Delbridge, James Lowe, 2005-08-04 The future of British manufacturing is of immense importance and topicality As we slide towards a service sector economy based on finance and tourism it is worth reflecting on whether this is the most appropriate or inevitable scenario *Manufacturing in Transition* makes a genuinely interdisciplinary contribution to the debate over the UK's strategy for industrial renewal Aimed primarily at business economics and industrial relations students it looks at the current state of British manufacturing sector within the global economy and asks whether manufacturing matters in the twenty first century The book explores key issues such as the chances of renewal developments in the management and organisation of operations and supply chains the differences made by Japanese methods This is a timely assessment of the UK's industrial development and makes a major contribution to debates over the industrial strategy and the position of manufacturing within industrialized economies **Employment and Economic Performance** Jonathan Michie, John Grieve Smith, 1997 With the end of the post war boom in the early 1970s the world economy has experienced large scale unemployment From an assumption that the unemployment problem had been solved and that full employment could be maintained through demand management techniques we now live in an entirely different world Any suggestion of a return to full employment is met with questions of whether such a thing is possible whether it would not lead to inflation or to excessive trade union power or in the case of individual economies to unsustainable balance of payment deficits The contributors to this volume ask whether full employment policies would be affordable Would they lead to yawning fiscal deficits which would in the end require a U turn in policy with unemployment reappearing This well informed and original contribution to current policy debate faces up to these questions and considers what would be involved in a move to much

Economy Esmond Birnie,David M.W.N Hitchens,2019-07-23 First published in 1999 this timely study emerged at a critical juncture for the EU and Ireland and aimed to review the past development and future prospects of the Northern Ireland economy in the light of the European Union and its possible expansion Esmond Birnie and David M W N Hitchens examine the economic circumstances in the wake of Northern Ireland s longstanding position as a region which lags behind UK

performance in the EU Here they update the data and discussion contained in an earlier study by the authors Closing the Productivity Gap 1990 through discussions including engines of growth the process of convergence and the current and likely development of Northern Ireland Republic of Ireland economic links This book will be of use to both academics undergraduates A level students and the general reader *Labour Economics* Stephen W. Smith,2003-03-20 Now in its 2nd edition this comprehensive and accessible text provides a detailed study of labour market issues This excellent new book is a must see for all those involved in Labour Economics **Competitiveness Matters** Candace Howes,Ajit Singh,2010-08-27 This book argues against the current view that competitiveness that is the competitiveness of the manufacturing sector matters to the long term health of the U S economy and particularly to its long term capacity to raise the standard of living of its citizens The book challenges the arguments popularized most recently by Paul Krugman that competitiveness is a dangerous obsession that distracts us from the question most central to solving the problem of stagnant real income growth namely what causes productivity growth especially in the service sector The central argument is that if the U S economy is to achieve full employment with rising real wages it is necessary to enhance the competitiveness of its tradable goods sector The book shows that current account deficits cannot be explained by macroeconomic mismanagement but are rather the consequence of an uncompetitive manufacturing sector It finds that the long term health of the manufacturing sector requires not only across the board policies to remedy problems of low or inefficient investment but also sectoral policies to address problems that are strategic to resolving the balance of payments problems Lessons are drawn from the experience of some European and Asian countries This book will be of interest to economists political scientists and business researchers concerned with the place of the manufacturing sector in overall health of the U S economy with issues of industrial policy and industrial restructuring and with the conditions for rising standards of living Candace Howes is Associate Professor Barbara Hogate Ferrin Chair Connecticut College Ajit Singh is Professor of Economics Queens College Cambridge Small Business D. J. Storey,2000 **Managing the Economy, Managing the People** Jim Tomlinson,2017 This study offers a distinctive new account of British economic life since the Second World War focussing upon the ways in which successive governments in seeking to manage the economy have sought simultaneously to manage the people to try and manage popular understanding of economic issues In doing so governments have sought not only to shape expectations for electoral purposes but to construct broader narratives about how the economy should be understood The starting point of this work is to ask why these goals have been focussed upon and differentially over time how they have been constructed to appeal to the population and insofar as this can be assessed how far the population has accepted these narratives The first half of the book analyses the development of the major narratives from the 1940s onwards addressing the notion of austerity and its particular meaning in the 1940s the rise of a narrative of economic decline from the late 1950s and the subsequent attempts to modernize the economy the attempts to roll back the state from the 1970s the impact of ideas of globalization in the 1990s

and finally the way the crisis of 2008 9 onward was constructed as a problem of debts and deficits The second part of the book focuses on four key issues in attempts to manage the people productivity the balance of payments inflation and unemployment It shows how in each case governments sought to get the populace to understand these issues in a particular light and shaped strategies to that end **Modern Britain** Sean Glynn, Alan Booth, 2020-08-17 Modern Britain focuses on two major periods of British history the interwar period and postwar Britain The authors compare and contrast developments in the two periods dealing with the themes of growth and welfare industry labour social policy the economy Combining a narrative with a conceptual and analytic approach Modern Britain provides an end of century review of progress and decline and an essential background to current polemics and major issues of concern Clearly structured and written this is an invaluable textbook for students of twentieth century British history Governing Financialization Jack Copley, 2022 The book offers an alternative explanation of why the British state propelled radical financialization in the 1970s and 1980s
