Effects Of Quality Care On Child Development A Special Issue Of Applied Developmental Science

Susan B. Neuman, David K. Dickinson

Effects Of Quality Care On Child Development A Special Issue Of Applied Developmental Science:

The Effects of Quality Care on Child Development Michael E. Lamb, 2000 The papers in this special issue reflect the current status of research on the association between quality of care and children's adjustment while pointing toward a new generation of questions that have risen to prominence in the minds of both researchers and policymakers Specifically having established that high quality is associated with superior outcomes researchers must now consider How quality can best be measured Whether the relationship is causal with quality promoting better adjustment Whether the association is a linear function How strong the association is and from a pragmatic point of view and Whether the association is strong enough to merit continuing investments in quality All of the articles in this special issue elucidate these issues and demonstrate that quality of child care is a salient and statistically significant modulator and moderator of the associations between type of care and child development

Standardized Childhood Bruce Fuller, 2008-07-15 A array of childcare and preschool options blossomed in the 1970s as the feminist movement spurred mothers into careers and community organizations nurtured new programs Now a small circle of activists aims to bring more order to childhood seeking to create a more standard state run preschool system For young children already facing the rigors of play dates and harried parents juggling the strains of work and family government is moving in to standardize childhood Sociologist Bruce Fuller traveled the country to understand the ideologies of childhood and the raw political forces at play He details how progressives earnestly seek to extend the rigors of public schooling down into the lives of very young children Fuller then illuminates the stiff resistance from those who hold less trust in government solutions and more faith in nonprofits and local groups in contributing to the upbringing of young children The call for universal preschool is a new front in the culture wars raising sharp questions about American families cultural diversity and the appropriate role of the state in the lives of our young children Standardized Childhood shows why the universal preschool movement is attracting such robust support and strident opposition nationwide

The Oxford Handbook of Poverty and Child Development Valerie Maholmes, Rosalind B. King, Ph.D., 2012-05-21 Comprehensive and integrative The Oxford Handbook of Poverty and Child Development describes the contextual and social ecology of children living in poverty and illuminates the biological and behavioral interactions that either promote optimal development or that place children at risk of having poor developmental outcomes

A. Temple, 2019-01-10 Leading scholars synthesize knowledge on how gains from early childhood programs and practices are initiated, increased, and sustained Behavioral Science & Policy: Volume 2, Issue 1 Craig Fox, Sim B. Sitkin, 2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups, and organizations. Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and workplace practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.
