Measuring the Contribution of Small-scale Aquaculture

Melba G. Bondad-Reantaso,Mark Prein,2009 The FAO Expert Workshop on Methods and Indicators for Evaluating the Contribution of Small scale Aquaculture to Sustainable Rural Development held in Nha Trang Viet Nam from 24 to 28 November 2009 attempted to develop an indicator system to measure the contribution of SSA The workshop used a number of processes and steps in the developing the indicator system including i understanding the subject of measurements ii identifying an analytical framework and rating criteria iii developing a list of SSA contributions iv categorising the contributions v devising and organising the indicators of

contribution and vi measuring the indicators The major outcome was the development through an iterative process of an indicator system which can provide a good measure of the contribution of SSA based on agreed criteria accuracy measurability and efficiency and the sustainable livelihood approach analytical framework which consists of five capital assets human financial physical social and natural and can be used for various livelihoods options Environmental Risk Assessment of Genetically Modified Organisms A. R. Kapuscinski,2004 The decline of many individual and wild fish stocks commanded an increase in aquaculture production to meet the protein demands of a growing population Transgenic methods received attention as a potential factor in meeting these demands This book presents methodologies for assessing ecological risks associated with transgenic fish **Disaster Response and Risk Management in the Fisheries Sector** Lena Westlund,Food and Agriculture Organization of the United Nations,2007-01-01 In order to provide adequate disaster response in emergency situations and to help communities to be better prepared and warned of potential threats through preventive disaster risk management DRM it is imperative that the particular characteristics of the fisheries and aquaculture sectors and the livelihood contexts of small scale fishers and fish farmers and their communities be clearly understood from the technical social and economic points of view Disasters cause serious disruption to communities their governments and society as a whole In many cases the rehabilitation and reconstruction process necessitates external assistance to guarantee return to basic livelihoods as quickly as possible Therefore one of the main purposes of this document is to support policy and decision makers involved in disaster response and DRM by increasing their effectiveness in addressing the needs of fishers and coastal communities in relation to disasters *Building climate-resilient food systems for Pacific Islands* Bell, J.,Taylor, M.,2015-05-29 This report summarizes the recent work done in the Pacific region to assess the vulnerability of agriculture fisheries and aquaculture to climate change and provides the diagnosis and analysis required to identify cost effective investments that could be made under the CGIAR Research Program on Climate Change Agriculture and Food Security CCAFS Theme 1 Adaptation to progressive climate change to bring the adaptations recommended for agriculture fisheries and aquaculture to fruition by filling important gaps in knowledge **The Philippine Archipelago** Yves Boquet,2017-04-19 This book presents an updated view of the Philippines focusing on thematic issues rather than a description region by region Topics include typhoons population growth economic difficulties agrarian reform migration as an economic strategy the growth of Manila the Muslim question in Mindanao the South China Sea tensions with China and the challenges of risk vulnerability and sustainable development State of World Aquaculture 2006 Food and Agriculture Organization of the United Nations. Inland Water Resources and Aquaculture Service,2006-01-01 Aquaculture is developing expanding and intensifying in almost all regions of the world except in sub Saharan Africa Although the sector appears to be capable of meeting the gap between future demand and supply for aquatic food there are many constraints and challenges which must be addressed in order to at least maintain the present level of per capita consumption at the global level Key issues are the

need for enhanced enforcement of regulation and better governance of the sector as well as greater producer participation in the decision making and regulation process This publication examines past trends in aquaculture development as well as the current global status drawing on a number of national and regional reviews Information Resources in Toxicology, Volume 1: Background, Resources, and Tools ,2020-05-16 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study research and practice of toxicology Both volumes represents a unique wide ranging curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology s subdisciplines This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools Due to the increasing size of the hardcopy publication the current edition has been divided into two volumes to make it easier to handle and consult Volume 1 Background Resources and Tools arranged in 5 parts begins with chapters on the science of toxicology its history and informatics framework in Part 1 Part 2 continues with chapters organized by more specific subject such as cancer clinical toxicology genetic toxicology etc The categorization of chapters by resource format for example journals and newsletters technical reports organizations constitutes Part 3 Part 4 further considers toxicology s presence via the Internet databases and software tools Among the miscellaneous topics in the concluding Part 5 are laws and regulations professional education grants and funding and patents Volume 2 The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries followed by a glossary of toxicological terms and an appendix of popular quotations related to the field The book offered in both print and electronic formats is carefully structured indexed and cross referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed Among the many timely topics receiving increased emphasis are disaster preparedness nanotechnology omics risk assessment societal implications such as ethics and the precautionary principle climate change and children s environmental health Introductory chapters provide a backdrop to the science of toxicology its history the origin and status of toxicoinformatics and starting points for identifying resources Offers an extensive array of chapters organized by subject each highlighting resources such as journals databases organizations and review articles Includes chapters with an emphasis on format such as government reports general interest publications blogs and audiovisuals Explores recent internet trends web based databases and software tools in a section on the online environment Concludes with a miscellany of special topics such as laws and regulations chemical hazard communication resources careers and professional education K 12 resources funding poison control centers and patents Paired with Volume Two which focuses on global resources this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field **Ecosystem Approaches to Fisheries** Villy Christensen,Jay

