Everest Peter Habeler, David Heald, 1979 **The Mammoth Book of How it Happened - Everest** Jon E. Lewis, 2015-06-04 This selection of the very best writing on Everest begins with the first attempts and continues via Mallory's failed bid and Hillary and Tenzing's triumph to the disasters of recent years It features 35 white knuckle accounts of climbing on the world's highest mountain with all the tragedy and triumph of humankind's striving for the top of the world by those who know the Death Zone best the climbers themselves But this is much more than just the best of exhilarating first hand accounts of climbing on Everest It includes the full history of the conquest of Everest and provides an evocative portrait of the cruel natural beauty of Chomolungma The Mother Goddess of the World Prelude to Everest Ian R Mitchell, George Rodway, 2014-11-26 Acclaimed hillwalking writers Ian R Mitchell and George Rodway tell the fascinating story of Aberdeen born Alexander Kellas and his contribution to mountaineering from the 20th century to the present day Now a largely

High Life John B West, 2013-05-27 HE history of high altitude physiology and medicine is such a rich and colorful topic that it is perhaps surprising that no one has undertaken a comprehensive account before There are so many interesting ramifications from the early balloonists to the various high altitude expeditions culminating in the great saga of climbing Mt Everest without supplementary oxygen Underpinning this variety is the basic biological challenge of hypoxia and the ways organisms adapt to it a subject that is of key importance in medicine and many other life sciences encountered as it is by organisms throughout the animal kingdom I hope that this book will be of interest to a wide range of people from biologists and physiologists to pulmonologists and others who manage patients with hypoxemia The topic should also appeal to those who love the mountains including trekkers skiers climbers and mountaineers The book begins with a short introductory chapter to set the scene for the non scientist It then follows a general chronological sequence beginning with the Greeks and ending with contemporary events In some places however some compromises have been made to group together areas of related interest For example in Chapter 4 the controversy about oxygen secretion is traced from the 1870s to the 1930s and includes the Anglo American Pikes Peak Expedition of 1911 and the International High Altitude Expedition to Cerro de Pasco Peru during 1921 1922 It makes sense to consider these events together
