*The Oldest Social Science?* W. T. Murphy, 1997 This book looks critically at some of the underlying assumptions which shape our current understanding of the role and purpose of law and society It focuses on adjudication as a social practice and as a set of governmental techniques From this vantage point it explores how the relationship between law government and society has changed in the course of history in significant ways At the centre of the argument is the elaboration of the notion of adjudicative government From this perspective it is argued that the relationship between law and society must be conceived in a different way in the era of economics sociology and statistics The impact of these disciplines both constitutes modernity and unfolds a different role for law The author argues that the traditional vision of the role of law rooted in a complex set of hierarchical assumptions is no longer adequate Reluctant Europeans David Gowland, Arthur Turner, 2014-09-25 During the past fifty years few issues in British politics have generated such heated controversy as Britain's approach to European integration Why has Europe had such an explosive impact on British politics What impelled British policymakers to embrace a European destiny and why did they take such a cautious approach These are some of the key issues addressed in *The Reluctant Europeans* This new study draws upon recently available source material providing a clear chronological account and covering events right up to Blair's first year in office and the launch of the Euro **Coping with**

**Recession** Paul A. Geroski, Paul Gregg, 1997-10-02 The text examines how companies cope with the pressures which are unleashed by recessions It is based on a large scale survey undertaken in the spring of 1993 which involved the participation of more than 600 leading UK companies The questionnaire data was combined with a long enough time series of data on the financial performance of most of the companies to enable us to trace effects left over from the recession in the early 1980s The main issues examined in the book are what makes companies vulnerable to recessionary pressures How do companies typically respond to these pressures How have recessionary pressures been transmitted back into labour markets and what kinds of institutional changes have they induced Finally do recessionary pressures stimulate innovative activity From School to Productive Work Helvia Bierhoff, S. J. Prais, 1997-04-03 This book compares the schooling and training systems in Switzerland and Britain **The Single Market Programme as a Stimulus to Change** David G. Mayes, Peter Hart, 1994-10-06 This 1994 book offers a comparison of British and German industries reaction to the opportunities and threats offered by the single European market SEM It outlines the effect that the SEM was expected to have on the two countries and contrasts this with their actual progress based on published data and a detailed study of four industries While the single European market has had an impact many measures have had a far weaker effect than expected The existence of other barriers not tackled by the SEM programme weakened measures poor implementation global business trends and the recent recession helps dominate the impact of the SEM Nevertheless the SEM stands out as one of the striking influences on British and German industries for many years Germany with its geographical advantage and stronger manufacturing seems better placed to benefit but the less regulated and often more flexible UK economy may have competitive advantages as the pressures increase
