

Automation

Pros

- More efficient production
- Higher labour productivity and higher wages/profit.
- Cheaper goods increases disposable income of consumers.
- Avoids boring, repetitive jobs
- Can enable a shorter working week
- Can improve safety and remove risk of human error
- Can give consumers greater choice of goods.

Cons

- Some workers displaced – possible structural unemployment
- Creates winners and losers – possible increase in inequality
- Automation could increase monopoly power
- Loss of human interaction – dealing with computers leads to lower quality of life.
- Automated systems can show lack of empathy with events.

Economic Consequences Of Automation:

The Economic Consequences of Automation Paul Einzig, 1957 **The Future Impact of Automation on Workers**
Wassily Leontief, Faye Duchin, 1986 Using the Input Output model of the US economy developed by Professor Leontief the authors analyse the future impact on the labor force of computer driven automation **Automation and Its Macroeconomic Consequences** Klaus Prettnner, David E. Bloom, 2020-06-19 Automation and Its Macroeconomic Consequences reveals new ways to understand the economic characteristics of our increasing dependence on machines Illuminating technical and social elements it describes economic policies that could counteract negative income distribution consequences of automation without hampering the adoption of new technologies Arguing that modern automation cannot be compared to the Industrial Revolution it considers consequences of automation such as spatial patterns urbanization and regional concerns In touching upon labor growth demographic and policy Automation and its Macroeconomic Consequences stands at the intersection of technology and economics offering a comprehensive portrait illustrated by empirical observations and examples Introduces formal growth models that include automation and the empirical specifications on which the data driven results rely Focuses on formal modeling empirical analysis and derivation of evidence based policy conclusions Considers consequences of automation such as spatial patterns urbanization and regional concerns **The Basic Economic Consequences of Automation** John Theurer Diebold, 1960 **THE SOCIAL AND ECONOMIC CONSEQUENCES OF AUTOMATION- REPORT OF A CONFERENCE.** , **The Economic Effects and Consequences of Automation** Hubert C. Trenkamp, 1961 **Bulletin of the Atomic Scientists** , 1968-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **The Social and Economic Impact of New Technology 1978-84: A Select Bibliography** Leslie Grayson, 2012-12-06 Silicon chip technology microprocessor technology information technology or quite simply new technology These are some of the names representing the microelectronics revolution depending upon the audience being addressed by speaker or writer No previous new industrial development has caused such widespread publicity and discussion amongst users and researchers as the new technology Concern is being expressed about the effects of new technology on employment job satisfaction social life leisure activities and the economics of commerce and industry The late 70s saw many doom laden predictions of those effects but by 1983 both management and trade unions were taking a more objective view of the social and economic impacts and many correspondents now see the new technology as a means of opening up new industries and overcoming the effects of world recessions The chip has involved the factory floor the office the supermarket and the home Electronic funds transfer electronic shopping microelectronic domestic appliances word processors and microprocessor controlled machinery mean that the new technology has pervaded all aspects of social and economic life and the developed countries are now coming to

accept it as part of society as a whole Inevitably the flood of literature on the social and economic impacts of new technology has been overwhelming Unfortunately the quality of information and arguments propagated at conferences in journal papers and research reports has indicated that there has been little quantifiable evidence available on the effects of these impacts
