Evaluating International Humanitarian Action Reflections From Practitioners:

Evaluating International Humanitarian Action Adrian Wood, Adrian P. Wood, Raymond Apthorpe, John Borton, 2001-08-31 Humanitarian intervention has become a much more frequent form of development assistance and there has been a corresponding need to evaluate the effectiveness of such interventions This is the first compilation of the experiences of practitioners engaged in humanitarian programme evaluations and the lessons they have learned The case studies cover the different kinds of humanitarian emergency characteristic of the past decade The contributors address the context in which evaluations of humanitarian assistance take place the actual process of doing evaluations and the lessons for improving how such evaluations might be better undertaken in future This pioneering volume should be of practical value to agencies and individuals engaged in both the delivery of humanitarian assistance in complex emergencies and its evaluation

Humanitarianism and the Quantification of Human Needs Joël Glasman, 2019-12-06 This book provides a historical inquiry into the quantification of needs in humanitarian assistance Needs are increasingly seen as the lowest common denominator of humanity Standard definitions of basic needs however set a minimalist version of humanity both in the sense that they are narrow in what they compare and that they set a low bar for satisfaction The book argues that we cannot understand humanitarian governance if we do not understand how humanitarian agencies made human suffering commensurable across borders in the first place The book identifies four basic elements of needs As a concept as a system of classification and triage as a material apparatus and as a set of standards Drawing on a range of archival sources including the United Nations Refugee Agency UNHCR Médecins Sans Frontières MSF and the Sphere Project the book traces the concept of needs from its emergence in the 1960s right through to the present day and United Nations Secretary General Ban Ki-moon's call for evidence based humanitarianism Finally the book assesses how the international governmentality of needs has played out in a recent humanitarian crisis drawing on field research on Central African refugees in the Cameroonian borderland in 2014-2016 This important historical inquiry into the universal nature of human suffering will be an important read for humanitarian researchers and practitioners as well as readers with an interest in international history and development The Introduction Conclusion and Chapters 1 4 5 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY-NC-ND 4.0 license

Forsythe, 2005-08-11 The International Committee of the Red Cross ICRC coordinates the world's largest private relief system for conflict situations Its staff operates throughout the world and in recent years the ICRC has mounted large operations in the Balkans and Somalia Yet despite its very important role its internal workings are mysterious and often secretive This book examines the ICRC from its origins in the mid nineteenth century up to the present day and provides a comprehensive overview of a unique private organisation whose governing body remains all Swiss but which is recognized in international law as if it were an inter governmental organization David Forsythe focuses on the policy making and field work of the ICRC while not ignoring international humanitarian law He explores how it exercises its independence impartiality and neutrality to try to protect prisoners in Iraq displaced and starving civilians in Somalia and families separated by conflict in the Israeli Palestinian conflict David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association

The Paradoxes of Aid Work Silke Roth, 2015-03-24 This book explores what attracts people to aidwork and to what extent the promises of aidwork are fulfilled Aidland is a highly complex and heterogeneous context which includes many different occupations forms of employment and organizations Analysing the processes that lead to the involvement in development cooperation emergency relief and human rights work and tracing the pathways into and through Aidland the book addresses working and living conditions in Aidland gender relations and inequality among aid personnel and what impact aidwork has on the life courses of aidworkers In order to capture the trajectories that lead to Aidland a biographical perspective is employed which reveals that boundary crossing between development cooperation emergency relief and human rights is not unusual and that considering these fields as separate spheres might overlook important connections Rich reflexive data is used to theorize about the often contradictory experiences of people working in aid whose careers are shaped by geo politics changing priorities of donors and a changing composition of the aid sector Exploring the life worlds of people working in aid this book contributes to the emerging sociology and anthropology of aidwork and will be of interest to professionals and researchers in humanitarian and development studies sociology anthropology political science and

Humanitarianism and Challenges of

Cooperation Volker Heins, Kai Koddenbrock, Christine Unrau, 2016-02-05 Humanitarianism as a moral concept and an organized practice has become a major factor in world society. It channels an enormous amount of resources and serves as an argument for different kinds of interference into the internal affairs of countries and regions. At the same time and for these very reasons it is an ideal testing ground for successful and unsuccessful cooperation across borders. Humanitarianism and the Challenges of Cooperation examines the multiple humanitarianisms of today as a testing ground for new ways of global cooperation. General trends in the contemporary transformation of humanitarianism are studied and individual cases of how humanitarian actors cooperate with others on the ground are investigated. This book offers a highly innovative empirically informed account of global humanitarianism from the point of view of cooperation research in which internationally renowned contributors analyse broad trends and present case studies based on meticulous fieldwork. This book will be of great interest to students and researchers in the areas of political science, international relations and humanitarianism. It is also a valuable resource for humanitarian aid workers.

