Evaluating Research Articles From Start To Finish:

Evaluating Research Articles From Start to Finish Ellen R. Girden, Robert Kabacoff, 2011 Using examples of good as well as flawed research studies this text explains how to decide whether the conclusions reported in an article are justified on the basis of the design and analysis of the experiment **Evaluating Research Articles from Start to Finish** Ellen R.

Girden, 1996-08-06 How does one tell if the appropriate design or analysis was used in a research article Using examples of both good and flawed studies Ellen R Girden shows how to read qualitative and quantitative research articles critically from start to finish She explains how to decide whether the conclusions reported in an article are justified based on the design and analysis of the experiment By first demonstrating how to analyze an article in each design category for example correlational study factor analysis and narrative analysis Girden uses targeted questions to assist the reader's critique of each major section of an article

Evaluating Research Articles from Start to Finish Ellen R. Girden, 1996-08-06 Introduction threats to internal validity threats to statistical conclusion validity plan of the critiques Two sample studies Case studies Narrative analysis Surveys Correlation studies Regression analysis studies Factor analytic studies Discriminant analysis studies Two condition experimental studies Single classification studies Factorial studies Quasi experimental studies

Applications in Operational Cultural: Perspectives from the Field Paula Holmes-Eber, Patrice M. Scanlon, Andrea L. Hamlen, Study Skills for Psychology Students Sylvie Collins, Pauline Kneale, 2014-05-01 The problem with the first year was I didn t know what I didn t know and even when I thought there was something I was supposed to know I didn t know what to do about it This quote from a perplexed undergraduate student illustrates the plight of many first years who feel overwhelmed by the demands made on them at university combined with the expectation of lecturers and tutors that they will already know how to study independently Study Skills for Psychology Students is a light hearted yet comprehensive guide to studying

psychology at university Covering topics such as using the library and other resources making effective notes in lectures and successful revision skills the authors provide a practical guide to help the new student get the most out of their psychology course Finally in addition to the generic information needed by all students embarking on a degree course Study Skills for Psychology Students includes psychology specific material on Ethics Professional Data Acquisition and Interviewing Skills

Thinking Nursing Mason, Tom, Mason-Whitehead, Elizabeth, 2003-12-01 Thinking Nursing This major new textbook provides a unique one stop resource that introduces nursing students to the disciplines that underpin nursing practice The broad range of subjects covered includes Sociology Psychology Anthropology Public Health Philosophy Economics Politics and Science Written by nursing lecturers with nursing students in mind this book enables nurses to grasp the principles behind these disciplines and apply the concepts to everyday health care practices Each chapter offers The theoretical background of the major tenets of each discipline A comprehensive discussion of how they relate to practice Cross references to other relevant chapter sections Suggestions for further reading A glossary of key terms Practical advice is also available in a chapter dedicated to methods of research planning and construction of written work Moreover the textbook encourages creative and lateral thinking beyond its use in planning and writing assignments Thinking Nursing is essential reading for nursing students on Common Foundation Programmes both at diploma and degree level and qualified nurses undertaking additional specialist training including masters degrees as well as those involved in planning designing and the implementation of educational courses for nurses

How to Read, Evaluate, and Use Research Sharon L. Nichols, Paul A. Schutz, Sofia Bahena, 2023-06-20 This text helps students learn how to select read understand and evaluate the research they read Many texts focus on the process of conducting research and not as much on how students in applied disciplines can assess and apply that research in their future professional lives this text aims to fill that gap Organized in the same way as a research article the book includes a chapter on literature reviews and research questions followed by three methods chapters quantitative qualitative and mixed methods and a chapter on research conclusions and implications The book includes a wealth of pedagogical features including Learning Objectives Check Your Understanding questions a Guided Application exercise in each chapter suggested further reading and a glossary Three research articles used as exemplars throughout are included in the appendix to the book

[An Introduction to CBT Research](#) Sarah Rakovshik, 2019-09-30 This highly practical book will guide students through the different levels of research within CBT by addressing the general principles how to understand statistics and tackling with general principles It also highlights how to critically engage with interpret and evaluate research so that it can be used to shape practice This important book will help readers see the relevance of research in their working lives and empower them to become active and keen researchers

The Counselling and Psychotherapy Research Handbook Andreas Vossler, Naomi Moller, 2014-10-16 Research is a vital and often daunting component of many counselling and psychotherapy courses As well as completing their own research projects trainees across modalities must

understand the research in the field what it tells them and how to do it Breaking down this seemingly mountainous task into easy to swallow pieces this book will navigate your students through each stage of the research process from choosing a research question through the pros and cons of different methods to data analysis and writing up their findings Written by leading contributors from the field including John McLeod Mick Cooper and Tim Bond each chapter features points for reflection engaging activities and suggestions for further reading helping students to engage with all aspects of research An original graphic narrative runs throughout the book bringing this complex topic to life in a unique way Whether embarking on research for the first time or already a little familiar with research and research methods this unique guide is something counselling and psychotherapy students will turn to continually throughout their research projects

