crisis Management of Animal Health Security addresses the 2001 foot and mouth epidemic in the United Kingdom one of if not the most significant crises ever to face the UK farming industry Underpinned by interviews with politicians and bureaucrats and with significant primary documentary analysis the book shows that the crisis was a critical juncture in how disease outbreaks have been planned and managed ever since The author explores how this event affected policy and governance arrangements for managing subsequent disease induced threats such as avian influenza and bovine TB and concludes by considering the temporality of lesson learning by the UK government including the current and future challenges associated with managing incongruent risks e.g flood protection swine flu and Ebola This book provides students of public policy and administration with a significant illustration of how key concepts and analytical lenses from public policy can be applied to the study of the contours of practical policy change

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials' preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the

subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe s findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

Why Noncompliance Tanja A. Börzel, 2021-02-15 Why Noncompliance traces the history of noncompliance within the European Union EU focusing on which states continuously do or do not follow EU Law why and how that affects the governance in the EU and beyond In exploring the EU s long and varied history of noncompliance Tanja A B rzel takes a close look at the diverse groups of noncompliant states throughout the EU s existence Why do states that are vocally critical of the EU have a better record of compliance than those that support the EU Why has noncompliance been declining since the 1990s even though the EU was adding member states and numerous laws B rzel debunks conventional wisdoms in EU compliance research showing that noncompliance in the EU is not caused by the new Central and Eastern European member states nor by the Eurosceptic member states So why do these states take the brunt of Europe s misplaced ire Why Noncompliance introduces politicization as an explanatory factor that has been long overlooked in the literature and scholarship surrounding the European Union B rzel argues that political controversy combined with voting power and administrative capacity explains why noncompliance with EU law has been declining since the completion of the Single Market cannot be blamed on the EU s Central and Easter European member states and is concentrated in areas where EU seeks to protect citizen rights Thanks to generous funding from Freie Universitat Berlin the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Building EU Regulatory Capacity Eva Heims, 2018-09-29 This book examines regulatory capacity beyond the nation state It suggests that we can only understand why EU agencies are able to build EU regulatory capacity if we acknowledge that national regulators provide their expertise staff and resources to the regulatory processes taking place in these EU bodies This raises the puzzle of why national regulators are willing to provide life support to potentially rival organisations The book is devoted to answering this question in order to understand how EU regulatory capacity is created in the absence of a full supranational regulatory bureaucracy To do so the book studies to what extent national regulators from two countries the UK and Germany support EU agencies in their work across four policy sectors drug safety food safety maritime safety and banking supervision The book makes a significant contribution by developing a bureaucratic politics perspective that highlights the importance of national regulators for EU regulatory capacity building

European Integration and Consensus Politics in the Low Countries Hans Vollaard, Jan Beyers, Patrick Dumont, 2014-08-13 The Netherlands Belgium and Luxembourg are well known cases of consensus politics Decision making in the Low Countries has been characterized by

broad involvement power sharing and making compromises These countries were also founding member states of the European Union EU and its predecessors However the relationship between European integration and the tradition of domestic consensus politics remains unclear In order to explore this relationship this book offers in depth studies of a wide variety of political actors such as governments parliaments political parties courts ministries and interest groups as well as key policy issues such as the ratification of EU treaties and migration policy The authors focus not only on Europeanization but also analyse whether European integration may gradually undermine the fundamental characteristics of consensus politics in the Low Countries Drawing on consociationalism and Europeanization research this volume provides a comprehensive overview of Europeanization in these three EU member states as well as a better understanding of the varieties of consensus politics across and within these countries This book will be of interest to students and scholars of European studies European integration European law political science European political economy and comparative politics

