The Economic Structure Cedric T. Sandford, *Social Mobility for the 21st Century* Steph Lawler, Geoff Payne, 2017-12-14. *Social Mobility for the 21st Century* addresses experiences of social mobility and the detailed processes through which entrenched intergenerationally transmitted privilege is reproduced. Contributions include but are not limited to family relationships, students' encounters with higher education, narratives of work careers and mobility identities. The book intends to challenge both the framework of the more traditional approach and the politicisation of mobility which casts mobility as a possession, a commodity or a character trait and threatens to castigate the non-mobile as carrying a personal responsibility for their situation. This book presents critical analyses of routes into social mobility, the experience of social mobility and the political and social implications of social mobility's panacea status. Drawing on the work of established scholars and more recent entrants, the chapters offer a fresh look at social mobility, opening up the topic to a wider readership among the profession and beyond and stimulating further debate. This book will appeal to higher level students and scholars of sociology alike as well as having a broad cross-disciplinary appeal.

Social Distinctions in Contemporary Russia Jouko Nikula, Mikhail Chernysh, 2020-04-29. This book analyses social change in Russia, in particular the development of a middle class, one of the most important social and political projects of Putin's administration. Using unique survey data collected in 1998, 2007 and 2015, the authors make extensive and theoretically justified analyses of the changing social distinctions in Russia over the past 20 years. Offering a sophisticated analysis of classes and class, they acknowledge that in class analysis there are different phases requiring different concepts. The first phase is the analysis of class positions, the second is the study of the work and reproduction situations of class groups and the final step is the analysis of class interests. While acknowledging that there are a number of Russian-specific factors that seriously complicate traditional class analysis, the authors maintain that the basic tenets of class analysis still hold true. The book will be of interest to students and scholars of sociology, political science, transition studies, social policy and Russian studies and anyone who wants to understand the internal divisions and organization of the middle class in Russia.

Making New Zealand's Pop Renaissance Michael Scott, 2016-05-13. Since the early 2000s, New Zealand has undergone a pop renaissance. Domestic artists' sales, airplay and concert attendance have all grown dramatically while new avenues for kiwi pop exports emerged. Concurrent with these trends was a new collective sentiment that embraced and celebrated

domestic musicians In *Making New Zealand's Pop Renaissance* Michael Scott argues that this revival arose from state policies and shows how the state built market opportunities for popular musicians through public private partnerships and organizational affinity with existing music industry institutions New Zealand offers an instructive case for the ways in which after neo liberal states steer and co ordinate popular culture into market exchange by incentivizing cultural production Scott highlights how these music policies were intended to address various economic and social problems Arriving with the creative industries discourse and policy making politicians claimed these expanded popular music supports would facilitate sustainable employment and a sense of national identity Yet popular music as economic and social policy presents a paradox the music industry generates commercial failure and thus requires a large unattached pool of potential talent Considering this feature Scott analyses how state programs induced an informal economy of proto pop production aimed at accessing competitive state funding while simultaneously encouraging musicians to adopt entrepreneurial subjectivities In doing so he argues New Zealand's music policies are a form of social policy that unintentionally deploy hierarchical structures to foster social inclusion amongst growing numbers of creative workers
