Annual Review of Nursing Research, Volume 2, 1984 Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN, Harriet H. Werley, PhD, 1984-01-15 This volume should be quite useful to the target audience It provides a good foundation for evidence based practice and further research 4 stars Doody's Book Review Service The nursing community is continually challenged with expanding the empirical knowledge base that informs rural nursing practice This volume of the prestigious Annual Review of Nursing Research Focus on Rural Health addresses this challenge Contributors have developed creative and effective strategies to identify relevant research and present them in the context of the rural delivery system *Impact Analysis for Program Evaluation* Lawrence B. Mohr, 1995-09-07 Clarifies the concepts used in impact analysis and provides in depth methodologies for research Educator's Update I learned much from reading the first edition of this book years ago and this edition retains many of the positive features of that version especially the regression framework and the lucid discussion of how regression discontinuity and randomized experimentation fit into that framework I think that if this were the only book a person ever learned from that person would be well taught in the art of impact assessment not be misled into going seriously wrong and be more capable of doing impact assessment than most other applied social scientists William R Shadish Jr Memphis State University Successful in the first edition for its integration of multiple regression with evaluation design and for its systematic ways to select the proper goals for single and multiple outcome evaluations this new edition is more helpful than ever *Impact Analysis for Program Evaluation Second Edition* has been revised to cover new issues and to further clarify the concepts used in impact analysis It offers expanded coverage and explanation of quasi experiments a new section on the theory of impact analysis updated information on the use of qualitative research for impact analysis and expanded coverage of significance testing for program evaluation It also includes an explanation of why the comparative change design i e Campbell and Stanley's nonequivalent control group design is better than an ex post facto design from the standpoint of causal inference A clarification of the effects of volunteering or self selection is offered along with a new simplified appendix on regression artifacts Evaluators and applied researchers who want to enhance their understanding of research design and of threats to valid inference will find this book an effective guide to improving the utility of their evaluation results **The Science of Public Policy: Policy process, part II** Tadao Miyakawa, 1999 **Foundations of Program Evaluation** William R. Financial Services Partnerships Peter Samuel, 2013-11-12 The purpose of this book is to evaluate the debate on partnership using original research data Samuel provides a novel categorisation with which to synthesise and clarify a highly diverse literature on labour management partnership thus helping to refine the contemporary partnership debate Secondly he clarifies the circumstances under which effective labour management partnership is possible while simultaneously elaborating why the achievement of mutual gains is highly improbable in a liberal market context Thirdly the book presents an integrated analysis of the interplay between macro meso industry and micro level factors Fourthly the research design enables the study to go beyond the case studies to make defensible empirical generalizations at the level of the industry Finally it advances a theoretical explanation of labour management partnerships in liberal market economies by bridging two opposing neo institutional positions in the social sciences