Democracy, Federalism, the European Revolution, and Global Governance Andrea Bosco, 2020-06-10 The European Union is facing today the greatest crisis since its creation Brexit could mean not only the reversal of its steady enlargement from 6 to 28 member states but also the beginning of an inexorable decline leading to its disintegration However few today seem to recollect that it was precisely the British who were the first to promulgate the political culture which inspired the European Union's construction democracy and federalism and the first who tried to realise in June 1940 a European federation on the basis of an Anglo French union This volume traces the fundamental stages of the European unification process placing it in relation to the wider process of world economic and political integration In particular it analyses the historical significance of the European Revolution which is identified in the overcoming of the nation state namely the modern political formula which institutionalised the political division of mankind and the birth of the first truly international state The universal historical significance of the European Revolution lies in its exportability as for the other great European revolutions and therefore its potential as progressively extensible to all the states of the planet Europe was indeed the first region of the world where the barriers between national states fell and a post national political identity emerged complementary to national political identities It is in fact in the context of the European Union that democracy beyond the borders of the nation state has first been realized constituting a guiding principle for global governance Administrative Culture 15 (1) Tiina Randma-Liiv, Riin Savi,

The power of the centre Dionyssis Dimitrakopoulos, 2018-02-28 This book examines a hitherto under researched aspect of the European Union's policy process the extent and the nature of the involvement of central governments in the implementation of EU public policy It discusses how the co ordination of these institutions affects their capacity to shape the way in which the commitments that they make in Brussels are turned into concrete reality at the national level It shows that the nature of their involvement in implementation reflects the pattern of their involvement in the formulation of EU policy However since implementation unfolds over long periods of time its patterns can change over time The author draws on

empirical evidence regarding the liberalisation of public procurement to demonstrate how the institutions of central governments bring about change Comparing the central governments of Greece France and Britain over a twenty five year period the author demonstrates that far from being the passive conduits of pressure emanating from the EU the institutions of national central governments actively steer the implementation of EU public policy

Environmental Law: Text, Cases & Materials Elizabeth Fisher,Bettina Lange,Eloise Scotford,2013-04-25 This new title offers a compact and complete resource for students featuring extracts from leading cases and articles alongside clear explanations and insightful analysis from an experienced author team This unique approach places environmental law in context enabling you to develop a clear and sophisticated understanding of this dynamic area

Local Policies and the European Social Fund Katharina Zimmermann,2019-10-02 This book reviews how local social and employment policy fields react to the European Social Fund ESF to determine the role of the ESF in local activation policies Drawing on both sociology and political science literature on welfare state reforms the author examines what shapes local policy reactions to ESF and what effects these reactions have on change in local policy fields Comparing data from 18 local case studies across 6 European countries and deploying an innovative mixed method approach the book presents comparative evidence on everyday challenges in the context of the ESF and discusses how these findings are applicable to other funding schemes

Creative Knowledge Cities Marina Van Geenhuizen,Peter Nijkamp,2012-04-01 This book pragmatically explores the myths concepts policies key conditions and tools for enhancing creative knowledge cities The authors provide a critical reflection on the reality of city concepts including university city alignment for campus planning labour market conditions social capital and proximity triple helix based transformation and learning by city governments Original examples from both the EU and US are complemented by detailed case studies of cities including Rotterdam Vienna and Munich The book also examines the reality of knowledge cities in emerging economies such as Brazil and China with a focus on institutional transferability Key conditions addressed include soft infrastructure knowledge spillovers among firms and the connectivity of cities via transport networks to allow the creation of new hubs of knowledge based services

Small States in the European Union Diana Panke,2016-04-01 The most recent EU enlargements have considerably increased the number of small member states In the EU 27 19 countries have fewer votes in the Council of Ministers than the EU average These small states face a series of size related disadvantages in day to day EU negotiations Against this backdrop the book asks are some small states better at coping with structural disadvantages than others How active are small states in participating in day to day EU negotiations and why do some states use negotiation strategies more frequently than others Under which conditions are the different negotiation strategies effective and when can small states punch above their weight Based on more than 100 interviews with policy makers and an analysis of a unique database on the negotiation activities of EU member states this book explains how active participation is essential for the shaping success of small states and shows that small states are more influential with persuasion based

