Language, Literacy and Communication in the Early Years Carol Hayes, 2025-02-28 This book guides students and practitioners through the wealth of information on cognition and language development by breaking the area down into manageable chunks and drawing these together into a full understanding of the holistic nature of child development Children with communication difficulties are at risk of poor outcomes educationally socially and in employability Whilst there may be a range of interventions which can help children it is the practice of those working with them that is the key to success Therefore a firm understanding of communication development and the ability to adapt teaching to support children s individual needs are vital The text offers a balanced approach to the theories and research into the development and acquisition of language and literacy in the early years It examines how practice can be improved and the impact that language and literacy development has on learning outcomes It also importantly addresses the particular pedagogy related to bilingual and multilingual learners Carefully structured activities are provided and the text clearly relates theory to practice Pedagogical features encourage a questioning challenging and reflective approach promoting critical thinking throughout

Dyslexia and Effective Learning in Secondary and Tertiary Education Morag Hunter-Carsch, Margaret Herrington, 2001-10-22 Recent policy initiatives illuminate the need for greater teacher awareness about dyslexia in secondary and tertiary education Yet the debates about dyslexia are often narrowly based and can exclude some teachers This book attempts to open up the debate by bringing together different ways of talking and thinking about dyslexia Fundamental questions about how to respond to dyslexia in teaching and support contexts are addressed and the significance of exploratory conversations between learners and tutors is recognised The need to restructure the structured approach and to consider meta affectivity as well as metacognition is explored Practitioners in both secondary and tertiary sectors can gain ready access to contributions from internationally respected writers and teachers in the field Alan Hurst s preface refers to this important book as paving the way to a more truly inclusive attitude and approach to education in and beyond compulsory schooling
