Economic Geography Sharmistha Bagchi-Sen,Helen Lawton-Smith,2006-09-27 The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction In doing so the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy Offering a discussion of theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial inter dependencies contributors also demonstrate the need to engage with multiple audiences and within this context they proceed to examine how geographers have interfaced with businesses and policy This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy With excellent breadth of coverage it provides an outstanding introduction to research topics and approaches

The Contextual Challenges of Occupational Sex Segregation Stephanie Steinmetz,2011-12-15 This study untangles the complex interplay of individual and contextual factors shaping cross national differences in horizontal and vertical occupational sex segregation It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society Following this approach Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross national differences in occupational sex segregation She offers insights into the positioning of 21 EU Members States particularly of former CCE countries Based on advanced multi level models the study shows that institutional factors such as the organization of educational systems post industrial developments social policies and the national gender culture play a crucial role in shaping sex segregation processes apart from individual factors The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions some reduce horizontal segregation while at the same time aggravating the vertical aspect Finally the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market

Gender and Jobs Richard Anker, 1998 Sex in the world **Working Together** Cynthia Estlund, 2003-10-02 The typical workplace is a hotbed of human relationships of friendships conflicts feuds alliances partnerships coexistence and cooperation Here problems are solved progress is made and rifts are mended because they need to be because the work has to get done And it has to get done among increasingly diverse groups of co workers At a time when communal ties in American society are increasingly frayed and segregation persists the workplace is more than ever the site where Americans from different ethnic religious and racial backgrounds meet and forge serviceable and sometimes lasting bonds What do these highly structured workplace relationships mean for a society still divided by gender and race Structure and rules are in fact central to the answer Workplace interactions are constrained by economic power and necessity and often by legal regulation They exist far from the civic ideal of free and equal citizens voluntarily associating for shared ends Yet it is the very involuntariness of these interactions that helps to make the often troubled project of racial integration comparatively successful at work People can be forced to get along not without friction but often with surprising success This highly original exploration of the paradoxical nature and the paramount importance of workplace bonds concludes with concrete suggestions for how law can further realize the democratic possibilities of working together In linking workplace integration and connectedness beyond work Estlund suggests a novel and promising strategy for addressing the most profound challenges facing American society **Out of the Margin** Susan Feiner, Edith Kuiper, Notburga Ott, Jolande Sap, Zafiris Tzannatos, 2005-07-22 Out of the Margin is the first volume to consider feminist concerns across the entire domain of

economics The book addresses the philosophical roots of rational economic man power relations and conflicts of interest within the family the limitations of relying on secondary data and the policy implications of neo classical models With its range and depth of coverage this is not only an excellent introduction to the field but also indispensable for those seeking more in depth knowledge of issues of gender and economics
