Economic Thought James A. Gherity, 1964 **Economic Thought. A Historical Anthology Ed. by James A. Gherity,....** James A.. Gherity, 1965 **Economic Thought** James A. Gherity, 1969 **A History of Economic Thought** Lionel Robbins, 2000-10-16

Lionel Robbins's now famous lectures on the history of economic thought comprise one of the greatest accounts since World War II of the evolution of economic ideas. This volume represents the first time those lectures have been published. Lord Robbins 1898-1984 was a remarkably accomplished thinker, writer, and public figure. He made important contributions to economic theory, methodology, and policy analysis; directed the economic section of Winston Churchill's War Cabinet; and served as chairman of the Financial Times. As a historian of economic ideas, he ranks with Joseph Schumpeter and Jacob Viner as one of the foremost scholars of the century. These lectures, delivered at the London School of Economics between 1979 and 1981 and tape-recorded by Robbins's grandson, display his mastery of the intellectual history of economics, his infectious enthusiasm for the subject, and his eloquence and incisive wit. They cover a broad chronological range, beginning with Plato, Aristotle, and Aquinas, focusing extensively on Adam Smith, Thomas Malthus, and the classicals, and finishing with a discussion of moderns and marginalists from Marx to Alfred Marshall. Robbins takes a varied and inclusive approach to intellectual history. As he says in his first lecture, "I shall go my own sweet way, sometimes talk about doctrine, sometimes talk about persons, sometimes talk about periods." The lectures are united by Robbins's conviction that it is impossible to understand adequately contemporary institutions and social sciences without understanding the ideas behind their development. Authoritative yet accessible, combining the immediacy of the spoken word with Robbins's exceptional talent for clear, well-organized exposition, this volume will be welcomed by anyone interested in the intellectual origins of the modern world.

Medieval Islamic Economic Thought S.M. Ghazanfar, 2004-06-02. This book is a collection of papers on the origins of economic thought discovered in the writings of some prominent Islamic scholars during the five centuries prior to the Latin Scholastics, who include St. Thomas Aquinas. This period of time was labelled by Joseph Schumpeter as representing the great gap in economic history. Unfortunately, this gap is well embedded in most relevant literature. However, during this period, the Islamic civilization was one of the most fertile grounds for intellectual developments in various disciplines, including economics, and this book attempts to fill that blind spot in the history of economic thought.

The Paradox of Democratic Capitalism David F. Prindle, 2006-08-25 A truly interdisciplinary enterprise The Paradox of Democratic Capitalism examines the interplay of ideas about politics economics and law in American society from the pre revolutionary era to the eve of the September 11 attacks David F Prindle argues that while the United States was founded on liberalism there is constant tension between two ideals of the liberal tradition capitalism and democracy Tracing the rise of natural law doctrine from neoclassical economics Prindle examines the influence of economic development in late medieval society on the emergence of classical liberalism in early America and likens that influence to the impact of orthodox economics on contemporary American society Prindle also evaluates political economic and legal ideas through the lens of his own beliefs He warns against the emerging extremes of liberal ideology in contemporary American politics where the right s definition of capitalism excludes interference from democratic publics and the left s definition of democracy excludes a market based economy

Peterson, 2012-12-06 We are now witness to the waning years of the 1900s Soon we shall embark upon a bold journey into the uncharted territory of the twenty first of various persuasions have speculated as to what the century Futurists oncoming decades might bestow upon us Not surprising most predictions are closely tied to advances in technology especially in astrophysics biochemistry electronics and genetics But what about the economic system Whatever happens forces have undoubtedly already been set in motion which will mold or remold the structure and character of American capitalism American capitalism has been is and will undoubtedly continue to be a system in transition Technology perennially changes albeit at a faster or slower pace sometimes than others and society s institutions continually adjust to these technological changes Such adjustments alter the character of our politico economic system when statutes are enacted court decisions rendered administrative agency rules promulgated and cultural mores realigned to supplant old ones Other adaptations are brought about when small group collective action is successful in causing a special status of privilege to be conferred on some members of society but restrictions to be levied on others
