F. Kauffman, Unai Diaz-Orueta, 2019-12-17 **Entrepreneurship** David Deakins, Jonathan M. Scott, 2020-11-04 Written by a team of leading international scholars this new book treats entrepreneurship as an ever evolving social phenomenon and explores the recent trends that impact it such as digitisation disruptive technologies the rise of the gig economy and the growing importance of community based and social entrepreneurship Including a mixture of case studies examples consideration of policy issues and exercises this text provides practical perspectives of Entrepreneurship in support of key theory while discussion questions suggested reading and assignments help situate and test understanding Institutions, Entrepreneurship, and Economic Performance David Urbano, Sebastian Aparicio, David B. Audretsch, 2019-04-11 Using institutional economics as a theoretical framework this book analyzes institutional environment conducive to entrepreneurial activity in order to enhance economic performance across countries In particular the main contributions of this book to the entrepreneurship literature are the following Identify past and current research about the institutional context shaping

entrepreneurial activity and its effect on economic growth Examine social progress orientation as those institutional factors that are shaping innovative entrepreneurial activity Explore the effect of different types of entrepreneurial activities on economic growth Examine how social progress orientation through opportunity driven entrepreneurship affects economic development Analyze the interrelationships between institutions entrepreneurial activity and economic development across countries Study how the country s institutional context influences the way in which entrepreneurial activity affects social progress Two sides of the same coin might be observed when analyzing policy aspects of those institutions affecting entrepreneurial activity On the one hand effective public policy to promote entrepreneurship is predicated on understanding the underlying forces as well as the consequences and impacts of entrepreneurship On the other hand different endeavors to promote entrepreneurial activity might have deleterious economic effects since they could actually reduce employment in the long term Thus it is crucial to understand the institutional environment in which entrepreneurs are interacting and making decisions The comprehension of these phenomena serves to move forward the theoretical practical and policy debate on entrepreneurship as a mechanism to achieve higher economic performance

Women and Global Entrepreneurship

Maura McAdam,James A. Cunningham,2021-04-05 Entrepreneurship in context has been described as the third wave in entrepreneurship research Accordingly specific socio economic political market and institutional contexts are key to fostering enabling and enacting entrepreneurial activity and behaviours These contexts shape everyday entrepreneurship experiences This book is based on the premise that how gender is articulated within the entrepreneurial debate has to acknowledge context However context is not a construct that only applies to those economies and situations that differ from the presumed norm of Western developed nations Adopting a more critical appraisal of how context is positioned within current theorizing around gender and entrepreneurial behaviours offers potential to progress debate whilst acknowledging that competing and contrasting contextual influences require clearer recognition This book therefore has the potential to unearth credible and robust approaches to further examining contextualisation and women entrepreneurship that advances new insights By exploring and examining how contextual influences shape women s entrepreneurship this book challenges the assumption that women entrepreneurship is the same throughout the world It will be of value to researchers academics and students with an interest in entrepreneurship political economy economics and public policy

success and which predict a likely failure The Illusions of Entrepreneurship is an essential resource for everyone who has dreamed of starting a new business for investors in start ups for policy makers attempting to facilitate the formation and survival of new businesses and for researchers interested in the economic impact of entrepreneurial activity Scott Shane offers research based answers to these questions and many others Why do people start businesses What industries are popular for start ups How many jobs do new businesses create How do entrepreneurs finance their start ups What makes some locations and some countries more entrepreneurial than others What are the characteristics of the typical entrepreneur How well does the typical start up perform What strategies contribute to the survival and profitability of new businesses over time