Research Methods in Library and Information Science Lynn Silipigni Connaway, Marie L. Radford, 2021-05-24 The seventh edition of this frequently adopted textbook features new or expanded sections on social justice research data analysis software scholarly identity research social networking data science and data visualization among other topics It continues to include discipline experts voices The revised seventh edition of this popular text provides instruction and guidance for professionals and students in library and information science who want to conduct research and publish findings as well as for practicing professionals who want a broad overview of the current literature Providing a broad introduction to research design the authors include principles data collection techniques and analyses of quantitative and qualitative methods as well as advantages and limitations of each method and updated bibliographies Chapters cover the scientific method sampling validity reliability and ethical concerns along with quantitative and qualitative methods LIS students and professionals will consult this text not only for instruction on conducting research but also for guidance in critically reading and evaluating research publications proposals and reports As in the previous edition discipline experts provide advice tips and strategies for completing research projects dissertations and theses writing grants overcoming writer's block collaborating with colleagues and working with outside consultants Journal and book editors discuss how to publish and identify best practices and understudied topics as well as what they look for in submissions

Doing Research with Children Anne D Greig, Jayne Taylor, Tommy MacKay, 2012-11-16 This Third Edition of *Doing Research with Children* is practical introduction to the process of designing doing and writing up research with children and young people At the centre is a commitment to engaging with children and young people as active research participants rather than as passive subjects In the new edition you'll find up to date information on the fast changing political and ethical debates around research with children and young people as well as guidance on how to carry out research yourself Divided into three sections the new edition covers the main theories and approaches of research with children and young people expanded guidance on research ethics techniques for conducting both qualitative and quantitative research more on analysing your research a brand new chapter on communicating your research findings This is a must have guide for students and practitioners who are engaging in research with children and

young people *Examining the Changing Role of Supervision in Doctoral Research Projects: Emerging Research and Opportunities* Steenkamp, Annette Lerine, 2017-06-16 Academic research projects contribute to many advancements in modern life. Thus the supervision of such works on the doctoral level is extremely important and must constantly evolve in order to help disseminate the most accurate information available. *Examining the Changing Role of Supervision in Doctoral Research Projects: Emerging Research and Opportunities* is a pivotal scholarly resource that examines the current practices that research supervisors adhere to and outlines innovative ways that these techniques can be improved upon. Covering relevant topics such as study environments, technology support, research networks, and research design, this publication is ideal for academics, graduate students, and researchers that are interested in discovering a more streamlined method of supervision for research works.

Nursing Research: Reading, Using and Creating Evidence Houser, 2018 *Nursing Research: Reading, Using and Creating Evidence* Fourth Edition focuses on the concept that research is essential as evidence for nursing practice. Written in a conversational tone and using a reader-friendly approach, this text teaches students how to translate research into evidence in a practical way. The text enables students to gain a fundamental understanding of all types of research used for evidence through its emphasis on research methods, use of research evidence in clinical decision making, and ways to engage in evidence-based practice. The Fourth Edition highlights the importance of translating research findings into evidence as the most critical step for improving patient care. This updated edition contrasts six different models for organizational evidence-based practice, including Magnet designation requirements, collaboration between researchers and practitioners for knowledge translation, community and home health evidence-based practice, and the challenges of creating an organizational culture that values evidence-based practice.

Assessing Evidence to Improve Population Health and Wellbeing Carmen Aceijas, 2011-07-01 Written to support practitioners undertaking a Masters in public health, this book considers the main concepts, issues, and methodologies of the second core competence of the Public Health Skills and Career Framework: Assessment of evidence of the effectiveness of interventions, programmes, and services to improve population health and wellbeing. Coverage includes the theoretical definition of evidence and its use in public health, the role of critical appraisal methods and tools in evidence assessment, and how Effectiveness, Efficiency, and Quality inform evidence. The book is packed with case studies and activities to help link theory and practice and prompt personal reflection.

Nursing Research: Reading, Using and Creating Evidence Janet Houser, 2016-12-14 Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities, and assessments, a full suite of instructor resources, and learning analytics reporting tools. *Nursing Research: Reading, Using and Creating Evidence* Fourth Edition is an essential text for nursing students to build the skills necessary for translating research into evidence. The Fourth Edition focuses on the Nursing Practice Guidelines and emphasizes evidence-based practice in the profession of nursing. To reinforce these concepts, the author cites a particular article that is appraised

throughout the entire text The Fourth Edition also focuses on the dissemination of information and research best practices as conferences and other such resources become more available to students and professionals Key Features Emphasis on Nursing Practice Guidelines New evaluation tool for reviewing a research article Extensive PICO questions throughout the text Addition of the contemporary PECO question Poster template added to the chapter on translation
