## **Economic Concentration Structure Behavior And Public Policy:**

Economic Concentration; Structure, Behavior and Public Policy John Malcolm Blair, 1972 As a veteran of both the Bureau of Economics of the Federal Trade Commission and the Senate Subcommittee on Antitrust and Monopoly during the 1960s author Blair is an advocate His advocacy of his position is clear concise and understandable he favors strong antitrust laws and the stricter application of those laws to existing corporate structures and this is his argument First it defines and discusses four types of economic concentration market vertical conglomerate and aggregate Second high concentration as opposed to diffusion of control is shown to be neither the necessary nor the natural state of the economy because centrifugal forces eventual diseconomies of scale growth and technological change constantly are chipping away at dominance and ossification Third it argues that the primary causes of high and rising concentration of various kinds are neither natural nor technological imperatives economies of scale technological change rather they are artificial and unnecessary centripetal factors the most important being mergers acquisitions TV advertising predation and anticompetitive government policies of various kinds The result therefore is a work rich in empirical information and skillful in interpreting and verifying new data and statistical approaches moreover it integrates a substantial quantity of data never attempted in this area in the past In this sense it is an excellent contribution No topic considered has been shortchanged the treatment is competent But the effort to cover the entire waterfront leaves several urgent questions What can be done and where How may we attempt new approaches to our subject How may we first better convince the general public and Congress that indeed a strong antitrust policy is desirable The Energy Industry, Organization and Public Policy ,1974 *Hearings, Reports and Prints of the Senate Committee on the Judiciary* United States. Gallagher,Lyuba Zarsky,2007-07-20 Analyzes the extent to which foreign investment in Mexico s information technology sector brought economic social and environmental benefits to Guadalajara Foreign investment has been widely perceived as a panacea for developing countries as a way to reduce poverty and kick start sustainable modern industries The Enclave Economy calls this prescription into question showing that Mexico s post NAFTA experience of foreign direct investment in its information technology sector particularly in the Guadalajara region did not result in the expected benefits Charting the rise and fall of Mexico s Silicon Valley the authors explore issues that resonate through much of Latin America and the developing world the social economic and environmental effects of market driven globalization In the 1990s Mexico was a

poster child for globalization throwing open its borders to trade and foreign investment embracing NAFTA and ending the government's role in strengthening domestic industry But The Enclave Economy shows that although Mexico was initially successful in attracting multinational corporations foreign investments waned in the absence of active government support and as China became increasingly competitive Moreover the authors find that foreign investment created an enclave economy the benefits of which were confined to an international sector not connected to the wider Mexican economy In fact foreign investment put many local IT firms out of business and transferred only limited amounts of environmentally sound technology The authors suggest policies and strategies that will enable Mexico and other developing countries to foster foreign investment for sustainable development in the future Economies of Size in Local Government United States.
