Econometric Model Performance Comparative Simulation Studies Of The U S Economy:

Econometric Model Performance Lawrence R. Klein, Edwin Burmeister, 2016-11-11 Models of the American economy exist in government research institutes universities and private corporations Given the proliferation it is wise to take stock because these models come from diverse sources and describe different conditions from alternative points of view They could be saying different things about the economy The high level comparative studies in this volume gathered from several issues of the International Economic Review with a substantive introduction and the addition of more comparative material evaluate the performance of eleven models of the American economy the Wharton Mark III Model Brookings Model Hickman Coen Annual Model Liu Hwa Monthly Model Data Resources Inc DRI Model Federal Reserve Bank of St Louis Model Michigan Quarterly Econometric MOEM Model Wharton Annual and Industry Model Anticipation Version of the Wharton Mark III Model Fair Model U S Department of Commerce BEA Model Each of the proprietors or builders of these models describes his own system in his own words These studies come closer than ever before to standardizing model operations for testing purposes Some of the models are monthly while others are annual but the quarterly unit of time is the most frequent Some are demand oriented others are supply oriented and focus on the input output sectors of the economy Some use only observed objective data others use subjective anticipatory data Both large and small models are included In spite of the diversity the contributors have cooperated to trace the differences between their models to root causes and to report jointly the results of their research There are also some general papers that look at model performance from outside the CEME group

Sawyer, 1988 Post Keynesian Economics denotes a loose grouping of economists who regard the insights of Keynes and Kalecki as the starting point for both a critique of conventional equilibrium analysis and the basis for a new macroeconomics based on the investment behaviour of the class of individuals who control capital and their savings behaviour as contrasted with that of workers Among the major figures in this school of thought have been Joan Robinson Nicholas Kaldor Sidney Weintraub and Paul Davidson **Information Systems in the Political World** K. V. Andersen, 1995 This text investigates the nature of

impacts of information systems on the political world in the First World countries The overall aim is to provide a framework on how to analyze implications of information technology IT on the political world and vice versa This is illustrated by a study of economic modelling at the central and local levels of government

Public Administration in an Information Age I.

Th. M. Snellen, Wim B. H. J. van de Donk, 1998 This book is a joint effort of researchers who have been involved in research projects and programmes that have been trying to chart and reflect upon the implications of Information and Communication Technologies ICTs for Public Administration Tilburg Rotterdam Kassel Irvine Nottingham Glasgow Since the fifties computers had largely facilitated and the transformation of the minimal Night Watch state into the modern Welfare state through their contribution to their effectivity productivity and efficiency In most Handbooks of Public Administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected This deafening silence is a great contrast with the way ICT s are actually changing public administration The faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature In such circumstances most statements will remain provisional and context dependent 25 years of research in Irvine California and Kassel Germany and more than 10 years of research in Tilburg Rotterdam The Netherlands and about seven years of research in Glasgow Nottingham the United Kingdom nonetheless enables the presentation of a modest image of public administration as it is entering the information age Researchers in each of these groups have nevertheless not stopped trying to phrase theories about the implications of informatization for public administration with a more or less large scope that are robust in different contexts and over longer periods of time These results and theories covering a broad set of elements of the body of knowledge of public administration are presented in this volume As the authors try to demonstrate in this book informatization developments in public administration do not only challenge the existing body of knowledge of the public administration discipline but they are also opening up new perspectives and paradigms for the study of public administration
