twentieth centuries era of European empires warfare and the Cold War It contends that although China and Europe appear superficially to have followed different paths with many problems in their relationship resulting they in fact have a very great deal in common concerning how they have coped with the long shift from ancient civilizations to the modern world of natural science based industrial capitalism *National Security Cultures* Emil J. Kirchner, James Sperling, 2010-07-12 This edited volume examines changes of national security culture and the implications that this has for international security [Ireland in International Affairs](#) Ben Tonra, Eilís Ward, 2002 **Free Movement of Legal Ideas** Thomas Wilhelmsson, 2024-07-11 This seminal book develops a new perspective on the debate concerning the Europeanisation of private law The theory is both realistic building on existing experience and normative as it focuses on the future It outlines good Europeanisation in which legal sources can be used across borders hence the free movement of legal ideas At its core is the analysis of the legal consequences of growing societal uncertainty and increasing use of micro politics leading to a situation where the law develops through small narratives rather than according to a coherent master plan The inevitable rule of law concerns around such a development have to be addressed by transparent legal reasoning The author masterfully illustrates how this can be achieved in decision making across Europe drawing on arguments which are both substantive and authoritative in nature He shows how all legal actors including decision makers and scholars are morally responsible for the choices made This is a fascinating intervention in the field of European private law by one of its leading authorities **A Tale of Two Unions** Mark Corner, 2023-09-01 Brexit is a tale of two unions not one the British and the European unions Their origins are different but both struggle to maintain unity in diversity and both have to face the challenge of populism and claims of democratic deficit Mark Corner suggests that the four nations that make up the UK can only survive as part of a single nation state if the country looks more sympathetically at the very European structures from which it has chosen to detach itself This study addresses both academic and lay audiences interested in the current situation of the UK particularly the strains raised by devolution and Brexit **Mapping European Corporations** Andrea Colli, Abe De Jong, Martin Jes Iversen, 2013-09-13 This book addresses the evolution of the strategies structures ownership patterns and performances of large European corporations since the early 1960s The authors study large and small countries in order to understand how the process of economic integration has affected the patterns of growth and the structural characteristics of the largest firms Drawing both on extensive databases and on case studies the contributions in this volume address the peculiar specificities of large firms in different national contexts adopting a longitudinal long term perspective This volume delivers the first results of an international collective research effort undertaken by several national teams The Mapping Corporate Europe project aims to provide a detailed account of the structural traits of the European Corporation in a framework which includes i a chronological analysis over 50 years starting with the Rome treaty in 1957 ii geographical extension beyond previous analyses for France Germany and the UK by including smaller countries iii firms from other industries in addition to

manufacturing companies and iv attention to internationalisation of European firms These analyses form the basis of a rich description of the developments of large European corporations over the past five decades using both qualitative and quantitative approaches This book was originally published as a special issue of Business History Communitarianism in Law and Society Paul van Seters,2006 In this new collection of essays Paul van Seters brings together an international group of scholars from diverse academic backgrounds to reflect upon the remarkable rise of communitarianism in contemporary studies of law and society These essays critically assess the communitarian perspective in order to gain a more systematic insight into its distinctive constraints and the special opportunities it provides **Culture and Cooperation in Europe's Borderlands** James Anderson,Liam O'Dowd,Thomas M. Wilson,2003 Annotation A third volume of essays from various activities and events organized by the Centre for International Borders Research at Queens University of Belfast considers three modes in the analysis of culture and cross border cooperation cultures of co operation co operation about culture and the impact of culture on forms of co operation as possible strategies in the comparative social science of European borderlands The case studies range from Israel s Green Line to Ulster Unionist identity There is no index Annotation 2004 Book News Inc Portland OR booknews com **Culture and Cooperation in Europe's Borderland** ,2016-08-29 Scholarly interest in the study of state borders and border regions is growing in Europe keeping pace with the remarkable changes associated with the transformation of old borders and the creation of new ones in the European Union and beyond over the last fifteen years Social scientists have increasingly examined cross border co operation as one way to understand the changes which affect European borderlands Ironically given the recent turn to issues of culture and identity in the social sciences one of the most neglected aspects of the critical and comparative analysis of cross border co operation has been culture Culture and Cooperation in Europe s Borderlands the first collection of essays to provide multidisciplinary perspectives on these issues in European borderlands presents three modes of analysis of culture and cross border co operation as a tentative way forward to redress this imbalance These overlapping perspectives on cultures of co operation co operation about culture and the impact of culture on forms of co operation are offered as possible strategies in the comparative social science of European borderlands The contributions to this collection examine some or all of the following cross border cooperation about culture in such areas of culture as tradition language use and rights and education cross border cooperation and culture i e in ways in which culture enhances or hinders economic and political co operation across state borders as for example through issues of national regional and local identity cultural practices and ethnic relations the culture of cooperation i e ways in which co operation across borders creates new cultural codes political practices organizational cultures and transnational social and political institutions *Practising EU foreign policy* Beatrix Futák-Campbell,2017-12-11 This book is a novel contribution to the practice theory turn in International Relations It looks at practitioners approaches to the EU s foreign policy to its eastern neighbourhood particularly Russia and offers a new

methodology for capturing practices using the analytical approach of Discursive International Relations and the Discursive Practice Model Drawing on data from the European Council the European Commission and the European Parliament s AFET committee members the study concludes that EU practitioners are concerned with the collective EU identity normative and moral duties and collective security interests when considering EU policy towards Russia and other eastern neighbours This suggest that practitioners are a lot more pragmatic when it comes to this policy area than previously assumed by the vast literature on the EU as a normative power

Global citizen and European republic Ben Tonra, 2013-07-19 This book available in paperback for the first time offers a new and innovative way of looking at Irish foreign policy linking its development with changes in Irish national identity Many debates within contemporary International Relations focus on the relative benefits of taking a traditional interest based approach to the study of foreign policy as opposed to the more recently developed identity based approach Uniquely this book takes the latter and instead of looking at Irish foreign policy through the lens of individual geo strategic or political interest it is linked to deeper identity changes As one Minister of Foreign Affairs put it Irish foreign policy is about much more than self interest The elaboration of our foreign policy is also a matter of self definition simply put it is for many of us a statement of the kind of people that we are The contributors are drawn from those who have worked alongside Janet Nelson and from some of her former students They include David Bates Stephen Baxter Wendy Davies Paul Fouracre and David Ganz

The Palgrave Handbook of the European Administrative System M. Bauer, J. Trondal, 2015-01-28 Drawing on research from the administrative sciences and using organizational institutional and decision making theories this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU s administrative capacities is essential to understand how it shapes European public policy
