The aim of this book is to provide an introduction to and interpretation of the development of the Canadian economy since European settlement The main contrast between the book's view and previous interpretations of Canada's economic past is that instead of emphasizing the continuity of Canadian economic development with staple exports playing the leading role the focus is on the transition from the sparsely populated colonial economy of the early nineteenth century to the modern economy ranking among the seven largest market economies whose leaders now meet for economic summits     **Canadian Economic History** M.H. **Financial Stability and Prudential Regulation** Alison Lui,2016-10-04 Financial stability is one of the key tenets of a central bank s functions Since the financial crisis of 2007 2009 an area of hot debate is the extent to which the central bank should be involved with prudential regulation This book examines the macro and micro prudential regulatory frameworks and systems of the United Kingdom Australia the United States Canada and Germany Drawing on the regulator frameworks of these regions this book examines the central banks roles of crisis management resolution and prudential regulation Alison Lui compares the institutional structure of the new twin peaks model in the UK to the Australian model and the multi regulatory US model and the single regulatory Canadian model The book also discusses the extent the

central bank in these countries as well as the ECB are involved with financial stability and argues that the institutional architecture and geographical closeness of the Bank of England and Financial Policy Committee give rise to the fear that the UK central bank may become another single super regulator which may provide the Bank of England with too much power As a multi regional comparative study on the importance and effectiveness of prudential regulation this book will be of great use and interest to students and researchers in finance and bank law economics and banking **Framing the Global**

**Economic Downturn** Paul 't Hart, Karen Tindall, 2009-09-01 The global economic downturn that followed the collapse of major US financial institutions is no doubt the most significant crisis of our times Its effects on corporate and governmental balance sheets have been devastating as have been its impacts on the employment and well being of tens of millions of citizens It continues to pose major challenges to national policymakers and institutions around the world Managing public uncertainty and anxiety is vital in coping with financial crises This requires not just prompt action but most of all persuasive communication by government leaders At the same time the very occurrence of such crises raises acute questions about the effectiveness and robustness of current government policies and institutions With the stakes being so high defining and interpreting what is going on how and why it happened and what ought to be done now become key questions in the political and policy struggles that crises invariably unleash In this volume we study how heads of government finance ministers and national bank governors in eight countries as well as the EU engage in such framing contests and how their attempts to interpret the cascading events of the economic downturn were publicly received Using systematic content analysis of speeches and media coverage this volume offers a unique comparative assessment of public leadership in times of crisis
