Ecology Politics And Violent Conflict:

Ecology, Politics and Violent Conflict Mohamed Suliman,1999 Violent internal conflicts in more and more countries are ruining the lives of millions of people and undermining the ability of their governments to provide security and a tolerable economic existence The contributors to this book take a new view of the reasons for this grave development in Africa the Balkans Central Asia and elsewhere They question traditional analyses of conflict which rely primarily on ethnic religious and cultural explanations since these do not take account of the increasingly obvious link between the growing scarcity of renewable resources and violent conflict in developing countries Shortages of cropland fresh water woodfuel pasture and marine resources cannot be ignored At the same time this book argues that one cannot understand domestic conflicts simply in environmental terms For environmental scarcity functions in a society within a complex matrix of historically derived economic and political situations In particular an unequal social distribution of resources exacerbates scarcity and fuels popular conflict

The A to Z of Environmentalism Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

Coping with Global Environmental Change, Disasters and Security Hans Günter Brauch, Úrsula Oswald Spring, Czesław Mesjasz, John Grin, Patricia Kameri-Mbote, Béchir Chourou, Pál Dunay, Joern Birkmann, 2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions

Environmental Politics Shannon O'Lear, 2010-08-19 Shannon O'Lear brings a geographer's perspective to environmental politics The book considers issues of climate change energy food security toxins waste and resource conflict to explore how political economic ideological and military power have contributed to the generation of environmental issues and the formation of dominant narratives about them The book encourages the reader to think critically about the power dynamics that shape and limit how we think about environmental issues and to expand the reader's understanding of why it matters that these issues are discussed at particular spatial scales Applying a

geographer's sense of scale and power leads to a better understanding of the complexity of environmental issues and will help formulate mitigation and adaptation strategies. The book will appeal mainly to advanced students and researchers from a geography background but also to social and political scientists who wish to look at the topic from this different perspective.

Handbook of Cultural Geography Kay Anderson, 2003. Presenting a state of the art assessment of the key questions informing cultural geography in the 21st century, this handbook emphasises the intellectual diversity of the discipline and is cross referenced throughout.

Environmental Security and Gender Nicole Detraz, 2014-08-21. Over the past 20 years, scholars, policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment. Concepts such as environmental security and resource conflict have been used to hint at these significant linkages. While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts, there has been little examination of the intersection between approaches to environmental security and gender. This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies. It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions. By adopting a feminist environmental security discourse, this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections. Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections. This multidisciplinary volume draws on literature from the environmental sciences, security studies and sociology to highlight the complex human insecurities that often accompany environmental change. As conceptualizations of security continue to shift and broaden to include environmental issues and concerns, it is imperative that gender informs the debate.

Handbook on Climate Change and Human Security Michael R Redclift, Marco Grasso, 2013-10-31. The Handbook is international in scope and provides an assessment that will be of value to academics, students and policy professionals alike. NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all.

Peace Studies in the Chinese Century Alan Hunter, 2017-05-15. The rise of China is probably the most significant shift in the international power structure this generation. China's leaders have so far committed themselves to a peaceful rising but serious tensions are inevitable in such a rapid transformation. Dialogue on peace and conflict issues at this juncture is invaluable. This volume focuses on developments in peace research in a number of key countries and in particular introduces for the first time in English the perspectives of a number of Chinese scholars who have started to engage with peace studies agendas. Comparisons are drawn from the UK, USA, Mexico, Japan and South Africa to provide a better understanding of the debates on a global level and the discussion among different countries. Some of the outstanding peace researchers who contribute to the volume include Andrew Rigby, Johan Galtung who is generally

considered to have founded the discipline in its current form and Ursula Oswald The volume is a valuable and unique contribution to the contemporary peace research agenda and will appeal to an interdisciplinary readership in peace studies sociology politics international relations religious studies philosophy and Asian studies *Gender and International Security* Laura Sjoberg, 2009-10-16 This book defines the relationship between gender and international security analyzing and critiquing international security theory and practice from a gendered perspective Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security The passage and implementation of UN Security Council Resolution 1325 on Security Council operations the integration of gender concerns into peacekeeping the management of refugees post conflict disarmament and reintegration and protection for non combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies The chapters included in this book not only challenge the assumed irrelevance of gender they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue Rather the contributors argue that gender is conceptually empirically and normatively essential to studying international security They do so by critiquing and reconstructing key concepts of and theories in international security by looking for the increasingly complex roles women play as security actors and by looking at various contemporary security issues through gendered lenses Together these chapters make the case that accurate rigorous and ethical scholarship of international security cannot be produced without taking account of women s presence in or the gendering of world politics This book will be of interest to all students of critical security studies gender studies and International Relations in general Laura Sjoberg is Assistant Professor of Political Science at the University of Florida She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender Justice and the Wars in Iraq* 2006 and with Caron Gentry *Mothers Monsters Whores Women s Violence in Global Politics* 2007

