Economics Of Post Communist Transition:

The Economics of Post-Communist Transition Olivier Blanchard, 1997-08-28 Transition in Central and Eastern Europe has led to a U shaped response of output a sharp decline in output followed by recovery Most of the countries of Central Europe seem now firmly on the upside most of the countries of Eastern Europe are still close to the bottom of the U an optimistic view is that they are now negotiating the turn Olivier Blanchard a distinguished economist who has worked on transition since its beginning is one of the first to present a unified analysis of the process of transition The U shaped response of output its causes and its implications are the subject of this book The text is split into four chapters The first reviews the facts the second focuses on the two basic mechanisms underlying transition reallocation and restructuring the third looks more closely at a number of issues from the interactions between restructuring and privatization to the nature of the labour market in transition the fourth chapter pulls the material together in an analytical model of transition This model is then used to discuss policy issues from the design of privatization to the role of fiscal policy in transition Transforming

Post-Communist Political Economies Joan M. Nelson, 1997 The publication brings together a series of essays offering an institutional analysis of economic and social change in Central and Eastern Europe and the new independent states Available in image format hypertext HTML and as Adobe Acrobat PDF files The Economics of Post-Communist Transition, 1998

Post-Communist Transition Leszek Balcerowicz, 2002 The post communist transition in Europe and the former Soviet Union is one of the most important transformations in modern history Changes were exceptionally large and it was not only political and economic systems which were affected there were changes in social structures new territorial boundaries in some cases had to be established and new institutions had to be constructed Moreover market oriented reforms were introduced under democratic regimes Leszek Balcerowicz President of the National Bank of Poland and former Deputy Prime Minister of Poland one of the leading reformers in eastern Europe discusses the varying outcomes of transitions in different countries showing that it was policies more than initial conditions which produced the differences He argues that the larger the scope of market oriented reforms the better the performance in terms of growth low inflation and environmental improvement The presence of competent and determined reformers has also been a crucial factor in successful transformations **Perspectives on political economy of post-communist transition** Bogomir Kovač, 1996

Highway and Byways János Kornai, 1995 Hungarian economist Janos Kornai first used the metaphor of a single path to postsocialist transition in his earlier book *The Road to a Free Economy* The new metaphor that frames this collection of eight recent studies reflects a broader perspective and understanding of the complexities of transition every highway and byway leads eventually to capitalism Kornai observes but to what kind how fast and at what cost Who wins and who loses Kornai draws from his experiences of Hungarian reform as well as from countries of the former Soviet Union to make several major points The first three studies describe what went wrong in countries that tried to mix elements of planned and market

economies Efforts made by communist countries to introduce market socialism the middle road contained an inherent contradiction between the logic of socialism and the logic of a free enterprise system and were doomed to failure In the studies that follow Kornai analyzes the on going dilemmas The transition from communism to free enterprise is filled with daunting hurdles it requires no less than redefining ownership changing values concerning the distribution of wealth transferring the control of political power creating financial institutions and enforcing financial discipline and making deep economic sacrifice Kornai closes with an overall survey of postsocialist transition describing the stages that countries tend to go through that will be particularly useful to scholars of comparative economic systems

The World Economy and Great Post-communist Change Grzegorz W. Kołodko, 2006 An answer for the economist is a question for a policy maker Most economists are confronted daily with the practical question of how the world is organised and how the global economy performs When economists conclude they can grasp certain aspects scientifically they offer an answer which becomes in turn a question to the policy makers keen on changing the world for the better The unique approach presented in the book is the combination of the theoretical considerations with the policy viewpoint analysis due to the author's own experience with policy making as deputy premier and finance minister of Poland twice and very successful as an architect of Polish reforms Another important feature is a vast yet comprehensive and deep discussion of the interactions between technology change and society and the economy both in the world economy and in emerging markets especially the post communist ones Of great importance for sustained development are the institutions They are not only created and built but also need to be learnt Not only theoretical arguments but also the practical experience demonstrates that faster economic growth is attained by those countries which take greater care to foster the institutional reinforcement of market economy and civic society Yet progress in market economy institution building is not in itself sufficient to ensure durable and fast growth Another indispensable component is an appropriately designed and implemented economic policy which must not confuse the means with the aims