rather than bargaining based strategies Two case studies on the pesticides and the spirit drinks regulations further reveal that persuasion strategies are especially effective if the arguments match the nature of the issue at stake and resonate well with prior beliefs of addressees No other study comprehensively analyzes small states in a comparative perspective examines their activity levels in EU negotiations and outlines which conditions are needed for the effectiveness of a broad range of strategies An indispensable resource for students and researchers interested in how and under which conditions small states can influence policies in negotiations beyond the nation state *Oganisation Institutionnelle de la Gestion de L'eau Aux XIXe Et XXe Siecles* J. C. N. Raadschelders, 2005 Water management has become a major issue for public policies at any latitude How and why this happened could not be assessed efficiently without developing a longitudinal and comparative analysis such as the one in this book Institutional arrangements for the provision and the use of water are peculiarly persistent as well as remarkably resilient This makes them an ideal subject of an historical account Not that history is worth writing about only when it treats immutable phenomena On the contrary its main purpose is to record changes and possibly explain them But long lasting continuity urges the scholar to venture into the remote past since only there are to be discovered the initial causes and the deeper meanings of the institutions under scrutiny Also continuity makes the strength of path dependency all the more evident and consequently underlines the weight of history **Environmental Law** Elizabeth Fisher, Bettina Lange, Eloise Scotford, 2019 *Environmental Law Text Cases and Materials* offers a comprehensive critical and case focused approach to the subject combining insightful author commentary with carefully selected extracts to fully support students *A Matter of Style?* Louisa Bayerlein, Christoph Knill, Yves Steinebach, 2020-07-23 International public administrations IPAs have become an essential feature of global governance contributing to what some have described as the bureaucratization of world politics While we do know that IPAs matter for international politics we neither know exactly to what extent nor how exactly they matter for international organizations policy making processes and subsequent outputs This book provides an innovative perspective on IPAs and their agency in introducing the concept of administrative styles to the study of international organizations and global public policy It argues that the administrative bodies of international organizations can develop informal working routines that allow them to exert influence beyond their formal autonomy and mandate The theoretical argument is tested by an encompassing comparative assessment of administrative styles and their determinants across eight IPAs providing rich empirical insight gathered in more than 100 expert interviews **Towards A New Executive Order In Europe?** Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts

of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of West European Politics

Interest Group Organisation in the European Union Michelle Hollman, 2018-06-14 The investigation of the internal workings of interest groups opens the view on the behavioural dynamics within these organisations By analysing their intraorganisational structures this book explains how groups prepare to become active in the European Union and why we observe contact conflict and cooperation of interest groups and other political actors in the European arena The book presents four causal mechanisms which explain on the one hand why interest groups engage with contacts across a diverse set of political actors and on the other hand why some interest organisations are more actionable at the European level than others It furthermore elaborates a typology of interest groups along intraorganisational criteria The analysis of twelve differing case studies provides a rich empirical ground to explain how and why certain intraorganisational processes unfold within interest groups It thereby sheds light on the behavioural organisational patterns which drive interest group agency in European multi level politics This book will be of key interest to students and scholars of interest groups lobbying European Union politics and more broadly to public policy administration and comparative politics

Europeanization and Transnational States Bengt Jacobsson, Per Lægreid, Ove K. Pedersen, 2004-03-01 This book investigates what happens to an organized political unit when it becomes part of a larger entity and in particular how increased European integration and the tentative moves towards a transnational state will affect the European Union's nation state Europeanization and Transnational States provides an extensive comparative survey of the central governments in four Scandinavian countries and analyses the ways in which the European Union has influenced the day to day work of their state administrations It includes coverage of Denmark a long standing member of the European Union Finland and Sweden countries that became members in 1995 and Norway a non member The book utilises various theoretical perspectives such as adaptation to external pressure strategic choice and path dependencies to explain the changes related to increased European integration in central government agencies It concludes that the consequences of Europeanization can be described as the growth of a transnational administration where identities as well as loyalties are created in processes that transcends the borders of states