Agriculture, Human Security, and Peace M. Taeb, A. H. Zakri, 2008 Covering more than the conventional food only role of agriculture the international contributors to this volume detail how the solution to agricultural problems can lead to general socioeconomic and political development in impoverished countries *Natural Resource Investment and Africa's Development* Francis N. Botchway, 2011-01-01 This book makes a significant contribution to the literature on natural resource law and governance by engaging specifically with the issues arising in the African region It covers a wide spectrum of issues that are key to the sustainable use of natural resources in the region thus making it an important resource for anyone interested in natural resource governance and economic development in the African region Philippe Cullet University of London UK This well researched book covers a wide spectrum of important issues that are central to investment in natural

resources and ultimately economic development of Africa Francis Botchway and the expert contributors analyse the relationships between good governance and resource management as well as the existing commercial and financial agreements The environmental implication of resource exploitation and the international dimensions of the industry are also explored in this insightful study Each comprehensive and concise contribution highlights the importance of transparency and equity in investment and management of natural resources Natural Resource Investment and Africa's Development is essential material for scholars and students of development environmental law international economic law and dispute resolution as well as any international investor in natural resources *Rights Resources and Rural Development* Christo Fabricius, Eddie Koch, Stephen Turner, Hector Magome, 2013-01-11 Community based natural resource management CBNRM is an approach that offers multiple related benefits securing rural livelihoods ensuring careful conservation and management of biodiversity and other resources and empowering communities to manage these resources sustainably Recently however the CBNRM concept has attracted criticism for failing in its promise of delivering significant local improvements and conserving biodiversity in some contexts This book identifies the flaws in its application which often have been swept under the carpet by those involved in the initiatives The authors analyse them and propose remedies for specific circumstances based on the lessons learned from CBNRM experience in southern Africa over more than a decade The result is essential reading for all researchers observers and practitioners who have focused on CBNRM in sustainable development programmes as a means to overcome poverty and conserve ecosystems in various parts of the globe It is a vital tool in improving their methods and performance In addition academics students and policy makers in natural resource management resource economics resource governance and rural development will find it a very valuable and instructive resource

Climate Change Binayak Ray, 2011-09-16 Notwithstanding denials by climate skeptics the global scientific community considers the world environment is rapidly worsening They argue that failure to adopt measures to reduce CO₂ gas emission in the atmosphere could lead to disastrous social economic politico security and environmental consequences Skeptics argue that climate changes are due to nature's own cyclical phenomenon They fail to understand that climatology as a scientific discipline is in its infancy but overwhelming evidence suggests that human activities are responsible for this Smart campaigning and some mistakes by the IPCC in its 2007 report enabled skeptics to derail the efforts to adopt a legally binding CO₂ emission target in Copenhagen in 2009 Global political leadership collectively failed to rise above their narrow national interest in Copenhagen Last moment efforts led to a resolution but a resolution without vision or teeth Given large socio economic differences between countries a legally binding CO₂ reduction resolution is anathema to many countries The leadership failed to understand that one size prescription would not fit all as internal political compulsions dominate countries policy position on climate change issues South Asia is politically complex The political and economic rivalry between China and India impacts differently on policy cooperation issues in regional countries but on climate change issues

policy response require a regional approach as impacts do not stop at political boundaries Water sharing is critical for India Pakistan and Bangladesh India and Pakistan are virtually water scarce countries and most of Bangladesh's freshwater comes from outside the country These countries have been using groundwater at an unsustainable rate and in many parts it requires treatment Collectively they house largest number of poverty stricken people on earth Food production is declining rising food prices are creating a huge fiscal burden UN Millennium goals remain unachievable Rising se

The History of Development Gilbert Rist, 2002-10 With all its hopes of a more just and materially prosperous world development has fascinated societies in both North and South Looking at this collective fancy in retrospect Gilbert Rist shows the underlying similarities of its various theories and strategies and their shared inability to transform the world He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates
