Shelley's Process Jerrold E. Hogle, 1989-01-12 In this set of thorough and revisionary readings of Percy Bysshe Shelley's best known writings in verse and prose Hogle argues that the logic and style in all these works are governed by a movement in every thought memory image or word pattern whereby each is seen and sees itself in terms of a radically different form For any specified entity or figure to be known for what it is it must be reconfigured by and in terms of another one at another level which must then be dislocated itself In so delineating Shelley's process Hogle reveals the revisionary procedure in the poet's various texts and demonstrates the powerful effects of radical transference in Shelley's visions of human possibility

A Reading of Lucretius' De Rerum Natura Lee Fratantuono, 2015-06-03 Lucretius philosophical epic *De Rerum Natura* On the Nature of Things is a lengthy didactic and narrative celebration of the universe and in particular the world of nature and creation in which humanity finds its abode This earliest surviving full scale epic poem from ancient Rome was of immense influence and significance to the development of the Latin epic tradition and continues to challenge and haunt its readers to the present day A Reading of Lucretius *De Rerum Natura* offers a comprehensive commentary on this great work of Roman poetry and philosophy Lee Fratantuono reveals Lucretius to be a poet with deep and abiding interest in the nature of the Roman identity as the children of both Venus through Aeneas and Mars through Romulus the consequences both positive and negative of descent from the immortal powers of love and war are explored in vivid epic narrative as the poet progresses from his invocation to the mother of the children of Aeneas through to the burning funeral pyres of the plague at Athens Lucretius epic offers the possibility of serenity and peaceful reflection on the mysteries of the nature of the world even as it shatters any hope of immortality

through its bleak vision of post mortem oblivion And in the process of defining what it means both to be human and Roman Lucretius offers a horrifying vision of the perils of excessive devotion both to the gods and our fellow men a commentary on the nature of pietas that would serve as a warning for Virgil in his later depiction of the Trojan Aeneas *The Visionary Company* Harold Bloom,1971 Discusses the works of William Blake William Wordsworth Samuel Taylor Coleridge George Gordon Lord Byron Percy Bysshe Shelley John Keats Thomas Lovell Beddoes John Clare George Darley and others Library of Congress Catalog Library of Congress,1970 The Eco-Self in Early Modern English Literature Elizabeth Gruber,2025-10-01 The Eco Self in Early Modern English Literature tracks an important shift in early modern conceptions of selfhood arguing that the period hosted the birth of a new subset of the human the eco self which melds a deeply introspective turn with an abiding sense of humans embedment in the world A confluence of cultural factors produced the relevant changes Of paramount significance was the rapid spread of literacy in England and across Europe reading transformed the relationship between self and world retooled moral reasoning and even altered human anatomy This book pursues the salutary possibilities including the ecological benefits of this redesigned self by advancing fresh readings of texts by William Shakespeare Christopher Marlowe John Webster and Margaret Cavendish The eco self offers certain refinements to ecological theory by renewing appreciation for the rational deliberative functions that distinguish humans from other species The End of the Anthropocene Michael J. Gormley,2021-06-28 In The End of the Anthropocene Ecocriticism the Universal Ecosystem and the Astropocene Michael J Gormley examines literary imaginings of the Anthropocene s end and the Astropocene s beginning when humans are no longer bound to the blue planet on which we evolved Gormley analyzes literary images of human tracks on Earth the Moon and Mars to characterize the late stage Anthropocene and to explore humanity s role in the universal ecosystem The End of the Anthropocene uses a predictive and paradigmatic model of ecocriticism examining science fiction works as interplanetary nature narratives **The Publishers Weekly** ,1921 *Creation and Cosmos - The Literal Values of Genesis* Garrison Clifford Gibson,2012-11-27 There are many questions that intelligent people have about the Bible science and evolution theory Finding intelligent answers is difficult The problem is that specialization is required in the sciences in philosophy and theology so people tend to pick one and disregard the others There aren t so many people that consider all three fields with much depth of understanding I made a try at that and wrote a book that is free to download It is not only difficult to understand all three fields it is difficult to select what should be written about and difficult to write well I didn t by any means cover everything there is lots to cover
