

A black and white photograph of Mount Everest. The mountain's massive, snow-covered peak dominates the upper half of the frame, with sharp ridges and deep crevasses visible. In the foreground, a high-altitude camp is set up on a rocky, snow-dusted slope. Several tents are visible, and a few figures of people can be seen near them, providing a sense of scale to the immense mountain. The sky is clear and dark.

Human Enhancement and Well-Being Emma C. Gordon, 2022-12-30 New technologies and medicines make it increasingly possible to enhance human functioning in new ways to become smarter more emotionally attuned and perhaps even morally better But just because we can use the latest science to improve ourselves should we This book has two main aims First it outlines and criticises the six main contemporary arguments for scepticism about the role of human enhancements in promoting well being These arguments concern respectively i the value of achievements ii freedom iii hyperagency iv human nature v authenticity and vi inequality It will be shown for the first time in a book length treatment why the overarching bioconservative case against enhancement doesn't hold water The second central aim of the book is positive as we'll see each of the bioconservative critiques considered and rejected will be shown to nonetheless motivate a distinctive kind of theoretical desideratum that a viable positive enhancement proposal should satisfy The remainder of the book then defends a two part enhancement proposal that will be shown to clearly satisfy the theoretical desiderata that emerged from reflecting on the earlier critique of bioconservatism The first part of the positive proposal motivates and outlines the general role of an enhancement counsellor in facilitating voluntary enhancement I then offer an applied case study of this role in the special case of enhancement for the purpose of facilitating romantic and parental relationships

The History of Understanding in Analytic Philosophy Adam Tamas Tuboly, 2022-02-10 Interpretive understanding of human behaviour known as *verstehen* underpins the divide between the social sciences and the natural sciences Taking a historically orientated approach this collection offers a fresh take on the development of understanding within analytic philosophy before during and after logical empiricism In doing so it reinvigorates debates on the role of the social sciences within contemporary

epistemology Bringing together leading experts including Martin Kusch Thomas Uebel Karsten Stueber and Giuseppina D Oro it is an authoritative reference on the logical empiricists philosophy of social science Charting the various reformulations of verstehen as proposed by Wilhem Dilthey Max Weber R G Collingwood and Peter Winch the volume explores the reception of the social sciences prior to logical empiricism before surveying the positive and negative critiques from Otto Neurath Felix Kaufmann Viktor Kraft and other logical empiricists As such chapters reveal that verstehen was not altogether rejected by the Vienna Circle but was subject to various conceptual uses and misuses Along with systematic historical coverage the book situates verstehen within contemporary interdisciplinary developments in the field shedding light on the 21st century turn to understanding among analytic philosophers and opening further lines of inquiry for philosophy of social science **CBSE**