The Humanitarian Enterprise Larry Minear, 2002 Epilogue discussing the international response to the terrorist attacks of 2001 and the war in Afghanistan. A fundamental text about the future of humanitarianism in the twenty first century. International humanitarian activities have grown enormously in scale over the past decade and the complex links between humanitarian work and the worlds of politics and military engagement have become increasingly contested. Larry Minear uncovers what international humanitarians including the UN, national governments, the Red Cross and many private relief and development agencies have learned about performing humanitarian work well and the arguments that remain unresolved.

The Humanitarian Conscience W. R. Smyser, 2025-08-22 Humanitarian action long dismissed as a realm apart from major foreign policy concerns has become an omnipresent element in international affairs. It now shapes the world in which we live and it will have increasingly important impact on the way decisions are made in international crises. W. R. Smyser looks at the history of humanitarian activity and its growth since the horrors of WWII were made public, tracing its early stages connected to the creation of the Universal Declaration of Human Rights to the present day when human rights groups such as Human Rights Watch are as influential as modern nation states in influencing the course of international events. This is a monumental portrait of the way in which individuals who are not officially part of any government work to alleviate human suffering and physical destruction around the world.

Adventures in Aidland David Mosse, 2011-04-01 Anthropological interest in new subjects of research and contemporary knowledge practices has turned ethnographic attention to a wide ranging variety of professional fields. Among these the encounter with international development has perhaps been longer and more intimate than any of the others. Anthropologists have drawn critical attention to the interfaces and social effects of development's discursive regimes but oddly enough have paid scant attention to knowledge producers themselves despite anthropologists being among them. This

is the focus of this volume It concerns the construction and transmission of knowledge about global poverty and its reduction but is equally interested in the social life of development professionals in the capacity of ideas to mediate relationships in networks of experts and communities of aid workers and in the dilemmas of maintaining professional identities Going well beyond obsolete debates about pure and applied anthropology the book examines the transformations that occur as social scientific concepts and practices cross and re cross the boundary between anthropological and policy making knowledge

Sword & Salve Peter J. Hoffman,Thomas G. Weiss,2006-03-03 Arguing forcefully that changing times are a clarion call for new thinking this book convincingly shows that if humanitarian organizations continue to operate as they have in the past they will fail to help

the very victims whom they try to save Focusing especially on the emergence of new wars Hoffman and Weiss insist that humanitarian organizations must recognize that they live in a political world and that their actions and goals are invariably affected by military action The brand of warfare that erupted in the 1990s marked by civil or transnational armed conflicts featuring potent non state actors altered political economies a high proportion of civilian casualties and a globalized media produced horrors that shocked consciences and led humanitarian agencies to question their unyielding stance of neutrality and impartiality Indeed in a departure from earlier norms and practices some have reinvented their policies and tools and created new humanitarianisms This authoritative book traces the evolution of the international humanitarian system from its inception in the 1860s parses the dynamics of war and emergency response from the 1980s through the current disasters in Afghanistan and Iraq and provides a strategic roadmap for practitioners By bringing historical perspective to bear this volume provides an invaluable analytical framework for grasping the nature of humanitarian crises and how agencies can respond strategically rather than reactively to change Students will find its blend of clearly presented theory and case studies a powerful tool for understanding the roles of state and non state actors in international relations By charting the tides of continuity and change this book will prepare agencies to dodge both figurative and actual bullets that threaten humanitarian action at the outset of the millennium

HIV in World Cultures Gustavo Subero,2016-04-22 This book analyses the way that HIV AIDS is often narrativised and represented in contemporary world cultures as well as the different strategies of remembrance deployed by different sub cultural groups affected by the illness Through a close study of a variety of cultural texts including cinema literature theatre art and photography amongst others it demonstrates the trajectory that such narratives and representations have undergone since the advent of the discovery of the disease in the 1980s Acknowledging the central yet often overlooked role that cultural products have played in the construction of public opinion towards the condition itself and those who suffer it this ground breaking volume focuses on a variety of narratives as well as strategies of coping with HIV AIDS that have emerged across the globe Bringing together

research on the UK North and South America Africa and China it provides rich textual analyses of the ways in which the HIV positive body has been portrayed in contemporary culture with attention to the differences between specific national contexts whilst keeping in view a space of commonality amongst the different experiences reflected in such texts As such it will be of interest to social scientists and scholars of cultural and media studies concerned with cultural production and representations of the body and sickness

Complex Systems Theory and Development Practice Samir Rihani, 2002 Ranging over a wide terrain of social political and economic thinking and specific country experiences the author explains the key concepts in complex systems theory and their possible applications in development practice He examines various development issues and institutions in the light of what he sees as the limitations of rigid linear thinking in an essentially fluid non linear world Little wonder he concludes that the results of half a century of development effort have been so disappointing BOOK JACKET
