

Essay on Criminal Justice System: Program Analysis and Policy Evaluation Essay

Introduction

The inquiry of 'how, why and to what effect government pursue particular courses of action and inaction', "what the government does, why they do it and what dissimilarity does it make" is called. Policy Analysis The whole process of policy analysis entails problems identity, the policy formulae, the how to legitimize the policy and the evaluation being the last phase Evaluation inquiry is also varied, namely, Procedure evaluation, Effect Evaluation, Valuation and Watching. This project focuses on establishing a platform for correcting a crime puzzle besides strategy assessment on the theoretic platform. Therefore, the following questions need to be asked; do the chosen programs perform accurately? Will they produce the required outcome? Will they offer sufficient assistances to defend their outlays? Is the programs worth for improving, maintenance or elimination (Theo, 2007).

The law enforcement in the United States of America is experiencing at present crisis of legitimacy. This is because of the increase in crime rates that is either cyber related or the obvious crimes like murder, theft and even rape. Numerous Americans (precisely those from the isolated communities) seem to be opposing the legality of law enforcement. Since it pertains using exertion and communications with the "African American" (Scott & Justine, 2015). Therefore the Department of Justice with the assistance of NIJ as a research branch has come up with a program to help fight crime. Having carried out a research on the various methods of tackling crimes, majority have not shown any change among the criminals they go back to the same crime (only few) change and this does not make any difference.

Various scholars have discovered that, the incapacitation of offenders to decrease criminal activities is an option that is expensive. Further, the option of taking the offenders before courts for judgment seems to be slightly efficient compared to imprisonment in demoralizing more offending. Restriction is one of the conventional methods of preventing crime that the justice system can use. It has been presumed that, when penalties for the offences are tough, the offenders will be deterred from committing the crime acts and the remaining will be restricted from starting a profession in crime. Sadly, no evidence is available showing that the tough penalties possess a peculiar capability in crimes control. This sphere of inquiry bears very costly material and it is still controversial, though proof for the hindrance effect of tough penalties seem not to exist apart from special and limited situations (for instance, it might, apparently, decrease the evasion of tax). Hence, the state should not look on the side of evidence produced from applying strict punishments as deterrent. Other features of restriction do, and however appear to be efficient. For instance whereas the strict sanction may not seem to deter crime, the urgency and surety of capture seem to. This implies; the bigger the opportunity that a person might be held and punished for a crime and sooner this it will happen, the lesser offence might be committed (Criminal Justice Handbook Series, 2008 p 20).

How is deterring a program of crimes control effective? In few cases, deterring has been efficient in the delivery of services. As mentioned early, those who evade have had their properties ceased if they do not pay up and this has made it the responsibility of every citizen to be apt in remitting their dues to the state. Another instance given is failure to observe the traffic rules like over speeding,

Advancing Criminology and Criminal Justice Policy is a definitive sourcebook that is comprised of contributions from some of the most recognized experts in criminology and criminal justice policy. The book is essential reading for students taking upper level courses and seminars on crime, public policy and crime prevention as well as for policy makers within the criminal justice sphere. There has been a growing recognition of the importance of evidence based criminal justice policies from criminologists, policymakers and practitioners. Yet despite governmental and professional association efforts to promote the role of criminological research in criminal justice policy, political ideologies, fear and the media heavily influence criminal justice policies and practices. Bridging the gap between research and policy, this book provides the best available research evidence, identifies strategies for informing policy and offers direct policy recommendations for a number of pressing contemporary issues in criminal justice including: Delinquency intervention programs and community crime prevention; Problem oriented policing and the science of hot spot policing; Sentencing and drug courts; Community corrections; incarceration and rehabilitation; Mental illness; gender; aging and indigenous communities.

Criminal Justice Policy Stacy L. Mallicoat, Christine L. Gardiner, 2013-10-15 Criminal Justice Policy provides a thematic overview of criminal justice policy and its relationship to the American criminal justice system. Scholars, practitioners and politicians continually debate the value of these policies in their evaluations of the current system. As the nature of this subject involves a host of issues including politics, public sentiment, research and practice, the authors expertly highlight these concerns on criminal justice policy and address the implications for the overall system and society at large. This text is organized into three parts: Foundations of criminal justice policy focuses on the role of politics, best practices and street level bureaucracy in criminal justice policy; Criminal justice policy in action provides an analysis of fifteen different policy issues in criminal justice such as immigration, drugs, mental health and capital punishment. Each section begins with a basic summary of the policy accompanied by a brief synopsis of the framing issues. This brief but informative summary draws students attention to essential concepts and ideas, provides a roadmap for what they can expect to learn and ensures continuity throughout the text. The text concludes with a discussion about the future directions of criminal justice policy.

Mears,2024 An evidence based approach to crime and justice policy can go a long way toward ensuring that the best available research is considered in decisions that bear on the public good However the term evidence based is characterized by a great deal of rhetoric Indeed there remains a marked disjuncture between calls for evidence based policy and an understanding of what it means for policy to be evidence based The calls for evidence based policy nonetheless provide a powerful foundation for propelling a movement toward bringing about rational cost effective and humane policies for the betterment of society This handbook showcases the state of research on evidence based crime and justice policy and the challenges that impede its creation and use The volume has three core objectives to promote new and productive ways to think about evidence based policy to demonstrate how research can contribute to and

guide evidence based policy in juvenile justice criminal justice and alternatives to system responses and to identify strategies that can increase reliance on evidence based policy To meet these objectives each chapter is guided by several central questions What do we know about evidence based policy and practice in crime and justice How can we improve knowledge of evidence based policy and practice How can we promote more use of evidence based policy and practice Taken as a whole the volume emphasizes the critical need for policies that are grounded in high quality research that address critical research gaps and that fully acknowledge the limitations of what extant research can do to inform policy decisions