Maclean,2011-03-03 Inspired by the work of the renowned fisheries scientist Daniel Pauly this book provides a detailed overview of ecosystem based management of fisheries It explores the complex and interdisciplinary nature of the subject by bringing together contributions from some of the world s leading fisheries scientists managers and conservationists Combining both research reviews and opinion pieces and reflecting the breadth of Pauly s influence within the field the book illustrates the range of issues associated with the implementation of the ecosystem approach and the challenge of long term sustainability Topics covered include global biodiversity the impact of human actions on marine life the implications for economic and social systems and the role of science in communicating and shaping ocean policy to preserve resources for the future This book provides a complete and essential overview for advanced researchers and those just entering the field

Governability of Fisheries and Aquaculture: Theory and Applications Maarten Bavinck,Ratana Chuenpagdee,Svein Jentoft,Jan Kooiman,2013-04-10 Following from Fish for Life Interactive Governance for Fisheries Kooiman et al 2005 which presents an interdisciplinary and intersectoral approach to the governance of capture and aquaculture fisheries this volume pursues what interactive governance theory and the governability perspective contribute to the resolution of key fisheries problems these include overfishing unemployment and poverty food insecurity and social injustice Since these problems are varied and can be felt among governments resource users and communities globally the diagnosis must be holistic and take account of principles institutions and operational conditions The authors argue that wicked problems and institutional limitations are inherent to each setting and must be included in the analysis The volume thereby offers a new lens and a systematic approach for analysing the nature of problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world s fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado *Rich food for poor people: Genetically improved tilapia in the Philippines* Sivan Yosef, The making of a blue revolution in Bangladesh: Enablers, impacts, and the path ahead for aquaculture Shahidur Rashid,Xiaobo Zhang,2019-08-07 A rapid increase in aquaculture production in Bangladesh has lowered fish prices increased protein consumption and reduced poverty The Making of a Blue Revolution in Bangladesh offers a valuable case study of how this transformation in the fish value chain has occurred and how it has improved the lives of both fish producers and fish consumers and considers the future potential of aquaculture in Bangladesh *Information Resources in Toxicology* P.J. Bert Hakkinen,Asish Mohapatra,Steven G. G. Gilbert,2009-08-19 This latest version of Information Resources in Toxicology IRT continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field This book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields

such as environmental and occupational health chemical safety and risk assessment Thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to Web sites IRT IV is highly structured providing easy access to its information Among the hot topics covered are Disaster Preparedness and Management Nanotechnology Omics the Precautionary Principle Risk Assessment and Biological Chemical and Radioactive Terrorism and Warfare are among the designated International in scope with contributions from over 30 countries Numerous key references and relevant Web links Concise narratives about toxicologic sub disciplines Valuable appendices such as the IUPAC Glossary of Terms in Toxicology Authored by experts in their respective sub disciplines within toxicology

Special Evaluation Study on Small-scale Freshwater Rural Aquaculture Development for Poverty Reduction Asian Development Bank, 2005 The Special Evaluation Study on Small scale Freshwater Rural Aquaculture Development for Poverty Reduction looks at small scale aquaculture from the viewpoint of poverty reduction What are the main factors that enable fish farming to generate livelihoods and reduce poverty What steps can be taken to overcome constraints and optimize these factors The first part of the report highlights the importance of access to capital assets human social natural physical and financial and transforming processes such as markets institutions and services The second part looks at three countries in which the freshwater aquaculture sector is of vital importance Bangladesh the Philippines and Thailand The studies provide lessons that researchers and development workers working towards poverty reduction will find useful

Vulnerability of Tropical Pacific Fisheries and Aquaculture to Climate Change Johann D. Bell, Johanna E. Johnson, Alistair J. Hobday, 2011-01-01

Securing food for all in Bangladesh Ahmed, Akhter, ed., Islam, Nurul, ed., Mujeri, Mustafa K., ed., 2021-11-05 Securing Food for All in Bangladesh presents an array of research that collectively address four broad issues 1 agricultural technology adoption 2 input use and agricultural productivity 3 food security and output market and 4 poverty food security and women s empowerment The fifteen chapters of the book address diverse aspects within these four themes Access to sufficient food by all people at all times to meet their dietary needs is a matter of critical importance Despite declining arable agricultural land Bangladesh has made commendable progress in boosting domestic food production The growth in overall food production has been keeping ahead of population growth resulting in higher per capita availability of food over time In the early 1970s Bangladesh was a food deficit country with a population of about 75 million Today the population is 165 million and the country is now self sufficient in rice production which has tripled over the past three decades Along with enhanced food production increased income has improved people s access to food Furthermore nutritional outcomes have improved significantly Nevertheless the challenges to food and nutrition security remain formidable Future agricultural growth and food and nutrition security are threatened by population growth worsening soil fertility diminishing access to land and other scarce natural resources increasing vulnerability of crop varieties to pests and diseases and persistent poverty leading to poor access to food In addition the impacts of climate change an increase in the incidence of natural disasters sea intrusion

and salinity will exacerbate food and nutrition insecurity in the coming decades if corrective measures are not taken. Aligned with this context, the authors of the book explore policy options and strategies for developing agriculture and improving food security in Bangladesh. *Securing Food for All in Bangladesh* with its breadth and scope will be an invaluable resource for policymakers, researchers, and students dedicated to improving people's livelihoods in Bangladesh.
