Richard, Nancy Catano, 2008 Shows principals how to successfully balance the needs and priorities of their school and continuously develop and refine their leadership skills Effective Educational Leadership Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25 Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate Tim Brighouse *Times Educational Supplement* its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership Its greatest contribution is its exploration of the links between effective leadership and effective education The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration *Journal of Educational Administration* Leadership is the theme of this decade This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform A great and timely collection Michael Fullan Dean OISE University of Toronto This book makes an excellent contribution to the current debate on Educational Leadership It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader and to the professional provider of CPD in leadership offering a wealth of information that can be practically adopted and adapted for a range of courses Stephen Merrill *Journal of Inservice Education* Educational management and administration studies focus on leadership as a key determinant of effective educational institutions and currently much leadership preparation is characterized by a rational skills focused approach Placing current thinking in leadership studies in its organizational and historical context this book explores its implications for leadership preparation leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice It draws on literature and research from both the private and public sectors It is deliberately international in its

content and focus and examines a range of practice both within and outside education Each chapter has a short introduction by the editors setting it in context This book is for providers and students in higher educational institutions for postgraduate level courses in educational management and for leadership development provision for Headteachers induction programmes NPQH and LPSH It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools colleges and other educational organizations

Leadership for Mortals Dean Fink, 2005-09-08 Overall and as one has come to expect from Fink this is a readable text that thinks outside the box of leadership theory I have no doubt that the text will be welcomed by many readers for an engaging style that places human interest at the heart of the discourse in the field Mark Brundrett writing in Educational Management Administration and Leadership It is a must read for those in educational leadership roles in schools both to gain invaluable insights and to draw on a framework for individual reflection Professor Brent Davies University of Hull I enjoyed reading this book The combination of critical reflection of his experience in the light of relevant literature makes for a lively and thought provoking book I was going to say little book because at times I would have liked to have read

more But on the other hand it is the sort of book one the academic and the leader could read in one sitting enjoy and come back to for some ideas I recommend you to do so ESCalate This book provides a refreshing alternative to the rhetoric about superheads and mavericks that has been prevalent in some of the recent discourse about leadership Dean Fink draws heavily upon the work of Andy Hargreaves Michael Fullan and his own research with Louise Stoll so some of the ideas are familiar However what makes Leadership for Mortals interesting is the way in which he untangles the complexities of leadership by using genuine examples alongside the theory Dean Fink s writing is accessible and his anecdotal style should resonate with his intended audience of current and prospective leaders LDR The Magazine for School Leaders This book is a welcome antidote to the notion of school leaders as heroic figures Dean Fink s commitment to enhancing the life chances of young people shines through the pages Kate Myers Times Educational Supplement With great wisdom and insight Dean Fink invites us into his leadership stories to masterfully illustrate that school leadership is no longer a person but an intricate network of mortals working together to enhance learning experiences for students They are truly leaders of learning where commitment to successful learning for all students is the locus of their passion perseverance and persuasion Balanced with connections to respected leadership literature this lucid and eloquent book will inspire current and future school leaders to reflect and develop their leadership practice to higher levels of effectiveness An outstanding and optimistic read for all school leadership mortals practitioners and scholars alike I enjoyed it immensely David Eddy Director First time Principals Programme The University of Auckland Practitioners will find this book at the same time reassuring and challenging Fink includes stories of leadership that highlight effective strategies and some approaches that have gone wrong They are real and ring true and therefore credible and instructive Ken Thompson Principal Gladstone Park Secondary College Australia A great story about schools and their leaders progressing towards a knowledge driven world and the roads they choose to travel Building sustainable communities of practice and the credible and varied examples of how the combination of leadership behaviour and enabling and disabling processes can make or break a successful school are clearly illustrated in Leadership for Mortals A significant read for all aspirant and accomplished leaders Jenny Lewis Executive Officer Australian Council for Educational Leaders Dean Fink brings together a wealth of learning from his own experience as a leader and learner to provide some powerful messages This is a well informed book with a strong theoretical basis but it is also personal and real making sense of educational leadership in a way that is both profound and down to earth School leaders in the UK and elsewhere will find inspiration reassurance and challenge in this book Steve Munby Chief Executive National College for School Leadership Grounded in solid knowledge base and profound lived experience Dean Fink s Leadership for Mortals provides deep insights on how ordinary practitioners could become great and sustainable leaders of learning Fink s book is not a quick fix how to do it manual It stimulates us to reflect on education leadership both as a personalized value laden journey and an art as well as reminds us of the imperative issues of extraordinary commitment effort and determination in making a difference on leading

students and teachers learning This is a must read book for aspiring and serving leaders in the field of education Professor John Chi kin Lee Dean of Education The Chinese University of Hong Kong Hong Kong Its style is conversational and unpatronizing yet it makes powerful statements about the key components that contribute to successful leadership It is always practical and readers will come away from this book knowing they have learned something that they will be keen to try out for themselves Readers will recognise leaders good and bad that they have come across at times being reassured that they are getting it right and at others despairing as they identify situations in which they too got it wrong Fink s writing makes it clear that leadership is not exact science He reminds us that although we are mortals with good mentoring and better training our own potential has a better chance of being realised and that this is the best way to enable our students to achieve their own potential Journal of Research in International Education Leadership in recent years has become a growth industry Politicians demand more of it academics decry the lack of it and potential school leaders are deciding to hell with it we are making the business of leadership so complicated that we seem to need John Wayne at his mythological best or Xena the Warrior Princess to run a school Most educational leaders are not heroic but rather ordinary people who through extraordinary commitment effort and determination have become extraordinary and have made the people around them exceptional Educational leadership is more art than science it is more about character than technique it is more about inspiration than charisma it is more about leading students and teachers learning than the management of things This resource for prospective and practising school leaders motivates and inspires addresses the challenges of contemporary school leadership presents a model for leadership development selection and succession challenges existing and prospective leaders to develop and live by a set of core values based on students learning describes and explains the learnings required by effective leaders of learning describes the intellectual tool kit that leaders can develop describes the trajectories through which leaders proceed and the learnings required at each stage of the leaders evolution presents a template for leadership development and succession
