Evaluating Family Mental Health History Epidemiology And Treatment Issues:

Evaluating Family Mental Health John J. Schwab, Judith J. Stephenson, John F. Ice, 2013-11-11 At the time of this writing there is much uncertainty about the form of this country's future healthcare system and the role of psychiatry and other mental health disciplines in that system. Current experience with various managed healthcare programs is not encouraging. Most often patients with severe psychiatric disturbances receive at best some form of crisis intervention or brief treatment. Marital and family approaches to treatment receive even less support. This discouraging socioeconomic context makes the work of John Schwab and his colleagues even more important than it would be in more favorable times. Their message is clear: The family is crucial to an understanding of psychiatric disorders and must often be the major focus in the treatment of these disorders. This book is unique in its direct reflection of the senior author's long-term professional interests: the family epidemiology and history. A careful reading provides family therapists and researchers with wonderful opportunities to examine the ways in which history, socioeconomic and political contexts, and epidemiology can be used to increase understanding of the family. This history of the family is unusually thorough; in particular, I found fascinating the information about early Egyptian families 3000 B.C. and their accordant high status of women.

Family Functioning John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamentally of human groups is currently perceived to be changing in response to social, biological, cultural, and technological developments in our postmodern society. While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal, the authors of this volume consider them maladaptive. Viewing society from the point of view of clinical psychiatry, they point to greatly increased numbers of children born to single mothers, soaring rates of divorce, a statistically confirmed increase in mental disorders, increase in reported incest, high rates of depression in younger people, and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration. Perceiving a need to obtain information about family functioning that might lead to the increased stability and well-being of this critically important type of system, Dr. John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature, beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies. They found that although these studies represent advances in understanding the family system, some serious problems with the research remain, one of which is confounding variables such as family function and mental or substance abuse disorders, so that if a family member has a problem such as drug abuse, the family is classified as dysfunctional.

and developmental needs of the adolescent Marc Galanter from the Foreword **Psychiatric Mental Health Nursing Research Digest** Joyce J. Fitzpatrick, 2001 **Seminars in General Adult Psychiatry** David Kingdon, Paul

Rowlands, George Stein, 2024-04-18 This long awaited third edition of *Seminars in General Adult Psychiatry* provides a highly readable and comprehensive account of modern general adult psychiatry The text has been fully updated throughout by leading figures in modern psychiatry This new edition covers developments in the understanding of mental disorders service delivery changes to risk assessment and management collaborate care plans and trauma informed care Coverage will also be given to the implementation of the ICD 11 and DSM 5 classification systems and the impact on diagnosis and treatment Key features of the previous edition that have been updated include the detailed clinical descriptions of psychiatric disorders and historical sections with access to the classic studies of psychiatry Additional topics include autism ADHD and physical health This is a key text for psychiatric trainees studying for their MRCPsych exams and a source of continuing professional development for psychiatrists and other mental health professionals *Research Grants Index* National Institutes of Health (U.S.). Division of Research Grants, 1975 *The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management* Liza H. Gold, Richard L. Frierson, 2020-03-08 Charged with updating the preeminent text on suicide the new editors of *The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management* opted not to simply revise existing chapters but instead to steer a bold course expanding reconfiguring and remaking the third edition to reflect the latest research nomenclature and clinical innovations The editorial team and contributors two thirds of whom are new to this edition have taken the intersection of suicide with both mental health and psychosocial issues as their organizing principle exploring risk assessment and epidemiology in special populations such as elderly patients college students military personnel and the incarcerated as well as patients with a variety of psychological disorders including bipolar spectrum personality depressive anxiety posttraumatic stress and other disorders and schizophrenia In addition the book discusses treatment options such as cognitive behavioral therapy dialectical behavioral therapy and pharmacotherapy and settings such as emergency services outpatient inpatient and civil commitment in detail with clinical cases to contextualize the material The new and revised content is extensive A chapter on the influence of sleep and sleep disorders on suicide risk has been included that considers possible mechanisms for this link and discusses practical ways of assessing and managing sleep disorders to mitigate suicide risk Nonsuicidal self injury the prevalence of which is particularly high among youth is addressed in detail differentiating it from and comparing it to suicide attempts discussing risk assessment considering safety interventions examining treatment options and exploring suicide contagion No text on suicide would be complete without a serious exploration of the role of social media and the internet The book presents an update on current research as it pertains to social networking and behavior information access and artificial intelligence and software and includes suggestions for clinicians treating patients at risk for suicide Physician assisted dying PAD also

referred to as aid in dying is arguably a form of suicide and the book includes a thoughtful chapter considering the ethical and practical implications of PAD the murky professional and legal obligations that may arise the demographics of these patients the settings and conditions under which PAD may occur and the role of the attendant clinicians A number of pedagogical features are included to help the reader learn and remember the material including key clinical concepts and abundant case examples Its diverse range of perspectives broad relevance to a wide variety of clinicians and absolutely authoritative coverage makes this new edition of The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management a worthy and indispensable successor
