Economic Analysis of Land Use in Global Climate Change Policy Thomas W. Hertel, Steven K. Rose, Richard S. J. Tol, 2009-05-07 Land has long been overlooked in economics That is now changing A substantial part of the solution to the climate crisis may lie in growing crops for fuel and using trees for storing carbon This book investigates the potential of these options to reduce greenhouse gas emissions estimates the costs to the economy and analyses the trade offs with growing food The first part presents new databases that are necessary to underpin policy relevant research in the field of climate change while describing and critically assessing the underlying data the methodologies used and the first applications Together the new data and the extended models allow for a thorough and comprehensive analysis of a land use and climate policy This book outlines key empirical and analytical issues associated with modelling land use and land use change in the context of global climate change policy It places special emphasis on the economy wide competition for land and other resources especially The implications of changes in land use for the cost of climate change mitigation Land use change as a result of mitigation and Feedback from changes in the global climate to land use By offering synthesis and evaluation of a variety of different approaches to this challenging field of research this book will serve as a key reference for future work in the economic analysis of land use and climate change policy

The Behavioral Economics of Climate Change S. Niggol Seo, 2017-09-21 The Behavioral Economics of Climate Change Adaptation Behaviors Global Public Goods Breakthrough Technologies and Policy Making shows readers how to understand mitigation strategies emerging from global warming policy discussions and the ways that changing climate conditions can alter these strategies Through quantitative analyses case studies and policy examples this bottom up approach to climate change economics gives readers the tools to create effective responses to global warming This self contained book on the topic

covers key scientific and economic subjects in an applied innovative and immediately relevant fashion Unravels individual behaviors and national policies about global warming by evaluating their evolving motives and incentives Provides an economic analysis of the ways individuals makes decisions when faced with climate change Details a full range of alternative economic and policy responses placing them in an integrated conceptual and policy framework *The Economics and Politics of Climate Change* Dieter Helm,Cameron Hepburn,2009-10-29 The volume brings together leading climate change policy experts to set out the economic analysis and the nature of the negotiations at the United Nations Climate Change Conference in Copenhagen and beyond *The Economics of Global Allocations of the Green Climate Fund* S. Niggol Seo,2019-06-04 This book provides an incisive and economic assessment of the global warming adaptation policy and programs carved out by the United Nations Framework Convention on Climate Change the Green Climate Fund GCF by relying on the four scientific traditions that have been advanced on the economics of adaptation to climate change in agricultural and natural resource enterprises Substantially expanding and refocusing on the book Micro behavioral Economics of Global Warming Modeling Adaptation Strategies in Agricultural and Natural Resource Enterprises published by Springer in 2015 this book elucidates the theories and summarizes the empirical results and predictions from the four traditions of adaptation modelling a microbehavioral economic model of adaptation an agronomic economic modelling a statistical model of yield productivity changes and an ecosystem model of climate change impacts The four modeling traditions are freshly analyzed and applied to the assessments of the 93 GCF funded projects and programs through the end of 2018 **Global Climate Change** James M. Griffin,2003-01-01 Global climate change cannot be understood without knowing the fundamental principles of science economics and politics that condition our policy choices To that end the contributors to this volume experts in their respective fields take a comprehensive look at the major issues involved This volume is written for policymakers and informed citizenry who want to understand at a general level the complexities of global climate change without becoming enmeshed in technical minutia The introduction emphasizes the core fact that climate change issues cut across disciplines William Schlesinger and Gerald North explain the carbon cycle and how increased greenhouse gases impact temperature The economics papers deal with the applicability of benefit cost analysis and then proceed to examine the benefits of avoiding temperature change versus the costs of the various CO2 abatement options Finally David Victor a Stanford political scientist asks which policies are feasible in a world where the incentives differ dramatically among countries The book closes with open letters to the President of the United States *Economics and Policy Issues in Climate Change* William D. Nordhaus,2013-11-26 Although the negotiation of the Kyoto Protocol focused world attention on the global climate it was just one step in the ongoing process of addressing climate change in all its facets Research by the UN s Intergovernmental Panel on Climate Change IPCC has been ongoing since 1988 An extensive IPCC Working Group report published in 1995 examined the economic and social aspects of climate change In this volume eminent

analysts assess that IPCC report and address the questions that emerge from it The result is an instructive and cogent look at the realities of climate change and some methods and difficulties of dealing with them William Nordhaus's introduction establishes the context for the book It provides basic scientific background on climate change reviews the IPCC's activities and explains the genesis of the analyses Subsequent contributions fall into two categories Early chapters review analytical issues critical to social and economic understanding of climate change A second set of chapters address specific economic questions surrounding climate change policy The result is an original and significant contribution to the evolving debate on this crucial hot button topic

Argument in the Greenhouse Nick Mabey, 1997 Covering both the developing and developed world this book identifies important new policies to foster effective agreements on emissions and prevent global warming realistic policies which should receive international and domestic support

