Principles of Addiction Medicine Richard K. Ries,Shannon C. Miller,David A. Fiellin,2009 This respected text from the American Society of Addiction Medicine is valuable for all physicians and mental health personnel who specialize in addiction medicine and who treat patients with addiction disorders The chapters blend scientific principles underlying addiction with the practical essentials of clinical addiction medicine Many of the contributors are affiliated with leading government agencies that study addiction and its science such as the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse The book will appeal to a wide and interdisciplinary range of professionals especially those with interest or duties relating to addiction related disorders and in particular physicians seeking certification status via either the American Board of Addiction Medicine or the American Board of Psychiatry and Neurology A companion Website will offer the fully searchable text **Current List of Medical Literature** ,1958 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library *ICT for assessment and rehabilitation in Alzheimer's disease and related disorders* Philippe Robert,Sophia Antipolis,Iracema Leroi,Valeria

Manera,2016-06-21 Information and Communication Technologies ICT are no longer objects gathering dust on a shelf instead they have become intrinsic in our everyday lives They are now even taking on an indispensable role in many clinical and rehabilitation settings In the past decade there has been a surge of interest in using ICT with elderly people both with and without dementia in various clinical and research settings On the one hand ICT can supplement the assessment of functional ability by more precisely evaluating the nature and extent of functional impairment on the other hand ICT can be used to support elderly people in their everyday activities as well as to ameliorate symptoms and improve quality of life through stimulation and rehabilitation This is the intention driving the development of Serious Games SG which are digital applications often based on Virtual Reality specifically adapted for purposes other than entertaining including rehabilitation training and education Finally ICT can also play a key role in the development of interactive educational programs to support caregivers of people living with dementia A handful of interesting studies have started to investigate the effectiveness of employing ICT in people with different types of dementia such as Alzheimer s disease AD It is therefore timely to attempt to scope this newly emerging field as well as to foster a dialogue among the different professionals including academics clinicians and computer engineers working in the area With this in mind the Research Topic ICT for assessment and rehabilitation in Alzheimer s disease and related disorders aims to provide new and interesting insights into the current use of ICT in healthy and pathological aging The intent is also to identify challenges and new perspectives in the field gather recommendations for the application of ICT in AD and related disorders in clinical practice and to showcase cutting edge clinical research The articles included in this Frontier Research Topics have more than achieved this aim and are a perfect illustration of how ICT can be used to enhance the lives of people living dementia and their caregivers **Foundations of**
