Evaluation and Decision Making for Health Services Programs James E. Veney, Arnold D. Kaluzny, 1984 **Federal Program Evaluations**, 1983 Contains an inventory of evaluation reports produced by and for selected Federal agencies including GAO evaluation reports that relate to the programs of those agencies **Evaluation & Decision Making for Health Services** James E. Veney, Arnold D. Kaluzny, 1998 **The Practice of Health Program Evaluation** David Grembowski, 2015-09-16 Reflecting the latest developments in the field the Second Edition provides readers with effective methods for evaluating health programs policies and health care systems offering expert guidance for collaborating with stakeholders involved in the process Author David Grembowski explores evaluation as a three act play Act I shows evaluators how to work with decision makers and other groups to identify the questions they want answered Act II covers selecting appropriate evaluation designs and methods to answer the questions and reveal insights about the program s impacts cost effectiveness and implementation and Act III discusses making use of the findings Packed with relevant examples and detailed explanations the book offers a step by step approach that fully prepares readers to apply research methods in the practice of health program evaluation **The Influence of Economic Evaluation Studies on Health Care Decision-making** J. Matthias Schulenburg, 2000 Despite the growing activity in the field of health economics very little is known about the influence of economic evaluation studies on health care decision making in the EU member states Several investigations about the impact of health economic studies on decision making have been done but most of them did not involve decision makers themselves In this work the results of the EUROMET survey are reported and discussed To allow an international perspective different types of decision makers in nine European countries were surveyed Besides the extent of knowledge about economic evaluation the actual and potential use of study results as well as barriers and incentives for the use of economic evaluation studies had been investigated Compendium of HHS Evaluations and Relevant Other Studies, 1988 **Evaluation and Decision Making for Health Services** James E. Veney, Arnold D. Kaluzny, 1991 This book provides you with the tools techniques for making sound management decisions about the success of new or existing programs services The third edition of this authoritative guide includes updated examples illustrations references as well as new information on cost utility measures operations research cost benefit cost effectiveness analysis more *Methods for the Economic Evaluation of Health Care Programmes* M. F. Drummond, 2005 This highly successful textbook is now available in its third edition Over the years it has become the standard textbook in the field world wide It mirrors the huge expansion of the field of economic evaluation in health care since the last edition was published in 1997 This new edition builds on the strengths of previous editions being clearly written in a style accessible to a wide readership Key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study The methodological features of the basic forms of analysis are then explained in more detail with special emphasis of the latest views on productivity costs the

characterisation of uncertainty and the concept of net benefit The book has been greatly revised and expanded especially concerning analysing patient level data and decision analytic modelling There is discussion of new methodological approaches including cost effectiveness acceptability curves net benefit regression probabilistic sensitivity analysis and value of information analysis There is an expanded chapter on the use of economic evaluation including discussion of the use of cost effectiveness thresholds equity considerations and the transferability of economic data This new edition is required reading for anyone commissioning undertaking or using economic evaluations in health care and will be popular with health service professionals health economists pharmacand health care decision makers It is especially relevant for those taking pharmacoeconomics courses Federal Program Evaluations États-Unis. Evidence-based Decisions and Economics Ian Shemilt,Miranda Mugford,Luke Vale,Kevin Marsh,Cam Donaldson,2011-09-22 The need for evidence based decisions that take account of both effectiveness and economics is greater now than ever Using case studies and illustrative examples throughout the authors describe how the activities and outputs of evidence synthesis systematic review economic analysis and decision making interact within and across different spheres of health and social policy and practice Expanding on the first edition the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare education and criminal justice as well as health care Written by economists and health services researchers closely involved in developing evidence based policy and practice it showcases current state of the art methodology and will be an invaluable read for all policy makers and practitioners using evidence to inform decisions analysts conducting research to support decisions and students discovering the need for evidence based decisions to incorporate economic perspectives and evidence *Standards for the Socioeconomic Evaluation of Health Care Services* Bryan R. Luce,Anne Elixhauser,2012-12-06 Over the past decades health care delivery once characterized by clearly defined relationships between medical professionals regulators and industry has become much more complex Traditional roles and relationships are changing and new decision makers are entering the scene They bring into the discussion the need for cost containment and the changing perceptions of the public with regard to the risks and benefits of health care outcomes As benefits of medical care are increasingly questioned and as scepticism and fear of advanced technologies are demonstrated by a growing body of people decision making must move beyond medical concerns to encompass economic political and sociological considerations This evolution has also affected the pharmaceutical industry Public perception of responsibility for product safety is no longer limited to regulators and physi

cians Manufacturers previously unencumbered by social policies governmental preoccupations or public expectations are now held accountable for product safety As a certain amount of risk acceptance is however a prerequisite for the further development of health care goods it has to be carefully balanced against society S demand for safety To weigh risks against benefits to define acceptable risk and to exclude what no longer falls within this category remain perpetual challenges Accordingly health care outcomes have to be assessed not only from a clinical point of view but also from an economic and societal perspective The assessment of drug risks and benefits has become an important political issue world wide