Czech Republic's Economic Transformation Ryan Solcz, 2012-05-16 Research Paper undergraduate from the year 2011 in the subject Economics History grade A University of Toronto language English abstract The paper's organization is as follows First we discuss what we mean by transition big bang and gradual and we clear up the discrepancy in the literature regarding whether or not the Czech experience adhered to big bang or gradualism it used both in fact Second we discuss the inefficiencies in the Czech experience employment strategy and finances which showed up in the gradual phases of transition Third we discuss the Czech Republic's reaction to these inefficiencies Fourth we analyze the significance of setting Fifth we conclude by comparing the Czech experience to other post communist countries and by

discussing what comes next **Theorizing Transition** John Pickles, Adrian Smith, 2005-08-31 Examining transformations using a variety of perspectives Theorizing Transition provides both a rich empirical map of the dimensions of post Communism and raises important theoretical issues about how we interpret these changes Post-communist Transition to a Market Economy Domenico Mario Nuti, Milica Uvalić, 2003 *A Liberating Economic Journey* Andrzej Brzeski, Jan Winiecki, 2000 **The International Political Economy of Transition** Stuart Shields, 2014-10-03 This book explores the role played by state and multinationals in shaping transition It uniquely integrates issues of globalisation and transnationalism into the analysis of post communism This book will be of interest to students and researchers of transition postcommunism political economy and European politics **The Economics of Transition** Marie Lavigne, 1999-02-15 Substantially revised and updated the second edition of this highly acclaimed text is both a vital guide and a valuable critical analysis The book provides a contemporary comparative approach to the process of transformation of the economies of Eastern Europe and Russia Supplying a large amount of factual and statistical information it also includes consideration of recent progress in the areas of macro economic stabilisation micro economic restructuring and integration into the world economy *De-monopolization And Competition Policy In Post-communist Economies* Ben Slay, 2019-03-07 Even in developed capitalist economies markets function poorly without regulation by competitive forces The countries that once were part of the Eastern bloc are introducing market forces into industries created according to the monopolistic logic of central planning so that competition policy plays an important role in the transition to capitalism This interdisciplinary study examines how barriers to the development of competitive markets and competition policy are being overcome in Russia Poland Hungary and Mongolia A group of U S Russian and East European specialists explores the institutions and programs of competition policy as well as its role in the overall post Communist transition Providing a complete comparative picture of the development of competition policy in a broad cross section of formerly socialist countries the contributors consider the extent of the post Communist monopoly problem as well as progress in de monopolization *The Economics of Post-Communist Transition* Olivier Blanchard, 1998 Economic Dynamics in Transitional Economies Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe This book examines the economic dynamics of Central and Eastern European post Communist countries It illuminates the paths these countries are taking toward restructuring their markets increasing international trade and bettering their connections with the European Union and other countries Beginning with a comparative analysis of the three P governments Pigouvian Partisan and Paternalistic and continuing with a discussion of the interrelated political and economic difficulties of transition author Bruno Sergi proposes a surprising solution Inspired by the Bruxelles consensus he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post Communist economies Economic Dynamics in Transitional Economies also explores regional comparative macroeconomics

the aftereffects of the Washington Consensus integration of Eastern and Western European economies interrelations between national and regional monetary activity political and economic policy reform involvement of European Union member countries We are living in historic times and Economic Dynamics in Transitional Economies will be a welcome guide to the rough roads ahead This thorough assessment of current political and economic realities will stimulate debate about new European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region s success in the new century Post-Communist Transitional Justice Lavinia Stan,Nadya Nedelsky,2015-02-26 Explores how the former communist regimes of Central and Eastern Europe have grappled with the serious human rights violations of past regimes **Postcommunist Transformation and the Social Sciences** Frank Bönker,Klaus Müller,Andreas Pickel,2003-08 The work s major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate
