Person-Centered Leadership Jeanne M. Plas,1996-04-11 From the Business Community Person Centered Leadership

builds on that foundation of caring for every individual in the organization and takes it to the next level. It features engaging people first team result anecdotes from a variety of American companies and straightforward how tos for becoming the kind of leader not just business that people love to work for and be associated with. We'll use it as a discussion for one of our upcoming staff get togethers.

Michael A Fisher, Premier Manufacturing Support Services

Dr. Plas's book provides insights into aspects of human behavior that enhance effective management skills. She affirms that respecting employees as individuals with unique talents and needs within the workplace creates a productive atmosphere that results in happier people and higher profits. This book is now required reading for everyone in our firm who manages people. I totally agree with Dr. Plas's conclusions about competent leadership and its positive impact on all aspects of the individual and the company.

Bill W Shoptaw, Shoptaw James Inc

From the Academic Community, I found particularly interesting the insightful comment that past teamwork and TQM efforts are flawed because they have not rewarded individuals. This suggests a new form of team with individual recognition and elaborated roles for members. The key ideas of related individualism, authenticity, and acceptance of strength and weakness provide guidelines for transforming organizations. There are three chapter long case studies and a number of shorter examples that add much interest to the book. I would recommend the reader to look at the person centered principles that accompany the three chapter long cases in the second part of the book and the actions, hints, and cautions sections in the boxes in Chapter 13. I found the ideas to be well presented and insightful and the case studies to be rich and interesting. I think the practical suggestions in the final chapter will be helpful to managers who try to apply the book's recommendations for change.

Joseph Seltzer, Department of Management, La Salle University

Why hasn't TQM total quality management worked as well in the U.S. as it has elsewhere? In the United States, employees seem to prefer recognition of individual achievement over recognition of the work team. Could the American cultural emphasis on the individual be a crucial factor? This engagingly written textbook demonstrates that the recent participatory management failures are the result of a lack of appreciation for the cultural role of rugged individualism. Offering an alternative person centered leadership which puts the individual at the very center of the management approach, author Jeanne M. Plas demonstrates effective psychology based person centered management techniques using contemporary examples, many of them drawn from her research and consulting work with successful U.S. businesses and CEOs. Topics include:

- A historical overview of the relationship of the individual to the corporation.
- The response of new leaders to the problem of rapid technological and social change that outpaces the development of cultural attitudes.
- Illustrations of a variety of person centered leadership approaches that fit different companies and different managerial styles.
- Specific strategies that leaders and managers can use to bring out the best in themselves, their associates, and their organizations.

Writing the Character-Centered Screenplay, Updated and Expanded edition

Andrew Horton, 2000-02-23

We need good screenwriters who understand character. Everywhere Andrew Horton traveled in researching this book, from Hollywood to Hungary, he heard the same

refrain Yet most of the standard how to books on screenwriting follow the film industry's earlier lead in focusing almost exclusively on plot and formulaic structures With this book Horton a film scholar and successful screenwriter provides the definitive work on the character based screenplay Exceptionally wide ranging covering American international mainstream and off Hollywood films as well as television the book offers creative strategies and essential practical information Horton begins by placing screenwriting in the context of the storytelling tradition arguing through literary and cultural analysis that all great stories revolve around a strong central character He then suggests specific techniques and concepts to help any writer whether new or experienced build more vivid characters and screenplays Centering his discussion around four film examples including *Thelma Louise* and *The Silence of the Lambs* and the television series *Northern Exposure* he takes the reader step by step through the screenwriting process starting with the development of multi dimensional characters and continuing through to rewrite Finally he includes a wealth of information about contests fellowships and film festivals

Espousing a new character based approach to screenwriting this engaging insightful work will prove an essential guide to all of those involved in the writing and development of film scripts