Southeast Asia and the Economics of Global Climate Stabilization David A. Raitzer, Francesco Bosello, Massimo Tavoni, Carlo Orecchia, Giacomo Marangoni, Jindra Nuella G. Samson, 2015-12-01 Climate change is a global concern of special relevance to Southeast Asia a region that is both vulnerable to the effects of climate change and a rapidly increasing emitter of greenhouse gases GHGs This study focuses on five countries of Southeast Asia that collectively account for 90% of regional GHG emissions in recent years Indonesia Malaysia the Philippines Thailand and Viet Nam It applies two global dynamic economy energy environment models under an array of scenarios that reflect potential regimes for regulating global GHG emissions through 2050 The modeling identifies the potential economic costs of climate inaction for the region how the countries can most efficiently achieve GHG emission mitigation and the consequences of mitigation both in terms of benefits and costs Drawing on the modeling results the study analyzes climate related policies and identifies how further action can be taken to ensure low carbon growth

The Economics of Global Environmental Change Karl W. Steininger, Mario Cogoy, 2006 The international community is increasingly confronted with global environmental problems which lead to distributional conflicts unresolved equity issues and asymmetric distribution of the costs and benefits of environmental policy The complexity of such problems requires the development of an international institutional framework capable of coping with the long run international aspects of global environmental change This book analyses some of the difficulties in the construction of such a framework and offers suggestions on how they might be overcome The contributions in *The Economics of Global Environmental Change* address international trade land use change biodiversity preservation the management of water resources and the composition of water related conflicts global warming and strategic aspects of international environmental agreements This book provides an in depth insight to the current state of the art for both economists and non economists interested in global environmental change It will also be of great interest to those wanting an introduction to the economic perspective of an increasingly relevant environmental core problem as well as to students and researchers in political science

Climate Change. Economic, political and social strategies to combat the root causes Alexander Ritter, 2017-11-09 Seminar paper from the year

2017 in the subject Economy Environment economics grade 2 3 University Witten Herdecke Wirtschaftswissenschaften course Ecological Economics language English abstract A man made exacerbation of climate change has been widely accepted by the scientific community and calls for a paradigm shift in economic thinking The new imperative demands for the global economy to achieve a factor 10 reduction of carbon dioxide within the next four decades This undoubtedly calls for radical changes in the political the economic as well as in the societal dimension This essay reviews the different strategies that have been brought forwards by academics and activists aimed at combating global warming and assessing the effectiveness and legitimacy of such proposals

Can We Afford the Future? Frank Ackerman, 2009-04-15 According to many scientists climate change is a growing threat to life as we know it requiring a large scale immediate response According to many economists climate change is a moderately important problem the best policy is a slow gradual start to avoid spending too much They can't both be right In this book Frank Ackerman offers a refreshing look at the economics of climate change explaining how the arbitrary assumptions of conventional theories get in the way of understanding this urgent problem The benefits of climate protection are vital but priceless and hence often devalued in cost benefit calculations Preparation for the most predictable outcomes of global warming is less important than protection against the growing risk of catastrophic change massive investment in new low carbon technologies and industries should be thought of as life insurance for the planet Ackerman makes an impassioned plea to construct a better economics arguing that the solutions are affordable and the alternative is unthinkable If we can't afford the future what are we saving our money for Can we Afford the Future is part of The New Economics series which uses the ideas behind a new more human economics to provide a fresh way of looking at major contemporary issues

Warming the World William D. Nordhaus, Joseph Boyer, 2003-08-11 This book presents in detail a pair of models of the economics of climate change The models called RICE 99 for the Regional Dynamic Integrated model of Climate and the Economy and DICE 99 for the Dynamic Integrated Model of Climate and the Economy build on the authors earlier work particularly their RICE and DICE models of the early 1990s Humanity is risking the health of the natural environment through a myriad of interventions including the atmospheric emission of trace gases such as carbon dioxide the use of ozone depleting chemicals

the engineering of massive land use changes and the destruction of the habitats of many species It is imperative that we learn to protect our common geophysical and biological resources Although scientists have studied greenhouse warming for decades it is only recently that society has begun to consider the economic political and institutional aspects of environmental intervention To do so raises formidable challenges of data modeling uncertainty international coordination and institutional design Attempts to deal with complex scientific and economic issues have increasingly involved the use of models to help analysts and decision makers understand likely future outcomes as well as the implications of alternative policies This book presents in detail a pair of models of the economics of climate change The models called RICE 99 for the Regional Dynamic Integrated model of Climate and the Economy and DICE 99 for the Dynamic Integrated Model of Climate and the Economy build on the authors earlier work particularly their RICE and DICE models of the early 1990s They can help policy makers design better economic and environmental policies Economic Issues In Global Climate Change John M. Reilly, 2019-04-10 This book provides a snapshot on economic thinking about global change and provides a starting point for researchers for evaluating the economics of global change in the context of agriculture forestry and resource issues It attempts to rectify the scarcity of economic analysis in global change
