Evaluating Business And Industry Training Evaluation In Education And Human Services:

Evaluating Business and Industry Training Leslie Steven May, Carol Ann Moore, Stephen J. Zammit, 2012-12-06 In the abstract training is seen as valuable by most people in business and industry. However, in the rush of providing training programs on time and within budget, evaluation of training is frequently left behind as a nice-to-have addition if practical. In addition, the training function itself is left with the dilemma of proving its worth to management without a substantive history of evaluation. This book is designed to provide managers, educators, and trainers alike the opportunity to explore the issues and benefits of evaluating business and industry training. The purpose is to motivate more effective decisions for training investments based on information about the value of training in attaining business goals. Without evaluation, the value of specific training efforts cannot be adequately measured; the value of training investments overall cannot be fully assessed; and the contributions of the training function to the corporation's goals cannot be duly recognized. Articles are grouped into three sections, although many themes appear across sections. The first section establishes the context of training evaluation in a business organization. The second section emphasizes evaluation of training products and services, and the third section discusses costs and benefits of evaluation and communication and use of evaluation results in decision making. In Section I, the context of training evaluation is established from a variety of perspectives. First, training and training evaluation are discussed in the context of corporate strategic goals. *The Program Evaluation Standards* Joint Committee on Standards for Educational Evaluation, James R. Sanders, 1994-04-06 *The Program Evaluation Standards* is a must-have book for anyone responsible for reviewing evaluation proposals, planning and conducting evaluations, managing evaluation projects, or judging the merit and worth of evaluations once completed. For experienced practitioners, it provides a set of values and principles by which to guide successful practice; that is, a set of criteria that determines whether educational evaluations are trustworthy and fair. The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas, even those involved in social programming endeavors. For newcomers and those less experienced who may be responsible for commissioning and using evaluations, the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons. The book is an invaluable how-to resource for graduate students venturing out into the field, and it instills a sense of what it means to be a responsible evaluator. For clients or consumers, the book offers advice on what they should expect of an evaluation. Publisher description **Handbook of Human Factors Testing and Evaluation** Samuel G. Charlton, Thomas G. O'Brien, 2019-09-25 Like the first edition, the revision of this successful Handbook responds to the growing need for specific tools and methods for testing and evaluating human system interfaces.
